Dedication

This work is dedicated to humanity.

Table of Contents

Preface 7

Ch. 1: An Argument for Majik 11

Ch. 2: Majik and the Evolution of Consciousness 23

Ch. 3: Diligence in Majik 35 Ch. 4: Astrology and Majik 39

Ch. 5: Sex and Sex Majik 47

Ch. 6: Entrainment Majik 59

Ch. 7: The Science of Egregores 65

Ch. 8: An Explanation of the 12 Rules of Majik 71

Ch. 9: Majik Performed 81

Ch. 10: Majik Performed (Part Two) 101

Ch. 11: Majik and Technology 115

Ch. 12: Majik and Black People 121

Ch. 13: An Introduction to the True Kabbalah 137

Ch. 14: Association 151

Ch. 15: An Elaboration of the Noetics 173

Ch. 16: Introduction to Association Equations 187

Ch. 17: Introduction to the 40 Elements 193

Ch. 18: Introduction to the 7 Foundations 203

Ch. 19: The Twelve Prerequisites for Creation 213

Ch. 20: Introduction to Kabalistic Kard Practice 227

Ch. 21: Doctrine, Hierarchy, and Resource 239

Ch. 22: Tootra…What and Why It Is 247
Ch. 23: The Oath of T.O.O.T.R.A. 267
Ch. 24: Memorization and its Importance 269
Ch. 25: TOOTRA Tech Initiative (T.T.I.) 277
Ch. 26: Degrees and Titles of the Order 283

Preface

Social unrest and political uprisings due to the corruption of compromised leadership, peace in public spaces disturbed by mass shootings, childhood innocence prayed upon by the rich and powerful, justice for purchase filling private prisons with those lacking purchasing power, news and entertainment used as mind manipulating machines, a populace agreeing to spy on themselves and one another via selfies, live streams, tags and posts consenting to the terms and conditions of invisible but digital overlords, the countries most patriotic citizens citizenship regarded as lower then that of our pets and can be gunned down in the same streets where we curb and pick up after the latter, women giving lip service to the overthrow of patriarchy while giving lip service to the same patriarchs, behind the closed curtained voting booth. Such is the current state of affairs that gave rise to the decision to distribute this information to the common man and woman, information they are usually the victims of.

Those who rule over the masses are using a special and ancient system of control. At the center of this system is

Majik, the creation of occurrences, via mental and spiritual energies, though there are other aspects to that control the public has not been made privy to.

Hence this work starts by giving a crash course in the Art and Science of Majik. Teaching to the lowest student in class so to speak, the basics of Majik.

However, of the entire work, undoubtedly the most important portions are 7, 10, 12, and 40; the 7 Foundations, the 10 Noetics, the 12 Prerequisites and the 40 Elements, along with the Mathematical System they entail.

A system that enhances exponentially any majikal tradition one may practice. Enhancements in the sense of quicker results, accurate manifestations, manifestation arrival date and time, energy amplifications, and much more.

Advocated in this book is self initiation while also facilitating cooperative casting and comradery centered around a common interest in the Art.

The Tootra Kabalistic System exposes the tactics and techniques stolen from the Ancient Mystery Schools used by the global oligarchs to control and manipulate the masses.

We teach this system to the common man and woman its used to oppress, with the hope they free themselves. *Sic erunt*

novissimi primi et primi novissimi (The last will become the first…)

Know that this work was written with love and above all We hope you enjoy the read.

Supreme Metatron of the Vav Sameck Resh Tav Shetteem

Excelsior.

Chapter One

An Argument for Majik….
(Receiving Your Heart's Desires)

"Nowadays, every juggler's jump and every monkey's dance is called Majik

... Iddy tricky illusions, the physician, the astrologer… Knowledge derived from wood, fire, animals, mirrors, pictures, shark, intestines, even dirt, and shit all of this has been given the sacred name of wisdom…. Majik. Oh, poor daughter, tender pure virgin, how badly you have become smeared and slandered. Lift your face out of the dirt and dust, show who you are! Cover the mouths of the liars! Make it impossible for the sons of bitches to go into your father's house and sit at his table. Chase them away, yell out loudly, "I am the true Wisdom, the daughter of the living God and the treasure of his heart. Go from my sight you daughters of impurity."

"Live on my sister, you unknowable secret of Adonai we share the same heart. Let us stand against our accusers. Let us further our honor and sweep away the accusers. Then the world will recognize that we are both still alive

and well and that we have only slept. Let us save our Creator's honor and reputation."

"Now my son, who do you think are these two sisters? Have you heard them? No, you are too young. So listen carefully these two sisters are God's Secret and God's Wisdom… The Kabalah and Majik." -The book of Abramelin, Book 3, Chapter 1.

"It hid the principles of all the sciences and the whole progression of the human spirit, in the audacious, calculations of Pythagorean: fables teemed with its miracle and history when it undertook to judge of this unknown power, confounded itself with fables. It shook and enfeebled expires by its oracles; make tyrants turn pale on their thrones and ruled overall winds by means of curiosity or fear. To this science, said the masses, nothing is impossible; it commands the elements, knows the language of the planets and controls the movements of the stars; the moon, as its voice falls, reeking with blood, from Heaven; the dead rise upright in their graves and shape into fatal words the wind that breathes through their skulls. Controller of Love or Hate, this science can at pleasure confer on human hearts paradise or hell… This is what Majik had been when Christianity publicly crushed this philosophy with its condemnation and

compelled it to become more occult and mysterious than ever… Christianity should not have hated Majik, but human ignorance always fears the unknown." --- Albert Pike, Morals and Dogma, 28° pt. 3.

Majik to the uninitiated Masses is scoffed at and dismissed as unreal fantasy not worthy of investigation or inquiry. It is seen not as science but childish superstition. Or it is feared as a vehicle of the devil and forbidden under the word of God, forbidden Knowledge whose consequence is some sort of damnation.

These and various other ignorant perspectives postulated by the populace are held in tandem with notions which contradict the previous mentioned. For instance, how many among mankind do not believe man is meant to evolve and that this evolution entails that he becomes superior to his present state and that this climb toward supremacy is continuous? Where do these dull souls believe that such a climb eventually leads to, if not God? Both becoming and uniting with. Do not they know that *"Majik"* a more direct mode of creating, constitutes as a necessary stage in Man's evolutionary journey, that he is to go from Homosapien to Homodivinius of which Christ was the prototype?

And what of the words of the Savior, are they just to be ignored or interpreted without the use of reason? *"I say unto*

you if ye have faith as a grain of mustard seed, you shall say unto this mountain move and it shall move and NOTHING SHALL BE IMPOSSIBLE TO YOU." -Matthew 17:20

"and Peter walks on water" and when he saw the wind he became afraid and began to sink and immediately Christ caught him saying, *"Oh you of little faith, why is it you doubt?"* Matthew 12:24-31

Explain to me what is the meaning of Habakkuk 2:2-4, *"The Lord said and if ye ask anything of me let him write his vision on a Tablet and make it plain so that he who readeth it runs. For the vision is yet for an appointed time but in the end, it will speak and not lie and though it tarries wait for it, it tarries not it will surely come."*

Are these not the properties of Majik, of which change a word here and there and place in another book under a changed title from Bible to Grimoire and all would unanimously agree these are words explaining Majik and what is it to perform miracles but to exhibit feats of Majik begging the question are prophets but Majikians? And are our prayers incantations and invocations? What was the difference between the acts of Simon and Peter, but skill level, the same difference between Moses and Pharaohs

Majikians was nothing more then Moses being more skilled at the Art.

Our present age is filled with skeptics, who deny the existence of a soul, God, and life after death. Science for this type is something solely mechanistic, the firing off of neurons (electrical impulse) and the interaction of cells create Consciousness, so that which we call *"Me,"* points to as *"I"* is deemed by the mechanist to be a mere figment of human imagination making man nothing more then organic robots who minus, the nuts, bolts, and wires are lost in our own conceit, believing ourselves to be *"real"*.

Men of such notions are usually pseudo-intellectuals who've become disgruntled with religion and spirituality in general due to past experiences with dogmatism. Rather then investigative research and study, their stance is more so out of emotion while believing themselves to be men of reason dwelling above any emotional involvement.

True men of Science never overlook verified data simply because it goes against his prejudgments. Experiments in Quantum Physics have established conclusively the conscious mind's ability to affect matter via subatomic particles giving rise to a relatively new field of science called Noetic Science.

Physicist, Bill Tiller, arranged a group of Meditators, while in deep meditative states, attempt to raise and lower the ph (the degree of acidity or alkalinity ex. Orange juice ph is high, milk's ph is low) of a solution. The experiment was not only successful but it was also discovered that the space or locale had become increasingly responsive to the thoughts of the meditators due to repeated experiments done in that particular space. The effects upon the solution were produced faster and with less effort than when the experiment was transferred to a different locale. A *"Sacred Space"* had been created by thought. The space had somehow recorded the commands of the meditators, rendering it easier to reproduce the effects upon the solution. - "Founding Father's Secret Societies," by Robert Hieronimus, PhD.

Micro Psychokinesis experiments at P.E.A.R. (Princeton Engineering Anomalies Research) used a machine called a Random Number Generator. A device that measures the radioactive decay of physical material then plots that decay by way of a seismograph which usually reads out in the shape of a bell curve. Deviation from this shape indicates the slowing or acceleration of physical particle decay. Subjects

were told to stare at the graph and try to change its shape by thought only. They were successful.

The experiment signified the subject's thoughts were directly affecting and causing the deterioration of physical matter.

The experiment was a twelve-year study with 2.5 million trials and had other interesting findings such as the effect was larger if two people rather than one person tried to influence the curve. Also if two people had a close relationship the results were four times better then for a single person. And men were better at causing a change in the direction of the curve, while women were better at affecting its shape.

The two studies are examples of Micro P.K. *"Micro Psycho Kinesis is Conscious Thought's Influence on random systems or events that are already in a state of change or uncertainty, where one is not attempting to violate such laws as gravity.*

Macro P.K. is the directly observable, large scale influence upon objects by conscious intent such as lifting a table into mid-air.

Bio P.K. or D.M.I.L.S. (Distant Mental Interaction with Living Systems) is the conscious intent's influence on humans, animals, plants, and microorganisms. These are the

three forms of Psycho Kinesis the scientific form for Voodoo, Witchcraft, and Majik." - The E.S.P Enigma (The Scientific Case for Psychic Phenomena), by Diane Hennacy Powell.

On the matter of reincarnation as a proof for the existence of the soul, consider Dr. Ian Stevenson… *"a wellrespected Professor of Psychiatry at the University of Virginia who has published extensively in psychiatric literature. Dr. Stevenson has collected over 12,000 examples of children with reincarnation memories and experiences. Many exhibit xenoglossy, the ability to speak a foreign language to which they were never exposed."* - Many Lives, Many Masters by Brian L. Weiss, M.D.

And take into account Dr. Weiss's own investigations and experiments into reincarnation. A self-proclaimed skeptic with broad academic credentials, a graduate of Yale Medical School and Columbia University interned at N.Y.U. Bellevue Medical Center, became Chief Resident at Yale University School of Medicine Depart of Psychiatry and his practice of past life therapy which stemmed from recorded sessions with a patient who reported to him things of his personal life which she had no access to, while under hypnosis. An experience that had such an impact on him, it changed his career, propelling him to explore the past lives

of over 4,000 patients and many thousands more at group workshops.

To this physical reality, there is indeed a spiritual aspect, in fact, all of life is rooted in that spirit. It is the source code for all physical phenomena and is beginning to become more and more the final frontier of man's explorations. Majik is and will be the result of this exploration, a spiritual technology, the intentional use of consciousness to effect occurrences, man's birthright, an immense inheritance from God himself that the claimant hesitates to embrace and in most cases downright refuses to embrace.

Consider the present-day mythology society chooses to entertain and be entertained by, the blockbuster movies, riveting sci-fi novels, and all-engrossing primetime television programs. They enwrap us with their storyline, amaze us with their computer-generated imaging, bring to life the Gods of Olympia and of Egypt. We identify with the Jedi master who bends the wills of the evil villain with his Jedi mind tricks, with the young majikian waving a wand rendering himself invisible to escape the fire breathing dragon or the Superman stopping an oncoming train to save a love interest, all of which are modern-day re-enactments of past myths that inspire us to perform everyday acts of triumph and astonishing feats that are no less awe-inspiring

then what we ingest from the big screen. Those last few pushes past muscle failure during an intense workout, the accomplishment of a goal that was least expected of you, the bending of wills of a board of trustees into taking the company into your more profitable direction or that vigorous ascension up that oppressive socio-economic ladder and breaking of the tyrannical glass ceiling of miserable poverty, even the first few steps of a newborn infant who is well on his way to marathon running and the firefighter who out of the smoke and flames appears with a pregnant woman in his arms.

Are these not indications that deep within the bowels of man lie dreams to be better than he presently is, that these dreams may be more than mere fantasies but tutorial visions meant to propel him to the next phase in his evolution, all the way to God who is the Master Majikian above all?

The conceited atheist and the religious dogmatic have no sound argument against the Majikian. Both are on the extreme ends of the pole of truth with Majik triumphantly entrenched in the middle. Reality is obviously more than what meets the eye. Majik lives in the power of your mind, the generation of a current which is the vision that will follow the path of least resistance in order to manifest,

whether part of the path or circuitry involves one's self or another or the necessity to shape and mold circumstances and situations to fulfill its program, it shall not return void to its originator.

For the Universe, we occupy my friend is in intelligent one although a consciousness not as evolved as your own but aware well enough to fulfill the commands of its Master… you!

Those select few of ancient times were well aware of this fact but could not impart it onto the mass majority who had not the intellectual capacity to grasp such lofty ideas. So they kept their beliefs secret amongst themselves, used it for and against the masses and hid clues of their truer beliefs in the very Holy books they preached in case any among them should awaken he or she would have a starting chance at a grand career in the dark arts.

Chapter Two

Majik and the Evolution of Consciousness

Consciousness and one's aptitude for performing feats of Majik go hand in hand; in other words, one's degree of awareness corresponds directly with one's Majikal abilities. The deeper the conscious the greater the Majik with less effort.

Take for instance when you were a child, in fact, think as far back as you can remember. There was very little of which you were conscious of. For you had yet to become conscious of tax returns, you had yet to become conscious of the profound philosophical questions life beckons, you had yet to become conscious of the agonizing heartfelt pain of losing the woman you love to another man, you had yet to become conscious of the thrill and self-satisfaction standing up to a bully exudes, yet to become conscious of the challenge Algebra 1 would be to your mind and grade point average. Just like you had yet to become conscious of the tumultuous, volatile political climate you would be living in.

But your awareness of these things came with time and maturity. Your capacity to understand grew and as a result your perception intensified. Reality began to unveil more of itself to your senses.

Because indeed a man reads a book in his late teens and believes with his heart that because he was so captured and riveted by the notions proposed therein, he believes due to the hours, days and weeks he has spent pondering, reading, discussing, even proselytizing its issues that he has gotten all that can be gotten from it, that he has squeezed every drop of nectar from the orange….until he picks up the same book at 36 years of age and thumbing through his old love comes across a thing that makes no sense to him at this point in his life, inconsistency in its logic that went unnoticed years prior or he sees brand new connections of which he thought he understood with all surety. He now gets what the author was truly trying to express to the reader. He hadn't had it wrong the last time he read it, he just didn't have it all.

This very human experience mentioned above should illustrate to us that it is our awareness that broadens and deepens and each depth it drives bestows a greater power. Only with a deepened consciousness and progressively greater awakening can a man or woman take advantage of and put to use Majik. For she hides herself from the

elementary, primitive mind. The adept and the common man live within the same reality yet the common man experiences only a portion of that shared reality. The two are dining at the same massive table overrun with delicious gourmet foods from across the world but all the Goyim can see and smell is the bread and white wine. He remains unconscious to the higher facets of reality.

Hence this book is destined to be among those books mentioned earlier in this writing, its full comprehension will not be appreciated by most until their later years in life.

The mind must be exercised deliberately in order to accelerate the evolutionary process of the consciousness. This is what the mysteries (secret religious ceremonies) are meant to accomplish. A Maje of a certain level of consciousness doesn't need to go to the lengths a Maje of a lower level of consciousness may need to in his spellcasting or operations or gnosis. The former can accomplish the same feats of Majik with less effort. But what exercises of the mind cause such conscious evolution?

Meditation and its various forms are one way, in fact, this is one of the benefits of gnosis or the different gnostic states and modes. Another exercise is the pondering of heavy very deep philosophical questions. Introspection also,

unearthing the contradictions between one's actions, emotions, thoughts, and beliefs. And squaring them, cutting the proverbial fat from the meat. Catharsis, unloading, unburdening one's self of guilt and complexes derived from past experiences. Retro Majik is good for this, it entails going into your mind and reliving a past pain then mentally reconstruct the memory the way you believe it should have gone or simply the way you wished or wanted it to go.

It is also cathartic to express those things you've built up a complex about under safe circumstances you retain control over. Sympathetic Majik may be effective for this purpose. It is the utilization of effigies of the subject surrounding your complex along with mock enactments thereby expressing on a small imitation scale what he/she cannot on a large reality scale. *"I do for play what I cannot do for reality with the dedication as if it is real."*

Learning and studying new fields of knowledge, new hobbies, and endeavors. Putting one's self in unfamiliar situations will bring out new sides of you, calling upon untapped potentials. Challenge yourself by doing for a time the opposite of that which you are used to doing, of that which is natural for you, which comes easy to you, until you are satisfied you have assimilated to this new way of doing things.

Then return to your nature if you so choose.

All of this will grow and expand consciousness. Now how do you know your conscience is evolving? Are there any tell tale signs exhibited?

Your spiritual experiences, (because conscience is spirit; When God says he blew life into man he was not referring to oxygen, he was referring to consciousness, awareness; for all creatures were given the gift of oxygen) makes an excellent barometer.

Dreams, those mysterious half-lives we transition into upon being overcome by sleep. They seem as real as this reality we experience during our waking hours; at least while we're in them. *"While men are alive they sleep when they die they awaken"* is an Islamic saying fitting for this subject we're tackling.

The symbols, metaphors, and analogies of a dream always seem to have a much greater pull on our curiosity then their waking life counterparts, meaning those things in a dream are much more puzzling, mind-boggling and bothersome to our souls then the strange symbols and fairy tales we encounter in real life. Although we may not recall the details of a dream we've awaken from only moments ago, something of it stays with us, a lingering sense of the

overall crux of the dream haunts us, usually still resonating with us throughout the day. Or take the ridiculous metaphoric set of dream events that occupy our minds as we sip hot steaming coffee from a Styrofoam cup while in the break room at work. *"What was the half pig half cow trying to tell me when he kept yelling"; "you're the Anti Christ, you're the Anti Christ!"*

Some dreams we don't directly participate in, where we seemingly watch events unfold before us without our involvement. Some only dream in black and white without color. Sometimes the participants in our dreams don't speak with words but telepathically communicate their messages. Some awaken from a dream only to realize they are still in a dream, then awaken again from that dream only to awaken to another dream within a dream until we finally arrive in the here and now. Some become aware they are dreaming while in the dream. Some can manipulate and control the dream they're having. Just as the adept can manipulate and control events and occurrence within this realm. In fact, the two are correlated, the more adept one becomes at lucid dreaming the more adept he or she becomes at acts of Majik in this realm, the only difference being is the immediacy of results due to the much much slower vibrations of this realm.

Some can devoid themselves of a form becoming an impalpable formless void of awareness still retaining the knowledge of who they are, of their worldly identity. Some can go where they will in their dreams, some can break the laws of physics at will in their dreams, some can enter the dreams of another deliberately and retain the memory of such upon Awakening. Some can retrieve information unavailable to them in wakeful Life.

All of these denote different levels of consciousness giving credence to the ancient Egyptians depiction of the Consciousness as an onion with its many layers and their insinuation of the title given to their initiates of Djedi, one who is aware or awake.

Another spiritual experience indicative of one's degree of Consciousness is the experience of the Higher Self. Your Higher Self will look like an enhanced supped-up version of yourself and usually in the first encounter via a dream or trance vision begins with you walking up behind a curious individual whose back is turned towards you. As you approach closer this one slowly turns his head to face you unveiling a slight smirk or smile on a face you immediately recognized as your own attached to a body taller and larger than your own. You react as if you've seen a ghost with a

mixture of tremendous awe and terror at which point you awaken suddenly. And sitting up in the bed with your mind racing with thoughts, *"What was that?, Who was that? It was me, but not me and why did the experience give me the feelings I felt?"* This is the vision of the Higher Self.

Upon your next encounter with your Higher Self, he/she will tell you a name by which you may summon him. But be mindful that evoking or invoking your Higher Self is not at all like evoking or invoking another entity of any sort. Other entities you can summon whimsically, such childish games cannot be played with your Higher Self, there is no crying wolf with him. It is only in the direst moments that one should summon the Higher Self. For although He is with you always, a constant awareness presence of His would disturb your evolution and disrupt your growth.

Next, you'll have a meeting and a conversation with your Higher Self. In this meeting He shall instruct you as to your life's mission, your purpose in life, such will be the part you are to play in the Grand Scheme of things. You may not be able to recall all that was discussed between you and He but you will be presented with opportunities within your daily life to live out these briefings. Urges and inclinations to act and to make certain decisions will also present

themselves. You may not remember the details of the briefing but He will make sure you remember the meeting its self.

Your Higher Self will deliberately wound you at the end of the meeting leaving you to awaken with a healing scar whose painful sensation you will still feel for a few hours. It is termed a Stigmata, a healed wound that was not made during wakeful hours. This is meant to help you carry the memory into wakeful life for the Higher Self meeting takes place at very deep levels of the subconscious mind. It serves as a reminder.

The Spiritual experience of Rapture is another hallmark on the path of Awareness evolution. Jacobs wrestle with God is an analogy of this experience. Here the initiate actually wrestles with the spirit form of his Higher Self, as one would wrestle another human, while in a trance-like state. Sometime during the struggle one's body and muscles will lock up, paralyzed. Next, the body will be bent and contorted in a manner not thought humanly possible. Through the entire ordeal, one will be in a state of ecstasy and upon release, he/she will feel a euphoric feeling washes over him or her. Joy and elation will be his all that day. His body will feel limber and invigorated as if he'd been to the world's

greatest chiropractor. No damage will have been done to his or her body.

Before all of this can be accomplished one must make a most earnest heartfelt petition to see, hear and touch his/her Higher Self through a prayer of desperation. It is a spiritual desire and yearning of the uttermost urgency that is to be exhibited on your behalf.

Recognizing the role your Higher Self has played in your life helps to build the necessary, love, admiration, and appreciation needed to fuel your plea for a meeting. He can be seen intervening in times of trouble, He is the Providence you sense in your darkest moments, he is the one who has laid the bread crumbs that lead to whatever your current level of consciousness is now. He is your Guardian Angel.

When St. John said in Revelations, *"I was in the spirit and I heard behind me a great voice as a trumpet… And when I saw Him I fell at His feet as if I were dead,*" or When Prophet Muhammed, P.B.U.H. saw the angel Gabriel every which way he turned and seizing him from behind He commanded Muhammed to *"Igra"*, Read! Or when Christ was *"lead into the Wilderness by the Holy Spirit to meet Satan"* who challenged him on three fronts or when Saul was on the road to Damascus and was knocked from his horse by a being of light or when Krishna came to Arjuna in Bhagavad

Gita, all of these have this in common, a Higher Spiritual Being coming to deliver a message and a mission to a Lower Material Being.

Our Higher Self is a portion of the 1st Cause, uniquely tailored to our personal specifications, The Divine 1st expressing Its Self as our highest potential for we are an appendage of that 1st; an extension thereof; for all of Creation is nothing more than the 1st interacting with Its Self in different forms. Thus the 1st is the only reality while all else is Maya, Dunya, an Illusion.

This takes us into the next indicator of one's Degree of Consciousness. *"The Perfect Black…"* Osiris was called Lord of the Perfect Black and the initiates of the Ancient Egyptian Mystery System was bestowed with Osiris as a sir name only after having experienced this Perfect Black.

What will make you know what is the Perfect Black!!?

Ahh! It is the only true knowledge of self, all others are mere sheaths to be put on at a point in time and to be taken off at a point in time. It is absolute nothingness yet absolutely everything. Most dread the very mention of it, but it is only because we identify with our sheaths with our titles, with our shapes and forms, with our race and culture, with our cars and clothes, with our past and present, with our sign and

planet, with our pain and pleasure. But this is our origin, the Mountain from which we were hewed, the palace from where we were plucked. For if one were to have the pleasure of waking up here an endless feeling of power would be felt with an assured sense of all-knowingness, peace and tranquility and contentment beyond anything imaginable by the mind the need for nothing for no one, the very recall of it brings tears to the eyes. For its darkness is absolute not at all like closing one's eyes or the absence of light in a dark room buried somewhere underground. It is blacker then all these combined they all are false and impostors of this All in All blackness. For it has only one resister in all of creation that possesses the power to draw us from Its irresistible grip and that is Love, Selfless Love…pure love.

Chapter Three

Diligence in Majik

What man or woman has not had an epiphany, a grand idea a Eureka that sudden flash of an answer to a curiosity alluding you for some time, but for all your *"supposed elation"* you yet and still fail to record the damn thing.

An idea that if pursued would bestow upon him the riches and notoriety he had always dreamed of, that his ego believed was due to *"a man of his caliber."*

But the warmth of the bed and covers was so much more preferred, the TV talk show on cheating spouses, indulgences like ice cream and internet porn hold hostage his attention. *"I'll remember it,"* he excuses himself, *"I'll write it down later"* disregarding the numerous times he's made these same such hollow promises to himself while lounging on this very same couch, with these very same group of friends, whose Starbucks banter he just can't seem to pull away from.

What is life if it isn't initiative, the will to work, if I can't put down the controller to my Xbox or my ever indispensable smartphone with its distracting, timeconsuming, unproductive Angry Birds app., knowing there is something of importance I have obligated myself to. I promised myself I would get started just as soon as I had time on the dream I planned out in my head but became too complacent to disturb the comfort of my current routine, to initiate the Big Bang to my own universe.

All this is not an argument against the joys of technology or the Peace of rest and relaxation or the comradery of casual

conversation with a circle of friends but these pleasantries of life are cheapened if we have not felt the gratification of laboring toward a goal and the satisfaction that comes with completing that work.

Inconsistency, procrastination, and laziness eat away at self-confidence and kills the self-esteem as water and oxygen are to the human being so they are to the Maje. Any carryover of such stifling qualities into the realm of majik shall utterly destroy the fool who enters with half-hearted efforts, without a solid ego and strong personality elements of the art will destabilize the mental state of a novice. If he suffers from the diseases of inconsistency, procrastination, and laziness then it is best he constrains himself to the World of the common folk and dare not to enter where his very Soul would be in jeopardy because effective Majik requires that spells cast be fed consistently. In accords with the association principle vibration Illustrated in the playing cards by the flower stem in the hands of the Four Queens all things have a life cycle all vibrations go through these four phases

BIRTH ADOLESCENCE MATURITY OLD AGE

A spell is no different as the life cycle of an infant or an embryo, it needs to be fed periodically and regularly or else it will die. Now there are those of the Majik community who

say a spell is noncumulative, meaning no matter how many times one operates exactly as one operated initially he/she can never increase the probability of the occurrence/desire. This is correct to a degree. Energy can be added to the spell until it rejects the energy garnered during the operation. Meaning the Maje goes to operate (at the same place and time using the same mode of Gnosis) and the Gnosis state becomes more difficult than it originally was to get into or reach, he then has the choice to either use a more powerful mode of Gnosis or use the confirmation and calculate the arrival/manifestation using Saint John's Equation or consult the tree of knowledge to determine if the probability of the Prime Desire can be raised by way of manifesting a more probable occurrence (Sub Desire). The Tree of Life can also be consulted if the energy of others need to be employed toward the manifestation of your desire.

Such are tools for establishing the logistics of your spell. It is, thus, imperative that one dedicates himself totally to his craft, that he be meticulously thorough with every spellcasting utilizing any and all tools available to mold and sculpt the desire vividly, to pinpoint and map a path of least resistance for his desire to navigate.

Majik is a life of work and toil both physically and spiritually, both intellectually and emotionally in fact one would be hard-pressed to present a way of life more demanding. Like all other endeavors done out of passion and love, rewards and fulfills, perhaps even more so with this art of Arts, Science of all Sciences...Majik.

Chapter Four

Astrology and Majik

Since the dawn of time man has looked upward transfixed by the fixtures adorning eternity's limitless space. Who can stand on a hill in the prairie or a roof of a high rise or a rocky jetty protruding into the ocean and not feel swallowed and engulfed to the point of vertigo and dizziness when gazing into the starry sky? Why do lovers deem it romance to hold each other on a cool night while looking up at the stars entertained by the twinkling, motionless, shooting, moving lights, as if they alone are standing before the Court of the Almighty awaiting judgment? When we look up we become children once again and those who don't look up are hard and grumble about life's fleeting business forget and take for granted the aeons dangling just above their

worry filled heads. Ask the prisoner of solitary confinement the effect a clear starry night has on him after being locked away for years, no longer looking upon the steel cuffs that bound him with a hung head but the shiny boundless above with a dropped jaw.

These perfect points of light guide voyages at sea and treks on land. We imagine they control the destinies of Nations and the fates of men, we see it appropriate to trace from them the likeness of animals and monsters our watches and clocks and calendars mimic the monstrosities that stomp across the infinite darkness, twelve this twelve that, twelve months of the year, twelve zodiacs, twelve hours in a day, twelve hours of night divide up forever as if it were a block of cheese or loaf of bread. And even the days of the week cannot escape the influence of the seven planets they were named after, Sunday for the Sun, Monday for the Moon, Saturday for Saturn each a God to the people of ancient time, for the Sky was Man's original heaven, before he made it some otherworldly dimension, before his science and reason told him the dark was sprinkled with an infinite number of planets such as his own. Now it is heaven he is hellbent on conquering.

Astrology in our *"intellectual, sophisticated"* era is seen as some sort of junk science, a fun psychology that we must in no way take seriously. Yet these same people tippy-toe around Astrology's edges turning their celebrity magazine to its horoscope section with the faint hope of gaining an insight into their own future or a resonating description of their lover's characteristics. They feel a comradery with those of the same sign as most people are familiar only with their Sun Signs and not the more informative aspects of Astrology. There is a reason why no secret society will accept an initiate without knowing what was the zodiac sign coming over the horizon while the candidate exited his mother's womb. But to not digress any further; this 5,000year-old profiling system doesn't seem to be exiting popular culture anytime soon seeing how insidiously intertwined it has become into our intellectually advanced society.

While Majik represents free will, Astrology represents the will arrested by Fate. Exactly how Majik and Astrology relate remains a mystery to most though both be labeled occult. Astrology tells the Majikian where to point his/her wand, when should one operate or cast a spell, what needs to be countered and what Astro-energy will compliment or hinder a specific or particular operation.

In the Bible, the three Maji or Majikians follow a star that led them to the baby Jesus. Now, let us suppose an old friend comes into town to visit, he calls you from his cellphone and says, *"Hey Brian I just dropped into town and was hoping to come and see you."* You say, *"Yeah sure, why not, I'll give you directions, better yet do you see that star in the northern sky well just keep following it and it'll lead you right to me."* Now, who believes Brian's friend found Brian based on those directions?

By monitoring planetary alignments the three Maji basically ran across Christ's natal chart which shows what planets are in what houses, the patterns these planets make in regards to one another and what zodiac sign was coming over the horizon and what sign was descending over the western horizon. A latter-day GPS told those wise men a child with extraordinary powers and a mighty destiny would be born at this time and in this place. Gold, Frankincense and Myrrh represent, desire, wisdom, and power, the three requisites for majik. These three along with the analogy of the *"followed Star"* are intended to impress upon the initiate the inter-dependency of Astrology and Majik. One must become adept in both if he is to succeed in his endeavors.

Here Majik steps in to bully fate. A man may try everything in his power, including employ Majik to change his station in life; born into a generationally impoverished family all of his hair brain schemes to free himself financially or otherwise are of no avail, unconscious that he has written this destiny for his lower-self as his Higher Self. Astrology or the mastery thereof is the missing ingredient in his craft. His Majik remains limited without it, but with it, fate becomes just another piece of furniture easily moved and rearranged by Majik's strong arms. Majik and Astrology are inseparable in the execution of a successful operation.

Let it be stated that although the adept has emancipated his own will from those celestial energies of the zodiac the majority or masses remain slaves bound to the heavenly bodies. This being the case he alone cannot conjure enough energy to commandeer the wills of all those souls who will be necessary for his will to be done, except if he 1. Works in a group (and even this is chancy and thus need the assistance of the stars) or 2. In the very rare cases wherein adept has evolved into a homodivinoid like Christ and hence has the ability to control and manipulate enormous amounts of the ether.

Astrology thus remains indispensable to the Adept's Craft. But how is it to be used and implemented into his

work? 1st he'll need an ephemeris, a book detailing what planets will be in what sign on what date. Very powerful Majik can be done when either Scorpio, Pisces, or Aquarius are aligned either with the Moon, Mars, or Mercury and Venus for sex Majik. These are especially powerful when any of them move in either your 8th, 9th, 11th or 12th house of your own natal chart. Spells cast at these periods are imbued with lots of power, more so if they are done as a collective and if the participates are on a fast and even more so on a Full or New Moon after, midnight, hours before dawn. Each factor plays a part in eliciting additional amounts of energy, strengthening the Maje's will.

With the performance of Majik practical common sense steps must be taken toward one's desire, for instance if one caste a spell for money he or she still must negotiate the deal, solicit the product, meet with the loan officer, buy the lottery ticket, sell the property, be at the right place at the right time. Do or perform whatever the practical everyday act that will be the form in which his/her desire will manifest.

The question is, when should he invest or do a thing and are there any opposing energies to his will? For remember he cannot be responsible for the Wills of those individuals who are to be implemental in the processing of his desire. So

it is at this point where he employs Horary Astrology, where a chart is cast at the time a question is asked which is then compared with the questioners birth chart giving insight into the curiosity of the Maje; should he or should he not proceed forward, will his endeavor be successful or not if he does proceed and when should he proceed to elicit maximum success, for as King Solomon said in Ecclesiastes Ch. 3:115, *"To everything there is a season and a time, to every purpose under the heaven, a time to be born and a time to die, a time to plant and a time to harvest…"* Such words allude to spell casting, though the goy perceive not. For their souls are too young and fragile to withstand the weight of such implications. Thus such words are food only for the Elect, the Adepts, the salt of the earth.

Due to the Moon's effect on the Nervous System, the Adept may want to consider Operating during the New and Full Moon phases using the Leviathan in concert, which is the charging of the nervous system, music of high pitch sound charges the nervous system and can be implemented into your Operation. As an Adept, you will want as much energy as possible to go toward your vision as the more energy the quicker and more abundantly will he or she manifest.

Part of the ability to place a curse or hex on someone lies in knowing in what house and under what sign does the Moon fall within their natal chart. Because it is here where our life challenges are set. The maje or witch knowing this information about the person's life challenge would design a vision embodying that challenge. So if it's abandonment issues the spell or vision should be their most cherished loved ones abandoning them as opposed to a car crash or lose of wealth.

Note: High tones charge the nervous system, sounds like sirens, fire alarms, babies crying causes the nervous system to secrete adrenaline norepinephrine and cortisol all of which are responsible for the fight or flight response. Ex: Classical Music or speaking in a tenor voice.

Low tones discharge the nervous system, slow, repetitive rhythms with drums and upfront bass slows the nervous system zaps it of energy, lyrics with Cadence along with percussion's creates an energy vacuum in the nervous system. Ex: Rap Music or speaking in a baritone voice and due to its discharging power the baritone voice can be used to quiet an unruly class of children even control the mind of would-be aggressors. Mental fatigue and emotionally drained are its effect on the listener.

Chapter Five

Sex and Sex Majik

Sex is one of life's greatest mysteries and greatest pleasures. Inside of man's sexual urges lie the drive of mankind, humanity's will to live, to be remembered, carry on the species, to push toward an unknowable ultimate purpose set in motion by an UNKNOWABLE CAUSE.

The sex energy is stirring, activating energy, the most primal expression of will and desire there can be. It epitomizes the hidden universal force that initiates change and maintains the occurrence of that change through *"ALL"* Existence.

Hence sex by default is an act of Majik with its stirring of emotions and its consequence of procreation, the investment of dead matter with a living soul; sex in its entirety fully embodies Majik. It is a reenactment of the 1st Cause, of the Big Bang, repeated in bedrooms, tents, shabby hotels, luxury apartments, even parking lots and sandy beaches, mop closets and stairwells, a top of kitchen tables and city parks the world over.

Even with all of this do we truly know how powerful and special the act of sex and the sexual energy really is? Are we aware of its wondrous potential? I dare say not. For if we were would we not regard sex as sacred even holy and not whimsically waste away our sexual energy in the most demeaning, lowly and degrading manners with the only purpose of gratifying the selfish lust of the participants involved as the ultimate end? In this way are we any different from animals? And since animals don't seek to sexually demean their partners psychologically, are we not lower than animals?

One has only to look at the vulgar, depraved pornography that reigns over the sex industry, the majority of which focuses on humiliating and demeaning the female principle. Part of the reason for this culture of sexual sadism is prudery masquerading as sexual liberation in order to make ourselves feel intellectually progressive and principally advanced. When more often then not the sex is being used to pacify a void and feed a neurosis created by our morally depleted society. As a way to give expression to our pains and fears because in most cases we feel we have no control over our lives. Rape and child molestation are extreme versions of our primitive attitude toward sex. Just

another depravity created by our spiritually bankrupted system.

Take for example sexual education in our schools, arrested by religious dogmatism, students are not taught how to sexually please and be pleased. How to communicate body to body, mind to mind. But rather given a hard monotone clinical version of sex with the greatest moment two human beings could share with one another reduced to a series of facts on anatomy and physiological reactions. No different than automobile and rock study. Leaving it to the internet and parent's stole away porn collection to be the teachers of humanity's next generation.

Why is the sanctity of the human body, especially the female body, seen with disgust and disdain for this is evident from the words we use to insult one another like, *"Fuck you"* speaking as if sex is not an act of pleasure and an honor but instead something to be ashamed of, equating sex with contempt. Or *"you're a pussy"* usually referring to a male who's seen as lacking courage, a statement that makes genitalia, something that is supposed to be held in the highest regard, synonymous with cowardice, one of the most deplorable of human characteristics there is, is the womb of a woman from which lives like Harriet, Gandhi, Martin

Luther King emerge, deplorable as cowardice? If we say not then the question becomes, why do we as a society equate the two as such? Or take for instance the calling of a male, considered to be mean-spirited and harsh, a *"dick."* Such a correlation diminishes the fact the penis is a thing meant to give pleasure not to bring harm and pain. The mean-spirited person is meant to cause pain not the phallus of a wellintegrated, self-realized man. We usually say what we mean, consciously or subconsciously.

It is no wonder sadomasochistic sex is deemed normal by the majority of male and female Americans. If a person believes they deserve pain and humiliation, which is fundamental in sadomasochism then conversely they don't feel worthy of life's joys and pleasures, regardless of what they may profess to the contrary. Thus according to the law *"as a man thinketh so shall he be"* life's joys will elude them until they change their internal Constitution. And since every sadist is a masochist deep down within, the above holds true for them as well.

In ancient times sex was used in religious ceremonies. For it was understood that spiritual sex carries the power to exponentially multiply the power of the participants and their vision, spiritual sex is intensely more intimate thus

strengthening the psychic connection and abilities of those involved.

Not only is the above a true experience but spiritual sex also increases you and your partner's self-esteem and selfconfidence due to the invocation of powerful, positive archetypes.

An example of positive spiritual roles is the analogy of the high priest and holy Temple of the Old Testament. The temple is symbolic to the woman and the inner sanctum containing the holy of holies is the womb of a woman. Since none can enter without being pure and clean only the high priest is allowed and since none can look upon the holy of holies and still stand, he must tie a rope to his leg so his body may be extracted if he so happens to fall faint from its power. Here the high priest is symbolic to an erect phallus that falls dead or flaccid upon climaxing during sexual intercourse here we have an allegory that transmutes a primal crude act into a sacred awe inspiring ceremony. And who would disagree that a good climax is indeed a holy of holies experience? In fact, during orgasm Saints and Sinners alike frequently scream for God. Again we usually say what we mean consciously or subconsciously.

In the final analysis, Sex Majik holds the power to uplift and Enlighten at the deepest levels of our inner being. But in order to achieve this, the practitioners of this art must cast off their carnal mind and transmute them spiritually by way of ascetic practices. Edifying one's self-image and boosting one's self-esteem by associating ourselves with powerful, positive, and meaningful spiritual archetypes. A greater appreciation will we have for ourselves, our bodies, each other and for the incredible Divine Act of sex itself.

So what is Sex Majik? How is it performed? Sex Majik is the utilization of sexual energy for the purpose of influencing events, and most importantly your own psyche. How it is performed goes as follows:

Due to the deep state of Gnosis, a trance-like mental state, sexual stimulation propels the mind into, it is some Adept’s first choice for casting spells. So strong is this Gnosis that the obsession it creates within the person, most times outpaces the unseen mechanics the energy of the spell has set in motion. Meaning their desire for the idea to manifest will be stronger than the actual manifestation process. Hence the Adept becomes extremely frustrated, impatient and emotionally distraught with the process. In this way Sex

Majik has its greatest effect on the psyche. For this very reason, it is strongly advised that the Maje NOT! I repeat NOT use Sex Majik to curse or hex. He or she could be turning themselves into a psychopath or serial killer. Because he/she will stop at nothing to get what they want or spare anyone or anything while under the influence of a spell cast via sex Majik. The sex energy is just that strong as to hinder reasoning and moral judgment insidiously.

In order to get the maximum effect, the Maje observes a lengthy period of abstinence from all sexual stimulation and release. This period can be anywhere from a few days to a few years according to what the Adept feels is necessary.

When the time comes for the actual performance or spell-casting or operation the Adept performs *"Kareeza"* a technique that entails sexual arousal of the Adept. However, instead of climaxing and ejaculating he or she pauses stimulation by holding the breath (assist in forestalling ejaculation) until erection or arousal subsides. At which point the sexual stimulation is started all over again. This cycle is to be repeated as many times as the Maje can stand.

Sitting in a Lotus position (legs bent at the knees with thighs widespread while sitting on buttocks) also forestalls ejaculation. This is called Yab-Yum tantric sex and is the

hidden meaning behind the Baphomet metaphor. A goat sitting in Lotus with a caduceus sticking up from his pelvis representing the erect phallus. And his head symbolic to the Tree of Life, starting with the Light Between the horns as Kether and ending with the goat's beard as Malkuth.

The mark, name, and number (see Ch. The Meaning of the Beast) of the desire is to be drawn on the forehead, above the genitals, and on the back of all parties participating in the rite. The Name of the desire should be chanted during sex. The Image should be gazed upon, at, and past the moment of orgasm (this is quite important) until Gnosis has faded and one's usual state of mind is restored. Because whatever one allows into his mind during the state will be apart of the manifested desire in an unpredictable manner.

Sex Majik can also be used in binding spells. To attach someone to another or to an idea. The exchange of bodily fluids while in the Deep state of sexual Gnosis creates endearment between parties involved. Love is literally *"made"* or established between them.

Invoking deities can be accomplished very easily during sex Majik. The deities image, characteristics, history, and all else should be studied prior to performing the rite. The only thing the Mage is doing here is tuning into the information

that's being stored in the ether. For he should know the radio station he is trying to tune into and this is accomplished by study and research. The Adept may even dress as the deity during sex while verbally invoking the deity into his or her partner. The Adept will know the operation was a success once they feel themselves moved to the side within their body and mind. Usually, you feel yourself sequestered to the left corner of your mind and the qualities of the deity will be felt within the body and mind. Panic and or saying familiar religious prayers will banish the deity and bring one back to normalcy.

This prayer should be of the religion the Maje truly believes in or has believed in at one time or another. For example the Lord’s Prayer or the Fatiha and Falaq of the Quran. Such serves as the Adept's cable-tow and anchor in times of spiritual peril. If all else fails one's Higher Self will restore order. The deity can also be questioned by a party standing by, as a spirit is channeled they are ready to record all replies.

Group Sex Majik or ritual orgies are very powerful. However, they require an equal amount of preparation on behalf of all participants. 20 to 30 days of purification must be done since it is easy for those born and raised in such a

morally decrepit Society, to mentally sink into the filth of mainstream porn upon hearing the word orgy.

One should fast during the daytime, abstain from sex, foul language and images. Religious, spiritual, and philosophic material must be contemplated. One is to practice the most Pious of characters and do almsgiving. Pray and atone for past misdeeds to whichever God you believe in. If possible practice meditation, yoga, and Tai Chi. Abstain from unnecessary worldly Endeavors. The human body should be seen as a temple a thing worthy of admiration and reverence. For one is not about to have sex merely for one's own selfish pleasure but for a higher spiritual purpose that neither animal nor man can touch, experience, or enter. Only angels and gods is this for. The human and the animal must be shed before coming amongst angels and gods.

Mask and face paint can be worn to maintain anonymity within the group. Costumes and robes can also be employed.

The tantric group sex technique Panchatatva (The 4 Elements spirit being the fifth) requiring that a circle of male and female Adepts have sex while a priestess is positioned in the circles middle. All including the Priestess calls forth a deity she will Channel or the group Spirit of the Gathering, the collective mind of the group.

A High Priest or Priestess is to oversee the operation and is responsible for restoring normalcy and keeping order, and banishing the spirit and maintaining the well-being of the Medium. The High Priest must be adept in the art so as to keep the spirit under control.

Here we see the necessity of the 40-day purification period. The Gathering cannot take the chance of someone's darkside poisoning or sabotaging the operation. Because not only is the operation at stake but the souls of all present.

Fearful are we of the spirit realm because of the possible harm engaging in such matters may do to the soul yet we do not fear the harm engaging in the debauchery, the endless stream of TV and video game violence, the vices of drugs and alcohol abuse, the degradation of women, the systemic racism against darker people, the culture of political corruption, the economic warfare waged against the generationally impoverished, the rape and molestation of children victimized in child pornography, for-profit sanctioning of mass incarceration, the looting and wasting of the Earth's resources, the religious and ideological persecution of those holding contrary views, the vile habit of backbiting and slandering friends and strangers alike, the idolatry of celebrity worship the idolatry of worshiping the

wealthy of our society, on a daily constant basis, in most cases we are the demons we fear, Nay far worse, for we are human beings with the Power of Choice.

Chapter Six

Entrainment Majik (Talisman and the Ether)

Entrainment means impressing one's thoughts and intentions upon a person, place, or thing. Here the main Laws at work are Rhythm and Vibration. All things are made up of strings, the very space things occupy is made of strings. These are strings of consciousness, conscious strings that serve as the source foundation or essence of which all realities are built upon and all matter, molecular, atomic, and subatomic derives out of and is commanded by. It is the Master building block for every realm. This mesh or network has been termed Tessellation, Ether, Mezla, Vril, the Prima Materia, even the Water of Life. The Ether can be seen as a net or mesh or field permeating all of existence. A web weaved by the 1st Cause Himself giving credence to the symbol of the Spider God or Anansi. The geometrical structure of the Life Tree is a *"Theoretical Model"* for this Web of Consciousness.

Hence when an Adept secures a deck of playing cards, that he intends to use for his Craft he must impress the cards with his intention (See Ch. Kard Practice). And his intentions

should include using the Kards as a vehicle for his Higher Self to communicate through to him. As he shuffles the deck he should have in his heart and mind and if so moved say aloud to him or herself, *"These Kards will only be used for Kabalistic and Majik purposes, Oh Higher Self speak to me and guide my Majik through these Kards."*

Remember the Kards are not the same for you as they are for the Goyim. To you, they are as sacred as the Quran or the Bible is to a Muslim or Christian. This is the intention you're impressing upon the Kards and overtime as you use them more and more for their intended purpose the vibration of the original intention will grow stronger and stronger allowing for more info and insight to flow from the Higher Self.

String Example

Talisman

It is by way of the science of Entrainment that Talismans are made. A Talisman can be made to counter astrological influences, the influences of other people's auras, to be a vehicle for a curse (carrier of ill intent) and to transfer an entity (Angel or demon, Good or Evil) to a place or a person. A Talisman like a Sigil can be used as a trigger for invoking (bring about within you) or Summoning before you an Entity. Intention can be impressed upon an object by blowing one's breath upon it, spitting upon it, by rubbing blood, semen, or any other bodily fluids. Intent can also be impressed upon Water or wine by way of bodily fluids. Entrainment is the science behind baptism, holy water, and ablution. The bodily fluid will carry the intention of the one from whom it derives and will influence the weaker vibrations of an object or person.

A Talisman may or may not be engraved or inscribed with a sigil, sign, or symbol. A Talisman's vibrational signal if strong enough influences the minds of others via the influence the Ether has over their aura. This is why a protection spell should be done preferably with the Adept's own blood, whether smeared on an object to make a Talisman which he holds somewhere on his person or he

washes his everyday clothing in the water he or she has entrained spiritually by spilling small droplets of his blood into the water. It's preferable he or she be in gnosis while speaking the protection spell.

Because it is the nature of vibrations to attract like frequencies *"He who has much more shall be given unto him and he who has little more shall be taken from him"* Bible. Hence the Adept will want to attract a particular energy and repel others and by applying techniques of Entrainment he accomplishes this.

Applying the Laws of Rhythm and Vibration meaning repeated incremental exposure to the stronger frequency of the Adept, a Goy or a group with little to no resistance can be put under his or her control either by way of being near to his aura or by partaking of his fluids, blood being the strongest carrier of his signal and thus the surest and quickest way to gain control over another.

Acceleration of one's evolution of consciousness increases the strength of the vibration emitted by the individual.

Chapter Seven

The Science of Egregores

Most are unfamiliar with the idea of *"Egregores"*. However, if we are familiar with terms like group mind, mastermind, or collective unconscious and the like, then one at least has an elementary knowledge of egregores.

Whether they exist prior to a group forming, frozen in some sort of Akashic state or are only brought into existence upon the formation of the group, remains in question. What is for certain is that egregores take on lives all their own. And as any other life form will do all in its power to preserve itself.

Egregores are the collective psychic energy of a group, demographic, or organization. Though egregores are natural by-products of the aforementioned, the Majikian deliberately creates and controls such entities which they program with specified purposes or tasks. This collective psychic energy is both conscious and intelligent.

Religions, Companies, governments, agencies, racial groups, political parties, genres, class, couples, families, etc. All create egregores. Egregores communicate with one another and hold hierarchy over one another. Hence an

egregore may contain subordinate egregores within it. Any one person plays host to multiple egregores, like legion in Mark 5:9 of the Bible. As one activates the others lay dormant, depending on exposure to a corresponding trigger or stimulus. This is why a person of one type of character and demeanor will suddenly display an opinion, quality or behavior contradicting their usual personality and professed morals. Egregores are the cause of cognitive dissonance.

Such as the liberal progressive who normally is not racists but when faced with a policy that establishes true equality or questioned on the systematic racism of which they're a benefactor of will espouse the most neocon passively racist logic. Their racial egregore senses a threat to its privilege and life. Thus lashing out and defending itself through its host who need not be of that race to play host to that particular egregore.

Just as the self is an egregore built of various beliefs, notions, experiences, thoughts, and ideas; the physical body is an egregore of the many cells and molecules that composes it. Humanity too is an egregore composed of racial egregores.

Egregores and the 100th Monkey Effect…

It is by way of egregores does the 100th Monkey Effect operate. Japanese scientist found that a new behavior practiced a hundred times within a tribe of monkeys (whether by a single monkey or multiple monkeys) would mysteriously transfer to a tribe of monkeys hundreds of miles away without being in contact with one another.

Phenomena such as these are possible because both groups are attached to the same group mind. This Collective Conscience distributes new information/ideas to all its members once that information's vibratory signature has been significantly raised. Those members who are the most sympathetic to the newly transmitted signal will enact the information first, like *"first appropriators"* in the world of business and commerce.

The egregore of a group can be channeled by its members through one of its more sensitive members. By this way, it can be spoken to directly and questioned for guidance and advise. Though egregores are composites of many minds coming together for one purpose they are still unique in character, and personality, even appearance, unto themselves. The evocation of an egregore means a complete take over or surrender of the Sensitive's personality.

Channeling is when the Sensitive is the only one in direct communication with the egregore and relays its response to a third party.

A school of fish, a flock of birds, a swarm of bees, a herd of sheep each acting as one body are all physical manifestations of egregores. The spirit of each group sharing information between its members.

An Adept is one who is skilled at controlling his perspective, in distinguishing the forest from the trees and vice versa, the trees from the forest. He is skilled at discerning spirits as Paul said in Eph 6:12 of the Bible, *"We wrestle not against flesh and blood but against principalities and powers in high places."*

Every group has a Sensitive apart of it. An individual who is the most sympathetic to the Group Spirit/Egregore then the rest. The Sensitive is the 1st to receive new communiques from the egregore.

Every group has a Weak Point, an individual who is most susceptible to an outside influence. This person usually has a grievance about something within the matrix of the group.

Every group has an Idol. A person who embodies all the group stands for and who is looked up to by the Majority.

In couples, these positions are unconsciously traded back and forth and taken up by each party under different circumstances.

An outsider can gain influence and control over the group and its egregore by implementing the Laws of Association along with other techniques of Majik.

Repetitive action breeds egregores. A Maje births and grows his egregore by feeding it his attention and emotion. The nature of the emotions from which the entity was birthed should be the same emotions its fed.

The idea of the egregore must be deep-rooted in the Maker's psyche before it can infect a sympathetic host. Symbols, mantras, talisman and the like work like thumb drives for computers carrying the virus/egregore. Allowing it to upload to the mind of a potential host/computer.

It may be best to consult the egregore through a summoning or evocation as to what links (symbol and mantras, songs, etc.) would best attract the most hosts/ vehicles and operate at optimal efficiency. Its program is its creator's intention, its life's purpose.

The Master of an egregore can communicate with his or her creation a number of ways. Dream and trances are two. Sortilege is another. Even by directly confronting the

egregore through one of its host. By talking with the host as if he is the egregore even if the host is unaware of the intent of your conversation. Reason and inspiration within the self also are avenues available to an egregore to get its message(s)to a person. This is usually termed *"your muse."*

The average individual can transition between the influences of multiple egregores or group minds in a single day. There are two main types of egregores, natural organics, and artificial organics. Of the latter, there are those deliberately made such by Majikians and there are those formed in ignorance by the fools who know not the forces at work. The natural organics are those archetype egregores existing prior to their human hosts. The naturals have dominion over the artificials. Some artificials are subordinates of naturals. Some artificials are subordinates of other artificials.

Chapter Eight

An Explanation of The 12 Rules of Majik

Majik is the science of causing effect via the Mind with little to no intermediary between Mind and Effect.

The following passage illustrates this principle in clear definitive terms.

"The 3 categories of Psychokinesis (Majik): Bio P.K., the influence on humans, animals, plants, and micro organisms. Macro P.K. is the directly observable, large scale influence upon object such as lifting a table into the air by conscious intention. And Micro P.K. is the influence on random systems or events that require statistical analysis to be observable" - The ESP Enigma (A Scientific case for Psychic Phenomena) by Diane Hennacy Powell, M.D.

Majik entails the manipulation of a mysterious force. A force that seems to be the foundation upon which all the other forces, gravity, sound, heat, magnetism, motion, etc., rely upon. It is the Master Force of all other forces hence the Master Control of all other forces. And though it seems not to be self aware to the point of Ego it is definitely conscious and sentient which is demonstrated by the fact it indiscriminately does what the mind tells it. It is a mesh of

consciousness weaved by God Himself, highlighted in past chapters of this book.

Though no doubt there are many more it is our task in the coming section to illuminate 12 properties of this Master Force that is the primary work material of the Maje.

The 12 Rules Elaborated

1. What I think I create is the essence of Majik.

Thought, the inner vision and voice (both of which are made up of the master force) of the mind are ideas destine to manifest into actuality. Without this understanding we are bound to hurt ourselves; thwart our own aspirations repeatedly without end. This axiom causes one to mind what he or she thinks and hence those things that influence his or her thoughts. In this way the Maje makes sure not to bring into existence unintended wishes, because he keeps an inner eye on his thoughts.

2. Majik is the transformation of energy from one

form to another.

A Master Force dictates the actions of the lower forces of physics, psychology, and biology. However self aware consciousness (ego or the *"I am"*) dictates the edicts the Master Force will divvy out. The Maje must learn what stimuli elicits what response and the ripple effects that response will have. Physical energy can have effects on the Mind and emotion and on other physical energies also. The mental and emotional can in the same instance have effects on physical things and vice versa.

3. The longer Majik is practiced the greater skill it bestows onto the practitioner.

Contemplating majikal theories without any intent to practice majik will attract chaotic events into one's life. It can even be argued half assed dabble into majik may be even worse. All should want to be the best Majikian possible. Majik evolves us, evolves the soul. In fact we cannot either practice Majik without being evolved nor avoid being evolved by Majik. For our purpose in life is to become superhuman and eventually God.

4. Work Majik through science not superstition.

Majik is a science but dedication of the heart makes it into art. Every Maje must put reason over emotion when practicing Majik or fall into superstition. Superstition is long running, unreasonable, irrational faith, or belief. The worst thing about superstition is that it eats away at integrity inconspicuously. Majik without reason maddens the mind and dirties the soul. Just as Majik without compassion hardens the heart and dirties the soul hence balance is the way.

5. A Majikian is able to induce gnosis at anytime in any place.

He must be prepared to activate his mind under any and all circumstance. A strong will to rid the mind of distractions that surrounds it and to focus its attention on the vision of the desired idea. Either unwavering laser like concentration or empty non thought trance like meditation. We recommend a familiarity be developed with both states of mind.

6. The change a Majikian wishes to effect outside of himself he knows he must first cause inside of himself.

A change of mind, thought, mood, ego states, and emotion is fundamental to any change the Maje may wish to effect. It is possible to want a thing but not know exactly what one wants and to intend otherwise is to unnecessarily frustrate one's own undertaking. Knowledge of self is a prerequisite to performing effective Majikal feats. To know how a thing effects you, what are one's limits and weaknesses. What are one's strengths. *"What must I change in myself, my thinking that is needed to effect the Majikal feat I desire."*

7. Focus on the outcome of the desire.

The present is a continuous uninterruptable flow into the future due to the fact it is the result of thought that has since exhausted its power upon reality. Hence a thought born within the matrix of the results of past thoughts has not the strength to compete with the already established reality. Focusing on the outcome

adds detail and context to your vision. In fact this is how your desire becomes vision. For example if one wants money let him or her envision having things and doing things that require the money you want. The less a desire is into the future the less malleable the targeted reality will be. Meaning the closer the vision is to present/current circumstances the more difficult it will be to realize that vision.

8. An act of Majik will continue to occur until willpower of greater or equal force opposes it.

Majik is a force like electricity, gravity, magnetism, even thermodynamics. Thus it possesses some of the same properties. Since Majik directly deals with the Mother force of all other forces. This rule is one of Newton's three laws of physics. In this way physics should be one of the studies of the Maje so he or she can determine what correlates with Majik and what does not.

Such study will highlight Majik's unique properties.

9. The lower the probability of an occurrence the greater the Majik necessary for it to occur.

All is energy. The reason we do Majik is to cause the unlikely to occur, things that would likely not occur without an injection of Majik. Everyone has a divine purpose that entails the fulfillment of all their dreams. By discovering this spiritual purpose assigned to them by their Higher Self, the realization of all their ambitions will seem effortless with little to no Majikal acts needed to bring them their dreams.

10. An act of Majik follows a path of least resistance in order to manifest.

Those persons and things that are sympathetic to the vibrational signature of the idea, desire, or vision of the Maje will be instrumental in its manifestation. These carriers or vessels of your idea may be the most unlikely sympathizers so seek not to always control the pathways by which your vision will manifest. For though the possible pathways are near infinite not all are equal in energy requirement. However certain pathways can be chosen over others one would only need to discern the energy required.

11. All things are the results of some form of acts Majik.

Creation itself is an act of Majik. The likelihood of something coming from nothing is 1 in millions, statistically. So existence is an an absurdity that's wholly ridiculous and unreasonable. In this way all things are acts of Majik with the qualifying differences being deliberate Majikal acts and unconscious Majikal acts, strong or weak.

12. Between casting and manifestation there is a time delay.

The energy output of a deliberate act of Majik encountering resistance of opposing forces creates a delay in fruition. Delay must be taken into account, one's operation/spell can be tweaked appropriately.

The 12 Rules of Majik

This lesson must be memorized verbatim.

1. What I think I create is the essence of majik.

2. Majik is the transformation of energy from one form to another.

3. The longer I practice majik the more skilled I become at majik.

4. Work majik through science not through superstition.

5. A majikian is able to induce gnosis at anytime in any place.

6. The change a majikian wishes to effect outside of himself he knows he must first cause inside of himself.

7. Focus on the outcome of the desire.

8. An act of majik will continue to occur until willpower of greater or equal force opposes it.

9. The lower the probability of an occurrence the greater the majik necessary for it to occur.

10. An act of majik follows a path of lease resistance in order to manifest.

11. All things are the results of some form of acts of majik

12. There is a time delay between casting and manifestation.

13. There is a time delay between casting and manifestation.

Chapter Nine

Majik Performed

The common man wonders what are the Mysteries of Majik? How does it work? And most importantly how do I do it? What is required of me for its mind boggling performance?

The 1st and foremost requirement for an act of Majik is possessing the ability to put your mind into a trance state. This is termed *"Gnosis"* amongst the Majik community.

As an explanation of Gnosis observe for instance an individual engrossed in a book or better yet a T.V. program and you begin to call his or her name, *"Brian"* but he fails to respond although you and he are in close proximity so you call a 2nd and 3rd and even a 4th time *"Brian"*, you now yell. Brian now suddenly snaps to as if dowsed with cold water. His mind seemed to be living that which it was observing in those moments of Gnosis.

This is the very same state of mind the Adept seeks to achieve purposely and deliberately. Only in his case he has complete control and choice over what ideas are going into his mind. There are various methods for inducing Gnosis. Chanting, sleep deprivation, fasting, exhaustion, sex, fear, anger, working out, controlled breathing; forced gazing at an object or image of one's self or someone else; the slight crossing of the eyes only enough to scarcely blur the eyesight or walking. All of these have in common the Kybalonic principles of vibration (intensity) and rhythm (repetition). All methods should be experimented with as some are more suitable for manifesting certain desires then others.

Christ illustrated the four basic levels of Gnosis with his parable of the four soils and seed, *"Behold, a sower went forth to sow and when he sowed some seeds fall by the wayside and the fowls came and devoured them. Some fell upon stony places, where they had not much earth and forthwith they sprung up, because they had no root they*

withered away and some fell among thorns and the thorns sprang up and choked them. But others fell into good ground and brought forth fruit, some an hundredfold, some sixty fold, some thirty fold." - Mat. 13:3-8

Meaning of the Four Soils and Seed in Majik

The wayside where the fowls devoured the seed is the idea of the novice who cannot quiet his mind enough to reach Gnosis and provide the proper mental environment as the necessary nourishment for the seed/idea which is then eaten up by disappointment due to failure of his operation leading to discouragement, the other devourer.

The stony place where the sun scorched the seed translates as an initiate's ability to induce intense concentration or Gnosis only slightly but not fully. His lust for result, however, known as obsession short circuits the process of manifestation. Obsession's unwavering constant

heat directed toward a desire or idea kills its manifestation. The Weeds that choked the seed is interpreted as the Maje having achieved the Gnosis needed for the manifestation of the seed/idea. However due to a failure to banish Gnosis and bring the mind back down to a none trance state, he inadvertently allows unwanted and unaccounted for seeds/ideas into the mind and thus his manifestations. He births that which he does not recognize as his own flesh and blood, meaning experiences that originated from his own mind.

An Adept, understanding the power of Gnosis and its many forms, is careful about what seeds get planted in his garden, the garden of his mind. He can go in and out of Gnosis at will, he's familiar with the means for such and thus makes his mind soil only fertile for that which he intends to manifest. This is the meaning of the seed and the Good soil, a quiet conscious mind and an open subconscious mind.

The Noetic Quantitative Table

There are 3 Noetics that are quantitative (Mind, Vibration, and Rhythm), meaning they possess portion and amount that can be measured and counted. They are the basis for the Q. Table.

A Table is to be used each time the Adept performs an Operation or spell cast. The tables will tell the Adept that which needs to be increased, decreased, adjusted, or changed in his or her operating. The Adept takes into account the three factors in his operating:

1. **Mind** is the level of gnosis and general Mental state he or she was in at the time of operating. Mind is measured by how concentrated the attention is on those sigils, symbols which represent the Operations objective or vision. It is also measured by how undistracted and unaware the mind is during an Operation. This means how open the subconscious mind is and how dormant or unaware the

conscious mind is during the Operation. The more this is the case the better the results of the Operation.

2. **Vibration** is the strength and effect the desire/objective of the Operation has on the Mind. This is determined by measuring how quick a confirmation manifest after the Operation has been concluded. And how intense the confirmation resonates with the Mind of the Caster. How acutely the confirmation grasp his or her attention will tell the Adept how deep the objective Idea of their operation has been impressed upon their subconscious.

3. **Rhythm** is determined by clocking the beginning to end time of an operation.

Note: The measurements of vibration and rhythm are also used in St. Johns formula to determine if Higher Probability conditions need to be created before the Prime Desire can be manifested. (See Ch. St. John's Formula)

The Operation's unique number (see Meaning of The

Beast sub-chapter) must be written on each operation's Table Sheet so the Adept knows what tables are of what Operation. The Table Sheet is a track record of an Operation's progress. Each table must be labeled with the time and date of the Operation. Such as the following:

Quantitative Table Sheet Example

Note: The 3 degrees of Mind and Vibration Measurements allow for a more precise estimate of *"A-H"* with a 3° being the weakest and 1° being the strongest; ex. 1° in the *"A"* box is *"Strong Moderate."* Op. Means Operation and is identified by a unique number.

Serpent Power of The Leviathan The Leviathan is a Generator of Strong Emotion and Deep Gnosis in Majik

The most powerful forms of Gnosis is the Leviathan for two reasons: the first is it induces gnosis very efficiently and second and most interesting it provides large amounts of energy both emotional and physical that is then used in the

operation. It is similar to the Death Posture practiced by some Adepts in that the Adept self suffocates to the point of a forced gasp for air, the Leviathan however has the extra added bonus of Libido or Vitality accumulation by holding and squeezing the perineum and anus muscles. The Adept is referred to the book Comte de Gabalis further inquiry, first appearing in French 1684 presumably by Abbe N. De Montfaveon De Villars.

Steps to the Leviathan

1. Sit up right preferably in an armchair that causes the waist to be bent at a 90° angle and feet flat on ground and legs spread at a 45° angle.

2. Breath normal from your bowels in and out your nose with mouth shut and remember to relax your entire body. Continue this for 10-20 seconds. Then move on to the next step.

3. On an exhale breath out until lungs are fully depleted of air. Tighten and hold anus shut. Do not inhale for 7 seconds.

4. TILT HEAD DOWN so that chin touches upper chest. This step is very important because if it is not done the back of the neck will cramp or worse pull or tear a muscle.

5. Now control inhale so that it takes seven seconds to complete while still holding anus shut.

6. Here again Do not exhale for 7 seconds. While tightening and holding the perineum muscle between the anus and testicles for Males and between the posterior vulva junction and the anus for females. Repeat steps 3-6 three times before moving on to step 7.

7. While maintaining firm contraction of the perineum your bodily position will become increasingly difficult to maintain. Requiring perseverance and endurance as the Libido or sex energy begins to churn; beginning with the lower abdominal, all muscles will tighten, the body will begin to violently shake; blood pressure will rise as heart rate increases; body temperature will rise also. Once your tolerance level or ability to bear this step of

the exercise, having reach your breaking point, you'll experience an intense sensation/outburst brought on by the surge of vital/libido energy which you then direct towards the sigil/symbol of the desire while chanting its name and gazing at its image/sigil, in regards to the desire. This technique eliminates the immoral practice of harvesting the adrenochrome from small children as committed in certain majikal circles. These children, who are usually male pubescents, are chosen for the high potency of the adrenochrome they produce. They are frightened on purpose to trigger the secretion of this chemical into the bloodstream which is then drawn and consumed. The Leviathan voids this horrific practice.

Emotion and its Importance in Majik

If gnosis is the soil and the thought/idea be the seed then emotion is the water and sunlight. For it feeds and fuels the spell, the act of majik. The expression of strong emotion with the idea in mind increases the arrival time and the probability of the desired occurrence/idea. *"A certain power to alter things dwells in the human soul and subordinates the other thing to her particularly when the soul is swept into great*

excess of love or hate or the like. When the soul falls into great excess of any passion it can be proven by experiment that it binds things and alters. The emotionality is the chief cause of all these things…" -Albert Magnus 13th Century Saint, philosopher, and Majikian, Founding Fathers, by Robert Hieronimus, PhD.

Spell Writing

Having established throughout this work the notion that the Mind is the maker of Majik it now has become necessary to enunciate the structure and mechanics of the Mind involved in the Majikal process.

While occult teachers of the Art will readily tell us that our subconscious Mind is the maker of Majik, (and this is indeed absolutely true), it is but a half truth.

"And a double minded man is unstable in all his ways," James 1:8, Bible.

The conscious Mind is a creator in addition to the subconscious being a creator and the two Minds need to be of the same accord in order for the self/person to have a stable life.

Erratic and irrational because it, the conscious mind, is initially oblivious to its ability to effect the World around it.

It is the *"doubting Thomas"* while the subconscious is the *"believing Peter."*

The second guessing we so often do, those *"What if this goes wrong, What if that goes wrong"* scenarios that plague our mental vision with their ugly images, short circuits our desires manifestation or at best mingles them with the things we don't want.

Which means to prevent such things two precautions must be practiced simultaneously.

First our internal constitution must be renovated, revamped and rewritten.

Our internal constitution is made up of our beliefs, religious and otherwise. The axioms, mother wit, our supposed common sense, notions we've picked up over time, and hold as unequivocal and indisputable truths and certainties.

These impediments can be over come quite easily with diligent practice. By repeating, until we are thrown into a hypnagogic state, affirmations we want to replace those notions etched onto one's internal constitution. Here the hypnagogic state or trance is an imperative ingredient to replace notions in our internal constitution.

Physical stillness and repetitive chanting of the affirmation or spell will be enough to induce a trance state. However, this state will usually only deepen but so far down into the subconscious and this deepening may take longer for some then others.

(This exercise should be done for 20 to 40 straight days in the same space and at same time of night, preferably 2a.m. - 4a.m.).

Secondly we must bypass the conscious mind and deal directly with the subconscious mind due to the whimsicalness of the conscious mind by dulling its attention, putting it on snooze.

This is done primarily through effigy, symbols, and foreign language.

In this section we're going to deal with the language aspect strictly. By writing our spells or translating your spells into a foreign language preferably an ancient or little known language then casting or operating it at our usual space and time we bypass the conscious mind and communicate directly with the subconscious.

To give an analogy imagine a store ran by two brothers. One brother scrutinizes every customer that walks through the doors, he's distrustful of the patrons in general, expects

every penny, questions each request of the customer as to why they want a particular product and then doubts the reasons they give.

But then you have the second brother who works primarily in the back with the inventory. He's big and not too intelligent but very generous. When he does come from the back he has a tendency to just give away the merchandise without even taking payment.

A frequent customer comes up with a plan to drug and put to sleep the smaller critical brother who works the register so he can deal directly with the gentle generous giant who works in the back and talk him into handing over damn near half the store for free.

There's many lessons this metaphor seeks to illustrate. One is that the conscious mind is a staunch believer in quid pro quo (a thing for a thing) where as the subconscious mind knows the truth of creatio ex nihilo (creation out of nothing).

A useful technique is to create your own alphabet by mixing and matching the vowels and consonants of your first language.

Write out on to paper the letters A to Z straight down. Then having written each letter onto torn folded pieces of paper, 26 in all.

Starting with the five vowels (a, e, i, o, u) shake around the folded little pieces of paper the vowels are written on inside a bag or container. Then choose one randomly out of the container. Open it and write the vowel next to the first vowel of your initial alphabet list. Then repeat this process with the consonants.

Now translate your spell into this newly created language and crossout the *"hard to pronounce"* letters. (see example below)

Create a new alphabet every so often. Even use an alphabet common for your Shetteem (to harness the power of the collective and another for your own personal use).

Once the spell is translated the conscious mind will quickly forget the meaning of the new language but subconscious will retain all meaning of it as it does with every enigma and symbol.

The Vortex Meditation….

When staring up at the bright blue sky on a clear sunny day there is an energy vortex that appears in one's line of sight.

To give a description of what the vortex looks like; from the onset it appears as light and dark waves of swirling energy. Brought about by focusing one's attention on a single spot in the clear blue sky.

The benefits of this particular meditation can be experienced almost immediately as strength of mind and will power increased exceptionally.

The more you focus your attention on it, particularly the center, the more pronounced and definitive the vortex will become. But also the harder it will become to maintain.

As the practitioner's attention loosens and fades he/she will desire more of this prana. One should re-engage the process, after a short break, until you feel satisfied.

Once finished, as you go throughout your day you will acutely feel an ability to dominate the mind of most of those you encounter.

The Vortex practice seems not to work very well under florescent or artificial light. It seems to be hindered by this sort of lighting. However, the very memory of a Vortex

session when simply thought about and concentrated on seems to exude the same or at least similar beneficial effects as the live physical session.

The Vortex can be used in conjunction with the Leviathan, mentioned elsewhere in this writing either before or after. Each will enhance the effects of the other. The performance of both prior to casting a spell, an operation, will maximize the operation and the effects of the operation.

After practicing the Vortex meditation one can test the strength of one's mind and willpower by manipulating their perception of a Necker Cube.

Mentally shifting the cube's profile in your minds eye.

Test how long a profile perspective can be held in mind.

How fast can you shift or transition from one profile perspective to another?

The longer one stares at the Necker Cube its back will seem like its becoming its front and vice versa. This is what is meant by the term profile perspective, which can eventually be controlled at will.

This practice just as the Vortex has real world quantifiable benefits to it. One of which is multi-perception, an ability to see a matter from many view points, physical things and areas from multiple angles and eventually projecting one's consciousness to distant places.

Chapter Ten

Majik Performed (Part Two)

"And he had the power to give life unto the Image of the Beast… no man might buy or sell except he that has the mark or name or the number of the name of the beast." Rev. 13:15 & 13:17

"If any lack wisdom let him ask God… But let him ask in faith, without wavering… that man shall not receive anything from the Lord. For a double minded man is unstable in all his ways." James 1:5-8

For one's Majik to be effective, as one intends, merely chanting positive affirmations of a desire will either illicit mixed results or no results at all. At this point in the Adept's career he is well past the day of *"positive thinking,"* he has experienced the heart crushing disappointment of thinking such a way exclusively.

Having somethings manifest and others not, if he persist, sets the Adept on a trying Journey and if lucky he comes across both the reason for his dilemma and its solution .

He learns that while he was attempting to auto suggest and implant desires into his subconscious mind; his

conscious mind constantly questions, rationalizes, and doubts, failing with its limited reasoning, to see the impalpable mechanics supporting his operation. It dawns on him with all the glory of a thousand suns that yes the conscious mind too creates, that it too is responsible for the occurrences that clutter reality, and because of this he has inadvertently played co-conspirator in the murder of his own children, like Saturn he is a Devourer of his own progenity, his desires.

Oh how he must weep, overcome with regret and selfblame. But not being one to wallow he figures out that the conscious Mind's scrutiny must be bypassed so the work of that all obedient Angel, the subconscious mind will not be deterred or interfered with. So he communicates in symbols with the subconscious taking his desire / beast and associating it with a powerful image, a puzzling mark, and a nonsensical name, along with a unique number, while in Gnosis.

Now no longer is he double-minded due to the rivalry between his subconscious mind and his conscious mind causing his vision to become unstable in all its ways. His Majik is now powerful and effective, and he shall now be fit to have any and all things his heart so desires from *"the*

Lord."

The Meaning of the Beast

The term Beast is allegorical language meant to describe a desire or idea or vision or wish the Adept would like to see brought to life.

Hence Beast has the added titles of *"Manifestation"* and *"Occurrence"* due to the fact that all occurrences began as an Idea or Thought.

The metaphor of Beast is used because each idea is in of its self alive. A living thing seeking to complete its purpose, to fulfill its programming, from emanation to manifestation, from Atziluth to Assiyah, from Noumenon to phenomenon, from thought to *"reality."*

Ideas travel paths of least resistance in the realm of infinite possibilities like the electrons of electricity. Using any and every available means to manifest itself. In fact, a Spell is the influence an idea has over a living organism, object, or event. An idea gains its influence due to the Law of Alikes attract, unalikes repel. The frequency emitted by an idea magnetizes those things of like frequency, thus attracting those things it needs to build and sustain itself.

Beast also refers to the tendency of an idea to over take the mind of a novice Maje who hasn't yet mastered Nonattached interest, leaving an opening for obsession to develop in his mind and heart. Turning the Maje into its own beast of burden. These are the same dynamics at play when a spirit or entity possesses its host, called *"possession"* by the occult and other types.

Indeed each man and woman is simply a compilation of ideas culminating to a grander idea called Self. So it becomes clear to the discerning eye how a Spirit, Itself being composed of Ideas, which are of stronger vibrations/frequencies then the mind It is exposed to, can influence and overtake that mind.

In short beast is code for the desire and will of the Majikian as the Image, Mark and Number are tools employed by the Maje for the successful manifestation of this will or desire.

The Image, Mark and Number of the Beast

The Image must denote clearly the desire, clearly the intent. It could be pictorial. Ask yourself *"What does my desire look like, What is the end result of my desire?"* Now

represent this in some vivid, emotionally charged form. The Image may even be dolls and other small scale miniature representative of the real thing. Even a vision board, one must only look upon it when he intends Gnosis so it will gather its power.

The Mark should have an aesthetic, curious quality to it, it should be able to be drawn on paper. It should be a composite of letters or symbols that represent those outstanding characteristics of the desire and put together in a way that is most aesthetically pleasing. The Adept should use his creative mind at this point. He can use the glyphs of the zodiac, or any glyphs that embody the qualities of the beast/desire. The Mark is a symbol or logo of the Idea/Beast. And it too should be exposed to the mind only when one intends to go into Gnosis so it will retain power. Example: Operation for Money and Wealth possessed by myself.

Represents Descending	**Jupiter Represents Wealth**	**Name Initials Represents Maje**	**Infinity Represents Abundance Forever**

The Mark:

The Name: **L A M E H F O V**

The Name is the mantra chanted by the Adept while gazing upon the Image and Mark, all while in Gnosis. Its purpose is to act as a trigger that is meant to render the Image's and mark's presence before the Adept unnecessary for operating, adding energy to, or associating (establishes or strengthen the link between an occurrence and the name) with an occurrence that epitomizes what the Name represents. At this point only the name will be necessary as a trigger for the spell. Just as the conscious mind becomes enthralled with the aesthetics of the image and mark so it can't scrutinize and thus sabotage the operation, the conscious mind will also eventually forget the meaning of the enigmatic word, the Name. The way of arriving at the

Name serves the same purpose as the mark does and that is to put up hurdles between the conscious mind and the true meaning of the mark and name, severely damaging its power to influence the operation. The name can be arrived at by many methods. One such method is by 1st simply writing out the desire which should be no longer then a sentence or two, such as, *"Lakim will be wealthy forever."* Proceed down the sentence from front to back leaving every letter that appears for the 1st time and eliminating the ones that have already appeared in the sentence. *"Lakimbethyforv."* Next eliminate every other consonant begin with the second one *"Laimehyfov."* Now subtract every other vowel beginning with the second one, *"Lamehfov."* At this point you'll have your name/mantra; vowels can be added where needed and consonants can be further subtracted if necessary. The word can also be turned backwards to further obscure its meaning to the conscious mind. When chanted it should be done so slowly and intoned, like the choir boys do in the Catholic Church, repeatedly. Within a few weeks or days the conscious mind will have forgotten its meaning.

The Number is so the Adept can identify and distinguish his primary desire from any secondary or subdesires that may need to be manifested as a catalyst for

the primary. Essentially its a catalogue number allowing the Adept to keep track of his spells/operations, to be logged in his Book of Life otherwise known as a Grimoire, Book of Spells. Without the Number the Adept may become confused as to what formula, equation, or compound is the subdesire of which primary desire. This number is also to come to you while drawing randomly from your Kabalistic Kards.

"No man may buy or sell except he have the Mark or Name or Number of the Beast." - Rev. 13:17.

Buy is money going out; Selling is bringing money in. Currency is a physical representation of energy, a Current of electricity. To buy is to send energy out, to Spellcast; to sell is to receive and bring energy in; to Divine or Forecast as a seer or psychic. This is the meaning of the pharaoh's uraeus, the Cobra and Vulture protruding from the third eye. Both animals are feared and despised predators, one for injecting venom into its victim; the other for ingesting its victim's corpse. One flies high, the other slithers on the ground representing Heavenly powers and earthly powers. The pharaoh possessing the powers to influence others psychically, psychic influence (cobra) and psychic discernment (vulture). The compass and square of the

Masons is the update version of the Cobra and Vulture Urneus of the Ancient Egyptions.

Hence no Maje or man can cast a spell or receive impressions without having been in Gnosis on something that represents the idea whether a name, number, mark, or image. This is the meaning behind the biblical statement, *"No man might buy or sell except he have the Mark or Name or Number of the Beast."* Rex 13:17

Saint John's Formula

10,000 hrs of practice has become widely popular in contemporary culture due to psychology and self help books. However, this bit of knowledge is not new to the Adepts of Majik nor was it new to the Ancient Maji or the Priesthood of Kemet (Ancient Egypt). In fact the Theory runs all throughout the Beloved Saint John's Book of Revelation. Observe if you will:

"…. The Gentiles shall tread the holy city under foot 42 months." -Rev. 11:2 *"I will give power unto My two witnesses and they shall prophesize 1260 days clothed in sackcloth."* - Rev. 11:3 *"…Nation shall see their dead bodies 3½ days."* - Rev. 11:9 *"After 3½ days the Spirit of*

God entered them…" Rev. 11:11

"... they feed her there 1260 days." - Rev. 12:6. All of these time frames are equivalents of 10,000 hrs.

10,000 hrs of practice at anything: sports, law, art, music etc., will make one a skilled master in that field. However it is humanly, impossible for any to practice continuously for 10,000 hours, which would be 1 year and 55 days, yet it is practical for the entered apprentice to habitually exercise his new found occupation 8 hours a day for 1,260 days which is equivalent to 3½ years, or 10,000 hours divide into 8 hours increments. 3½ years is also 42 months.

This discovery was unearthed as a result of the many students of the Royal Art reaching Adeptship in a span of 3 years, 5 months and 5 days or 3½ years. Manifestation of the Students desire (to become adept at Majik) took place at the end of the 3½ years/30,000 hours, after 10,000 hours of practice or 1/3 of the time it took the desire to manifest. Hence the Maje thought it a reasonable thing to be able to determine the manifestation time of a given desire. Based on the fact that once a spell is cast or energy put into the Ether a reverberation is experienced by the caster. This is referred to as a Confirmation.

A Confirmation is not the Manifestation of the desire itself but an occurrence that takes place as a result of the Operation desire, reminding the Adept of the desire. For example an operation is done to receive a Red Corvette an hour or so later one happens to see a T.V. commercial advertising a Red Corvette or you see at the stoplight a red corvette or open a magazine to a page with a red corvette or you turn on your radio and the station is playing *"Little Red Corvette,"* by Prince. These would be considered confirmations.

The ratio for the Fibonnacci sequence is 1.6; like the ratio of pi, the circumference to the diameter of a circle is 3.14. It has been discovered that the ratio of all physical things in regards to the proximity of other physical things is 1.6. Showing that our physical, 3 dimensional reality is built in blocks of 1.6. This is the ratio of the physical space in which we live. Events in time also happen in ratio to one another.

Occurrences in time happen in accordance to 0.3 or 1/3 and just as 3.14 shows that no circle is truly a circle, 0.3 shows that no occurrence is truly an occurrence, thus susceptible to manipulation by way of consciousness. For

0.3 goes on forever just as 3.14 continues for ever, though the latter is an irrational number.

When one intentionally entertains an idea while in a state of Gnosis (concentrated attention or open subconscious) he or she is performing an operation. The length of time an Operation lasts and the length of time it took for the confirmation to manifest starting from the end of the Operation is calculated, then turned into a fraction with the confirmation time as the denominator (the number below the line) and the operation time as the numerator (the number above the line). 0.3 is then turn into a fraction which is 1/3, this is then multiplied by the Operation/Confirmation fraction. 1/3 is the constant, the Operation time and the Confirmation time will change with each operation. The initial answer derived from multiplying 1/3 and the Operation/Confirmation fraction together will likely have to be reduced to its lowest term. This lowest term fraction will indicate two things: 1. The strength of the operation necessary for manifestation of the desire rather then just the confirmation of the desire, and 2. The manifestation time or the A.T.D. approximated Arrival Time of the Desire and the necessary number of operations needed to be performed at the same exact strength as the original operation, just in

greater quantity. Example: I operate for 22 minutes for a red corvette, 60 minutes later I receive a confirmation in the form of a song that just happens to come on the radio called *"Little Red Corvette."* I now want to know indications 1 and 2. So I turn my operation time and the confirmation time into a ratio, like so 20/60 next multiply it by my constant (1/3), Like so 1/3 x 20/60 = 20/180 reduce my answer to its lowest term, 1/9. I now have my indications which are: 1. I must perform an operation that's 9 times stronger then the first one if I am to receive the corvette instead of mere confirmations; 2. by multiplying my lowest term with my original operation/confirmation like so 20/60 x 1/9 = 20/540. I get the number of operations (20%) of like strength necessary to be performed to cause the manifestation of the desire 9 hours after or 540 minutes later. Such is the significance of the 10,000 hour theory to all those Adept in the Art.

Chapter Eleven

Majik and Technology

Figuring out the most efficient way to complete a task has been the nature of the human mind since the dawn of time. Such compounded efficiency, like going from horses, to cars, to jets, as an example, is called Technological Advancement and shows no signs of slowing down. In fact, all indications show it is speeding up exponentially. (See Moore's Law)

The term *"Technological Advancement,"* stands underexamined by modern society in our current culture. We are unconscious as to what the term implies. Advance toward what? What are we as a collective moving toward? Should be the question asked.

In our day and time we erroneously equate civilization or a civilized people with a technologically advanced society, assuming the former comes inherent with the latter. It was Einstein who said, *"Our Technological advancement is out pacing our moral or spiritual advancement."* And this is the case with our current state of affairs as a global society. We forget that doctrines and philosophies are technologies for the mind and soul as software, apps, and operating systems

are for our hardware devices. We steadily download, update and rewrite code and programs daily. Everyone wants the latest most advanced laptops and smart phones. However, when it comes to our doctrines, our philosophies, our religions, our worldview, and self image, we are slow and resist update and rewriting these even when a more *"advanced"* version is presented to us. Advancement based on logical deduction in all areas of life is the very purpose of life.

We also over look certain technologies due to their simplicity. The pillow, for example, gives us comfort in our sleep. The pencil that allows us to express our thoughts in symbols and glyphs, the eraser that conveniently allows us to correct ourselves and lessen our waste in the process, the wheel even for efficiency in travel and ease in transporting. All of these; those wholly physical and those mostly mental; the simple and the complex, should help broaden our understanding of what is technology.

This brings us back to the question of what does the term Technological Advancement imply? As technology becomes more efficient, more capable of giving man dominion over nature and natural law, humanity as a whole is speedily heading toward Godhood, the ultimate consequence of

technological advancement. The question still remains, however, will we become morally bankrupt deities who stifle the evolution of lower life forms out of a selfish hunger for power, (a dynamic that must inevitably come to a miserable end regardless), like Yahweh of the old testament, or will we find higher purpose as benevolent supreme beings?

Humanity's apotheosis has been symbolized in the bible as the Tower of Babel. The fluid communication of a hive mind helped mankind advance as a collective though we at the time lacked conscious awareness. Today we're still building the tower only now we lack moral/spiritual awareness. One whose forehead veins perfectly forms the compass and square shall unite all the world while first uniting the illuminati who shall recognize it is He by this very mark. Fore the compass and square are ancient symbols of technology; man's ingenuity. It is this ingenuity the bitten apple symbolizes hence its significance in the field of computer technology, especially artificial intelligence which will serve as the vessel for humanity's collective Mind.

At this point in our discussion it has now become relevant to beg the question, what exactly does Majik and Technology have to do with one another? The answer to this question lies in the definitions for each. The definition for Majik is to cause change in accord with one's Will.

Technology is the application of science to achieve one's Will. The various forms of Majik are technologies in and of themselves with each school having different techniques designed to achieve similar ends. Each school applying occult sciences for the purpose of causing change in accord with their own Will. Hence this is the first way Majik and Technology are tied to one another. The latter inherent in the former.

Secondly, Majik is the ultimate technological advancement intrinsically implying such. Sense technology is the application of Science to aid, ease, and enhance human Will. The power to say be and it is or to be able to think a thing and it be so is the conclusive purpose of both Majik and Technology. Take for example the idea that nano bots within the human body theoretically could be commanded by way of conscious thought to reconstruct natural elements at the subatomic level being that the only thing differentiating one element from another is the number of electrons composing each. Theoretically giving one the ability to produce a cheese burger in the palm of his hand or turn water into wine with a touch. Thus causing an effect with the greatest of ease and the least effort possible. It is at this point Majik and technology converge and blur,

becoming indistinguishable from one another as Arthur C. Clark pointed out so long ago. Thus every advancement in technology has not only come by way of Majik but technically is Majik and should serve the purpose of Majikal efforts.

We as a global community must employ technology for spiritual purposes not just opportunities to enhance our pleasures and comforts and wealth. Technology has the ability to accelerate, our spiritual evolution exponentially. The technophobes have plenty cause for concern, judging by the mentality of corruption and selfishness that's prevalent throughout society, for their fears of a dystopic, dreary future where robots and artificial intelligence oppress and subjugate us human beings.

However, it is in our power to choose our own destiny, to shape it with our thoughts, to create a new vision for our species. Technology will go where we go, it will be evil if we are evil and be good if indeed we are good. Individually we each must embrace technology's spiritual purpose in our lives if we are to make it benefit us collectively. Together humanity presently stands on the cusp of two futures with both, thank God, being wholly in our hands. Will we be courageous enough to make the right choice?

Chapter Twelve

Majik and Black People

"Magic being what it is - the most difficult of all sciences to learn experimentally - its acquisition is practically beyond the reach of the majority of white-skinned people, whether their effort is made at home or in the East. Probably not more than one man in a million of European blood is fitted - either physically, morally, or psychologically - to become a practical magician and not one in ten million would be found endowed with all these three qualifications as required for the work."

"Furthermore, there would be tremendous difficulties in the way of training, if we can so express it. Contaminated by centuries of dogmatic superstition by an ineradicable - though quite unwarranted - sense of superiority over those whom the English term so contemptuously "Niggers," the white European would hardly submit himself to the practical tuition of either Copt, Brahman, or Lama." Ch. 26 pgs 257258 "Isis Unveiled" by Helena P. Blavatsky Abridgment by Michael Gomes.

Incarnated as an African American at this point of my evolution I find it irresponsible and downright disingenuous

not to speak on African Americans and Majik specifically. But why, ask some? Why highlight one particular group without addressing others?

Analogy seems the best means of answering the above question. Doctors attend first to those patients whose condition is the worse and whose disease he is most familiar with and specializes in.

With that said it is up to the Illuminati of each racial, ethic and regional community to diagnose the group then administer a treatment as is best fit for his particular group in turn fulfilling his/her duty in assisting the evolutionary jump of the human race as a whole. In fact this has been the *magna schema* through the ages of prophets, sages, teachers, reformers and leaders each assigned to the Community they were born into.

Before we are a gender or a race we are human and before we are human we are a creation of God, an appendage emanating from that 1st Cause and this being the case, possess a commonhood with even the animals, insects, plants and ameoba.

Many in the Occult community assume that the racial memory of slavery vibrates too strong in the blood for the majority of African Americans to make the evolutionary

jump in consciousness; that the ripple effects of slavery if not tidal waves, are still drowning them in ignorance and submerging their God given treasures beneath its waters. But what they fail to realizes is that a stronger vibration resonates in their blood at a much deeper level and this is the vibration of Egypt or Ancient Kemet and although others attempt to lay claim to this Glorious History, the walls of the Pyramids do not lie and for that matter neither did the Greek historian Heredotus and neither does the technology of modern day computer generated facial reconstruction applied to the Mummies and corpses excavated out of the sands of Egypt.

Slavery's prime scaring or unhealed wound, is the complex of inferiority, an insidious psychological parasite laying stealthily within the recesses of the Afro American mind siphoning our creative powers. Self hate, the unconscious loathing for one's own phenotype (Physical characteristics/Genetic Makeup) is so unconscious and reprehensible, admittance to it is painful, requiring the courage to self scrutinize and be brutally honest with self, all of which will be cathartic and liberating, freeing up those creative energies oscillating within.

Ponder this for a moment, which one of God's creation dislikes its vessel from which it cannot detach without procuring death; and dislikes it species from which it cannot

defect without procuring contempt. Imagine a dog trying to meow or a cat trying to bark while showing a general dislike for other cats. For, it is not the cat imitating the dog that repels one so much as the distinct sense that it itself is repelled by what it is, that subconsciously appalls us.

The Majik of one rife with self hate is not effective as he or she intends. The different degrees of self hate are due to long standing negative associations whose remedy lie in the Kemetic Laws of Association detailed elsewhere in this treatise. Your Ancient Ancestors of Axiom and Kemet (Ethiopia and Egypt) are her oldest known masters making you as entitled as any if not more so to her inner most secrets, her highest Mysteries. Ancient Masters such as Dedi mentioned in the Westcar papyrus as a conjurer under Pharaoh Khufu c. 2613 B.C. For your roots in the secret science run deep and cannot be undone by even you yourself.

It is your Ancestors who the Greeks and Romans have to thank for their Fraternities and Colleges and the mysteries they practiced; to thank for their Gods and Mythologies; for you can count amongst your race the likes of Lucius Apuleius, Grand Master of the Mysteries of Greece; Delphos the founder of Delphi from where Oracles prophesized; Afrodite, Greece's Goddess of Love and Beauty whose hair

reminded them of foam from the Sea, hence the term Afro; Athena who Athens was names after; look at Dhul Nun (The Serpent Master) of the Sufi Order Al Banan (The Builders) which birthed the Templars and thus Modern day Free Masonry; P.B. Randolph renowned Rosicrucian and Black Nationalist whose work on sex Majik is still highly regarded amongst the Illuminati; Richard Potter 1st American born Magician 1783, so wealthy and famous he had a town named after him, Potter Place, N.H. and the infamous Prof. Black Henry whose name rivaled Houdini during his time.

Not to mention Osiris is a black God and his counterpart Isis teacher of Majik and astrology currently hides as the Black Madonna with Child in this Christian era. Alchemy derives from the name Kemet, Kem means black and being the original depository of the Art, evolved the term *"Black Majik,"* Black for the land and people, for all Majik is black due to the mystery of the science of it, the ethics of which depends on the intent of the Majikian in question, thus there exist no such things black or white majik, merely ethical and unethical Majik.

The prevalence of Roots, Voodoo and Santeria practiced in the black community, although vulgar and crude forms of Majik, are diluted derivatives of the more refined, skilled, and powerful Kemetic Majik. For the Majik of Ancient

Kemet is not marred with mere superstition but is scientific in practice and precise in results.

These cruder forms of Majik are what repels the modern mind. *"To what purpose is the multitude of your sacrifices unto Me? Saith the Lord… I delight not in the blood of bulls or of Lambs or of goods…your appointed feast my son notes….when you make prayers I will not hear you for your hands are full of Blood."* Isa. 1:16:18

Once Kabalistic Calculus Law of Association and the entire T.O.O.T.R.A. system becomes implemented into these cruder forms, they along with the practitioners will shine with the brilliant light of Refinement. Otherwise, vulgarity has a way of devolving the soul into a hideous unsightly deformity; and an unethical Majikian eventually is created. The blood, the mutilated corpses both animal and human, the stench of feces and urine improperly mixing with frankincense and myrrh and rotting fruit and maggot ridden meats offered to disembodied spirits of a vile mischievous nature *"Call me Legion for we are many,"* they whisper through hallowed out skulls, stolen from the graves of criminals and mad men. Would not these things corrupt, morph and twist the noble soul after repeated exposure to such a morbid environment with its grisly and gruesome

scenes. All of this is the work of superstition over science, man supposing as opposed to reasoning.

Superstitious, unethical majik are not the only doctrines that have their origin in Kemetic dogma; the Torah, precursor to the other two Abrahamic faiths, the Bible and Quran, are Kemetic Dogma (Ancient Egyptian) veiled under different names. Take the Kemetic God whose name is praised at the end of every prayer of Judaism, Christianity and Islam…Amon or Amen, or Ameen. Are not the colors of the Levite Priesthood the same as Kemetic National colors, scarlet, blue and gold?

"Simplicius asserts Moses received from the Egyptians, in the Mysteries the doctrine which he taught to the Hebrews… Making public the worship of that Deity whom the Egyptian Initiates worshiped in secret…. The Egyptian Priest taught in their Mysteries that there is One God… The early Christians taught by the founder of their Religion those truths that the Egyptians has passed to the Jews and received also the institution of the Mysteries… which furnished the new veil of initiation with the Hebrew words corrupted and disfigured by time and ignorance… The Occult science was concealed under the shadows of the Ancient Mysteries; Moses purified and re-veiled them, for that is the meaning of the word reveal. He covered them with a new Veil when he

made the Kabalah…" -Albert Pike, Morals and Dogma, 23° & 32°.

The practice of these three religions, while being unaware of their Kemetic origins and influence, by today's progeny of Kemet is like the Prince who inherited a vast kingdom from his father, the King, but gleefully boast about being a field hand on a farm that lies within this vast Kingdom which is his rightful inheritance as Prince. Ponder that for a moment, black men and women of the Judeo, Christian and Islamic Faiths.

The Kemetic Priesthood were a conglomerate of fraternities under the umbrella of a more powerful secret society called Djedi a name that translates as the Aware or Conscious Ones, the Awakened ones. Initiates at a specific degree were bestowed with the Sir name Asar in Greek, Osiris. Such as Ani the scribe of the oldest known (4,500 years) Egyptian Book of the Dead, whose name became Asar Ani further into his initiation, sort of like Doctor after one's doctorate degree.

Some initiates of the Egyptian or Kemetic Mysteries (Secret Religious Rites)were task with the mission of traveling to various parts of the world and bringing civilization or light to those darker parts of the planet. Hence

we see the validity of the story of Osiris the civilizer who left Kemet to teach far away lands agriculture, irrigation, government, religion and law and order.

If the initiate encountered superior ways they were obligated to bring them back to Kemet, the black land or land of the blacks. Egypt also used this civilizing system to secretly be the ruling power behind the throne of a nation. Moses was one of such initiates charged with such a civilizing mission to the Hebrew people. In fact *"Manetho cited by Josephus says Moses was priest of Heliopolis a city in Kemet and that his true and original Egyptian name was Asarsiph or Osirisiph."* - Albert Pike, Morals and Dogma, 23°. Just like Ani or Osiris Ani.

Those blacks practicing Islam, Christianity, Judeism, Free Masonry and Majik must realize that all of these originated with their ancestors if for no more reason then to counter act the ripple effects of American slavery. You must imagine the ancient generations of black people of Kem, they knew no such thing as racial discrimination, for it was illegal for a Kemetian to do physical labor, they knew nothing of police brutality because of their color, for Kings of the world over bestowed upon the pharoah gifts and recognition as a God, they were a totally different breed of blacks then those presently living. 25,000 years of

conquering, infiltrating, and assimilating other nations they only know their own image as the epitome of leisure, luxury, power and authority and no others. They knew nothing of the constant fear, anxiety of being second class citizens in a country where their ancestors were slaves, for they did the enslaving. In fact the word slave comes from the word *"slav"* referring to Caucasians of the Northeast whom the Egyptians harvested for their hair to provide their wigs in addition to serve as the *"help."*

Hear me and hear me good Black America we are in no way tarnished by slavery, it does not give us a black eye to have descended from a people who were victims of the greatest atrocity heaven has ever witnessed in fact it is a badge of honor not a badge of horror. Why? How could this be so? Some may ask. I say because it shows to all other peoples for all time to come the strength of the human spirit, the strength of the human will not only to merely survive a great travesty but to be Fredrick Douglass, to be Harriet Tubmans and Nat Turners, to be Booker T. Washingtons and George Washington Carvers to be Prince Halls and Jack Johnsons to be George Jacksons and Mary McCleod Bethunes, to be Jay-Zs and Oprahs to be Tristan Walkers and Ava DuVerays all the while having no ties to your true

Ancestry, no ties to your true history, to your true traditions, to your Ancestral Languages as other people had and have; for you did more with less… in spite of!

It was your tragedy that gave others the will to weather their own storms.

So let your heart stand erect and your head stay humble as you enter into the Ancient Mysteries (Secret Religious Rites) of your ancestors understanding the laws which the wise among them personified as deities for the ignorant Multitude. The Royal Mysterious Art will erase social ills plaguing the black community from Mass incarceration to discrimination in the Justice System, to black on on black crime, to police brutality, to teen pregnancy, to unemployment, to Drug abuse, to income inequality, to high school dropout rates, to dysfunctional family units. Francis C. Wellsing's the *"Isis Papers"* has unearthed the central cause of these problems and all others Globally.

Let not those of other races feel neither dispirited nor covetous by this treatise on the lofty history of a now down trodden people and let not those once downtrodden people be braggadocios and boastful because providence gifted to them such a lofty station in the great scheme of destiny. For all people have contributed to the progress of the human race

and thus all people have history worthy of celebration as do those highly melanated.

Grab the crook and flail out of the mummified hands of Osiris with honor and reverence and practice Kemet's ancient Mysteries and Sacred Majik with the ferver and devotion you currently dedicate to the Mysteries illegitimate offspring Christianity, Islam, and Judaism.

For who is more worthy of the farmer's gratitude, the milk or the cow who produced the milk? Your Crown and Kingdom await you black man and woman, what say ye?

Tootra Catechism 9 World History

This lesson is to be memorized verbatim.

1. **Q. What are the Tamahu?**

   A. The Tamahu are genetically modified organisms. Derived from so called homo sapien sapien genes spliced with animal DNA, specifically canine, goat and lemur. The term Tamahu is ancient Egyptian, Tamu meaning created people, hu meaning white.

2. **Q. Who are the so called homo sapien sapien and what is their origin?**

A. They are the 100% human being commonly called African or black distinguished by coiling hair as opposed to straightened fur. Their exact origins are unknown though all indications point to the stars.

3. **Q. What are the numbers of the Tamahu in the U.S. & Globally?**

A. There are approximately 197,285,202 Tamahu in the U.S. and 1.3 Billion Globally from the date of this writing.

4. **Q. How many African or black people are in the U.S. and globally?**

A. There are approximately 37,144,530 blacks in the U.S. and close to 3.1 Billion Globally.

5. **Q. Will you tell us the difference between hair and fur and why is this significant?**

A. Indeed. Fur is a term used for Non-human mammals while hair is a term reserved for human mammals. Mammal being a class of animal distinguished from bird, insect and reptile. Genetically speaking it indicates how close one is to being an animal.

6. **Q. Why are their exact origins unknown?**

A. The age of the African or black race is too ancient to be calculated. Their exact origin has thus been lost in time. We can only surmise they descended directly from God Himself.

7. **Q. Why did humans create the Tamahu around 6,000 years ago and what were the effects?**

A. For the reason of creating A.I. in today's times; to serve the aberrant and vain indulgences of their creators with the effects being their own destruction and enslavement due to the creators love for their creation. This dynamic is illustrated in H.G. Wells; The Island of Dr. Moreau, Pierre Boultes' Planet of the Apes and Mary Shelley's Dr. Frankenstein.

8. **Q. How do humans correct the problem of the Tamahu?**

A. By practicing the Art secretly and organizing covertly.

9. **Q. Tell us what is Operation Iron Cross and when shall it be initiated?**

A. [redacted]

(This answer has been redacted

from the public for security purposes).

10. **Q. What of the Nature of the Tamahu that makes them problematic?**

A. Their propensity for aberrant behavior is inherent. A powerful urge to go against nature that humans can never empathize with. In a word, they go against nature because they are unnatural.

Chapter Thirteen

An Introduction to the True Kabalah

We cannot in sound logic proceed further without mentioning the Kabalah; the true Kabalah and its relation to Majik.

The true Kabalah gives Majik its scientific aspect and transforms it into an Art to be beloved by all who lay eyes upon it.

The following chapter will upset conventional notions held by many purveyors of occult literature however what is suggested therein one's prior study will substantiate.

The reader will come to see the two (Majik and the Kabalah) cannot be separated but are forever and has always been bound to one another. Hence the two as a couple will be indispensable to the student of either.

The True Kabalah What it is & What it is Not

For a doctrine to be of such high renown amongst some of the brightest minds to have walked the earth for millenniums, century after century, surely the ever elusive Kabalah must hold secrets of much greater import then such trivial principles as the Hebrew sephora; kether(crown), hochma(wisdom), binah(understanding), etc. Or the enigmatic, babbling, Zohar for that matter.

The Zohar however does bestow multifacet perception onto its adherents due to its vague, enigmatic language, by beckoning intense ponder. Like the Koans of Buddism,

"What is the sound of one clapping?," however the Zohar like Koans operative usefulness stops there.

The word Kabalah means to receive however other than a few insights and sense of spiritual feel good its worthless to a novice who expects to learn how to receive his or her heart's desire, for even Crowely seen it as nothing more than a mental cataloging system good for strengthening memory or organizing of one's thoughts. *"And please remember when people compliment you on your memory or clarity of your thoughts to give credit to the Kabalah."* So did he or did he not possess the full secret of the Royal Art? Maybe, maybe not, who knows...

The point is this; that there are scores of individuals with little red strings on their arms who've been duped into believing that they hold the true Tree of Life and that this doctrine of Hebrew jargon will assist them in *"receiving"* their heart's desires. Such an idea is without merit.

Let's see what 33rd degree freemason Mr. Albert Pike has to say on the matter, *"The occult science of the Magi was concealed under the shadows of the the Ancient Mysteries... Moses purified and reveiled them for that is the meaning of the word reveal. He recovered them with a new veil when he made the Holy Kabalah"*—Morals & Dogma, 32nd Degree.

"A NEW VEIL," means the Kabalah of the Hebrews is a mere smoke screen, a deliberate deception devised to steer the common person away from true Tree of Life, *"Behold man has become like one of Us knowing good from evil, now lest he take also from the Tree of Life and live forever.....Place an angel with a flaming sword that whirls to keep man from the Tree."*—Bible, Gen. 3:22-23

The whirling, flaming sword is the writing pen of an Initiate of the Ancient Mysteries who is the Angel/Messenger and his sword is the pen with which he hides the truth by writing metaphorical and allegorical stories designed to deter most but bestow hints and clues to all who can discern the Greatest Secret of the Ancient Mysteries, Majik.

Other such evidence as to the nature of the true Tree of Life is the Hebrew Kether (crown) and Malkuth (kingdom), the former lying at the top of the tree, the latter at the bottom. They are allegorical references to the first & last Laws of a work called the Kybalon; the laws of Mind and Idea/All. The Crown (kether) symbolizes the Mind, while Kingdom (malkuth) represents the Idea. The Kybalon is a hermetic book written sometime at the turn of the 19th century detailing 7 laws that break into 10 laws.

For most dabblers in the occult this magnificent work still seems irrelevant to the Kabalah. Though the Kybalon is a doctrine half veiling the true Kabalah yet it itself is just another layer in a series of smoke screens. Like the Hebrew Kabalah, the Kybalon is an interesting, intriguing piece of work but fails to direct the initiate on how to receive. Even though its laws are the very keys to receiving. *"I will give you the Keys to the kingdom of heaven and whatsoever you bind on earth shall be bound in heaven and whatsoever you loose on earth will be loosened in heaven"*—Christ, Mat. 16:19. What are these Keys? Are they the true Tree of Life? They must be if they loose and bind as Christ claims. Hence the Kybalonian Laws are really fundamentals of the true Kabalah. But what specifically it is still remains a Mystery. The true Kabalah has been severed into pieces and hidden in plain sight. It is a book whose pages are unbound yet this unbounded book is dealt with by innocent children and conniving con men alike. Pike tells us the true Kabalah is *"...an infinite which can be held in the hollow of an infant's hand"*—Morals & Dogma.

This infinite is nothing other than a deck of playing cards able to fit into the firm grip of a child's hand.

I can hear the reader now exclaiming, *"Playing Cards! You gotta be shitting me!"* I assure you, my dear earnest truth seeker, I am not, allow me to please prove my claim.

First observe the 4 suites of the playing cards. These are the 4 worlds of the Hebrew Kabalah. The world of Emanation, Creation, Formation, & Manifestation or in more specific terms the Spiritual corresponds to Clubs, the Mental to Spades, Emotional to Hearts, and Physical to Diamonds. Now look closely at the Hand Grips of the Jacks, the Swords of the Kings, and the Flower Stems of the Queens. If arranged from Jack of Club to Jack of Diamond to Jack of Spade to Jack of Hearts one will notice the Hand Grip becoming progressively tighter. Signifying Learning, Knowing, Understanding, and Mastering a skill or a body of knowledge.

The Queens each hold in their hands a flower whose stem progressively protrudes from the grasp until the last one whittles. Place first the Queen of Diamonds then the Queen of Clubs then the Queen of Hearts and finally the Queen of Spades. The 1st represents birth, 2nd adolescence, the 3rd maturity and the 4th old age. Question why the palms of the first 3 hands are turned outward and the last turned inward. This is because when the soul is born it looks outward to the

world and its outer life but when old age befalls it, it begins to turn inward toward the inner life.

As for the Kings, Manly P. Hall give clues as to the hidden message of these four when he states in the Secret Teaching of All Ages, pg 425, *"The Grand Master of the Order of Cards is the King of Clubs who carry the Orb as a symbol of status."* The King of Clubs placed 1st symbolizing the morning with the sword being half light and half dark, 2nd King of Hearts represents midday with the sword being in full light and raised above the Kings head. The 3rd, King of Spades represents evening here the sword has a weak ray of light and the 4th King of Diamonds having no sword in hand representing night or sunset.

Remember the King of Clubs is the Grand Master of the Order of Cards hence it is only right that the members of his Secret Order carry his sign in their crowns....the Club. There are 7 initiates in this *"Club"*. Arrange these cards in the following Order: 1.King of Clubs, 2.Queen of Clubs, 3.King of Diamonds, 4.Queen of Diamonds, 5.King of Spades, 6.Queen of Spades, 7.Kings of Hearts. Notice each having within his or her crown the sign of their Master, the Club, while the uninitiated face cards do not.

Now take account that all the Kings possess facial hair except the King of Hearts, why? Well he's also the only King without a wife in this sequence, not only that but the wife of another king is looking in his direction while the other wives are following their husbands, within this 7 card sequence. King of Hearts represents the last chakra and the 7th planet both symbolizing the sexual energy, libido. The Queen of Spades seems to even be offering her flower to him a symbol of her offering her womb to him. His lack of facial hair is due to his lack of a spouse allowing him to conserve his sexual energy, keeping him young and virile. The King of Spades seems to be chasing after his Queen with his flaccid phallus in hand, while she is trying to draw the strength of the King of Hearts, symbolized by her whittled flower.

The 7cards represent the 7 planets of ancient astrology and the 7 churches of Revelations which represents the Desire Energies of the 7 chakras.

Ace to 10 represent the 10 Laws of Association from Mind to Idea of the 4 suites/worlds. Each card couples with the 4 worlds, Spiritual, Mental, Emotional, and Physical creating states of existence, the 40 Elements.

The King, Queen, and Jack motifs of the playing cards represents Ain (Nothing), Ain Sof (Endless Nothing), Ain Sof Nor (Endless Light of Nothing) of the Hebrew Kabalah

they are also the 3 Samadhi, spiritual evolutionary experiences of the ancient Hindu tradition. However an even greater secret remains locked within these principles. The true representation is the trinity of Desire, Wisdom, and Power. A replication of the creative attributes of God the 1st CAUSE. In order for God to create He 1st had to have the Desire to create, if He did not want to create Creation would not be, 2nd the Wisdom to create which means the know how or expertise to create, 3rd the Power which is the ability to create. Man replicates this function of divinity throughout his existence here on earth; for example a man may want (Desire) to own an auto mechanic shop, however without the know how or a working knowledge (Wisdom) on the business of fixing cars his dream will fail to realize even if he does possess the capital necessary that would grant him the ability (Power) to start the business. Hence it is evident that all 3 prerequisites need be present if the Idea is to manifest.

These 3 Prerequisites exist throughout all 4 worlds for a total of 12 altogether. For example there multiplication through the world is similar to the 10 Laws of Association/Noetics ex. Spiritual Desire; Mental Desire,

Emotion Desire, and Physical Desire etc. coming out to 12 principles corresponding to the 12 zodiac.

The 4 suits of the cards represent the quadruplicity (fire, air, water, & earth)of astrology and the face cards represent the triplicity (cardinal, fixed, & mutatable) signs of astrology.

The 8 phases of the moon are also represented by the Kings and Jacks arranged in a circle, the face and hands being significant here.

The Jokers represents the Higher and Lower Self, the big Joker being the Higher Self and the little Joker is the Lower Self.

All the above goes well beyond a few minor coincidences.

Upon close examination of the proofs laid out above, intelligence will agree that the signs and symbols of the playing cards like the hieroglyphs painted upon the walls of the eternal pyramids are not mere decorations and that the inconspicuous, minuscule details buried within the cards pictures are to be utilized for a specific occupation. It is these spiritual truths that are the working wheels, the hard mechanics of the true Kabalah. The Hebrew Kabalah is a smoke screen, whose spiritual insights only satisfy those unaware of life's Royal Secret. And that secret is this; the

human mind holds the power to directly affect events, the material world, and other living organisms including other men. In a word the Royal Secret is.....MAJIK!

Although it maybe performed without knowledge of it the true Kabalah acts as a facilitator and an enhancement to the skill of the conscious practitioner of Majik hence the title Adept (one who is skilled in a profession).

The Kabalah is to the Majikcian as mathematics is to the Architect; the better the Architect is at math the sturdier and more accurate his building turns out. The same goes for the Majikcian who possesses the true Kabalah; the more accurate and abundant his manifestations become.

Such is why Majik and the Kabalah are called sisters, the Daughters of God, the former His Secret, with the latter being His Wisdom.

Introduction to the True Sephra/Sefirot (The Tree of Life)

The usefulness of the Hebrew Sefirot seems so minimal and limited as to be determined useless to the aspirant of Majik and the occult Mysteries.

However most Jewish works on the Kabalah agree the most important part of their Kabalah is the 10 Sefirot.

1. Kether (Crown)
2. Chokhmah (Wisdom)
3. Binah (Understanding)
4. Chesed (Mercy)
5. Gebruah (Severity)
6. Tiforet (Beauty)
7. Nezach (Victory)
8. Hold (Splendor)
9. Yasod (Foundation)
10. Malkuth(Kingdom)

Or at the very least their the most highlighted subject within the major Jewish Kabalistic works.

Still the definitions given therein of these spheres elicit nothing to the Adepts other then ambiguous, vague concepts wrapped in flowery lingo.

I here however agree that true indeed the most integral portion of the Kabalah is the Sefirot only not as they have been presented publicly for centuries.

The secret to their nature lie in the Kybalion. Although this work also renders these 10 principles inoperable to she

or he who crave the mystery of Mysteries, it does divulge the most insightful hints as to the true Sefirot.

Now, how are these two works, the Kybalion and the Jewish Kabalah connected, one may ask?

Well the secret doctrine originating out of Kemet/Ancient Egypt was transmitted to the Greeks and Hebrews via the Kem priesthood anticipating Kem's fall from power. They veiled their secret science in the language and culture of these foreigners knowing they were the ones who would come to power in the coming years. Even initiating a few foreigners in order to preserve their secret doctrine, to be later unearthed and used in its purity by their descendants, the black man and woman of North America.

So the Jewish Kabalah is in turn the Greek Kybalion which is in turn Kemetic Principles personified as their Gods and Goddesses.

Jewish Kabalah	**Greek Kybalion**	**Kemet Gods & Goddesses**

Ain	**Desire**	**Asar**
Ainsof	**Power**	**Aset**
Ainsof Nor	**Wisdom**	**Heru**
Kether	**Mind/Mentalism**	**Amun**
Chokhma	**Positive**	**Nuit**
Binah	**Negative**	**Ptah**
Chesed	**Vibration**	**Thoth**
Gebruah	**Female**	**Maat**
Tiferet	**Male**	**Anubis**
Nezach	**Rhythm**	**Sekmet**
Hod	**Above/Cause**	**Hathor**
Yesod	**Below/Effect**	**Set**
Malkeith	**Idea/All**	**Ra**

(The student is encouraged to study all three doctrines.)

The Kem Hierophants knew a principal personified divulged the entirety of its secrets unto the ardent student/worshipper. To them all things were conscious and only divided by degrees of awareness. They knew themselves to be mere conglomerations of principles evolved to the point of self awareness. The Gods and Goddesses were no different.

Thus this following chapter detail these principles and their practical application within the true Kabalah and Heka/Majik.

Principles which are all various forms of Association, in fact this is what was being conveyed by the blending of the

Gods. Such as AmunRa, Amun and Ra or Noetically Mind and Idea.

"Association" is the common thread that runs through these fundamental dynamics of existence. We shall attempt to examine and prove its nature and importance before attempting the same with the principles or Noetics themselves.

Chapter Fourteen

ASSOCIATION: The essence of the True Kabalah

The mind is the maker of majik and Association its prime faculty even function. The mind ameliorates by associating ideas. Association means the mind identifies two or more ideas as synonymous. But is Association inherent in all areas of life? Let us see...

We learn to read by associating sounds with letters and words with things and concepts. We associate traumatic experiences with the irrelevant details surrounding the trauma. Those same details become triggers forcing us to

relive old horrors all over again. Or take for instance the sweet smelling perfume that sweeps us into nostalgia of our adolescent first date, momentarily losing ourselves in the revelry of a past love.

The mind is continuously associating and disassociating ideas. Its very health depends on its ability to have the world about it make sense to it. The mind grasp for meaning in the obscure and complex and becomes bored and dulled by the apparent and simple. At every level of its growth the mind craves meaning, from something as trivial as the definition to a word within a sentence, to something as grand as the meaning of life itself. To establish meaning is the very definition of Association.

Whether the Jungian synchronicity or the ancient Indian samscara or psychology's apophenia and pareidolia all of these slightly differing concepts may be summed up as various types of Association.

Humanity's eternal infatuation with music, poetry, and art rest on the science of Association due to the metaphors, similes, parables, and analogies communicated via speech and image.

Even empirical mathematics at its essence are established according to Association. One associated with another one give us two, two associated with one gives us

three & so on. The four symbols of operation in math are merely modes of Association.

For nothing escapes the law of Association. All is mind and Association Laws are its governing levers. Hence the Association Laws are naturally superior to empirical mathematics materialists hold in such high regard. They are the true Supreme Mathematics.

From social engineering, to the culture creating of Madison Avenue, to dog training and equestrianism in all these and more are the Laws of Association implemental and undoubtedly apparent.

In majik the laws are used to take advantage of the subconscious mind in the form of sigils, mantras, numbers, ceremony, ritual, and gesture. Aware of the associative tendency of the mind, the majikcian is careful about what he allows his or her mind to observe and absorb, so as to avoid unwanted fetishes, urges, and habits. And avoid giving birth to undesired events or attracting undesired people into one's sphere.

The Laws of Association should be held in the highest esteem especially by majikians and psychologist alike. And sense the mind is all physicist likewise should consider them in their work. Association upon closer inquiry seems too

intrinsic to life to simply be overlooked or taken lightly. The following are some of the Properties of the Laws of Association:

Each law demonstrates a fundamental relationship between the Mind & Idea, that which associates, (Mind) and that which is associated, (Idea).

Each law like a matryoshka doll, descend out of the other.

Each law possesses all the others within it.

Each law has a sister law i.e. Mind & Idea, Vibration & Rhythm, etc.

Each law when applied to a compound or formula details a fundamental characteristic of that compound or formula.

Each law is in fact a Noetic, an expression of intrinsic, ineffaceable, mental activity.

Though we have found many, The Order has yet to discover all the properties of the Laws/Noetics which very well may be infinite.

The Noetics create equations when combined with the four math operations that can be superimposed over compounds (created by the 40 Elements) as exponents.

The Noetics can be used as social engineering tools, self manipulation tools, and also serve as the preliminary prep work for Majik. These are the true sefirot that have been hidden in plain sight for centuries while also having their true definition hidden completely from the public for just as long.

Explanation of the Noetics/Sefirot

This writing will be an explanation of how the Noetics operate, their function and the Noetics in action. Their use within the Tootra Kabalistic System are as exponents for formulas, elements, and equations which represents actual events, actions, things, and people. And are explained further along in this work. A brief example:

However, at this junction in our teaching we will use dog training to illustrate each Noetic.

Take care to examine each Noetic with its corresponding dog training representation to clearly understand their practical application to spell work. Notice also how the association dynamic manifests itself within each dog training representation.

A Demonstration of the Noetics: 2008 Presidential Election

Before 2008 the Idea of having a black man as president of the United States within our lifetime was unimaginable by the majority of people on the planet.

Many would say we the people do not elect our leaders but that they are selected for us by an oligarchy.

This is indeed true, however in order for the farce of free and fair elections to work, to serve its purpose, the populace must believe they hold the power to choose their destiny, they must believe they have free choice.

Then why do the oligarchs go through such elaborate lengths to convince us the systems operates as claimed?

A grifter must be sure his victim is at no point in a long con aware that he is enveloped in a conman's game.

So too the powers that *"should not be"* must make sure the public always has **confidence** in them and the system. Voting informs them, the oligarchs, the public is still sleep, unaware, and unalarmed and thus unwilling to act against them and their subversive agendas.

Here in the following are theoretical demonstrations of the possibilities of the Noetics, allowing insight into the

power of the Noetics specifically and the T.K. system in general. By communicating an event we are all familiar with.

Tactics and techniques used by the oligarchs to socially engineer events. The danger and threat the Noetics pose to civil society will become apparent if not already. The Noetics involved in making Barack Obama, President.

Note to reader: See the 7 Foundations and the 40 Elements ch. for further explanation of equations.

0 Idea Demonstrative:

The first African

American President of the U.S.

0 Exponent Equation: ^{0}(>D5 ♂ /<D8 ♂)

0 Idea

Explanation: The Idea being the desired goal we take into account the anti-black history of the United States and the >D5 low status Black Americans historically hold in this country make a man of little power and influence the person with the highest social

D8 status in the world *"leader of the* < ♂ *Free World"* with power over hundreds of millions. This is the Idea of the Goal.

---

1 Mind Demonstrative:

The American Masses

1 Exponent Equation: ^{1}(D9 ♀)

1 Mind ♀

Explanation: The Masses of Americans are the ones who are targeted for acceptance of the Idea. Their mind's are the soil the seed is being planted into.

---

2 Positive Demonstrative:

A candidate who is part black but half white.

Who is charismatic, articulate, and educated in the highest institutions. A community

organizer but non-radical and non-militant.

Family orientated and promising change.

His Presidency would clean up America's

racist image.

2 Exponent Equation: $^{2}(>D5^{v} + <C2^{\wedge})$

2 Positive

Explanation: The white majority looks favorably upon the attributes attached to Obama's image; serving the purpose of invoking positive emotions in the minority communities also.

---

3 Negative Demonstrative:

Prior President G.W. Bush

Under whose leadership the

Economy crashed, the first

Foreign attack on U.S.

Soil happened, suspicious election,

Inarticulate when in press conferences, etc.

3 Exponent Equation: $^{3}(<D5 + C3^{\wedge})$

3 Negative

Explanation: By associating the white male, the world's most privileged image, with frowned upon, even anger invoking characteristics, we diminish positive sentiment the white male image has usually garnered thereby raising the appeal of Barack Obama.

---

4 Vibration Demonstrative:

Social media, surveys, and polls, allow campaign managers and handlers to know how to tweak and adjust accordingly their push for the initial Idea.

4 Exponent Equation: $^{4}(D5\ ☽ + 1\ ♀)^{\wedge}$

4 Vibration

Explanation: Ways to assess the impact and impression of Obama on the Minds of the people.

---

5 Female Demonstrative:

Due to a high living standard expected in American society the general public is extremely insecure with self esteem and image issues (i.e. botox, plastic surgery, lipo, social media filters, etc.)

Hence they need personalities to idolize.

5 Exponent Equation: $^{5}(B3,C3)\,♀$

5 Female

Explanation: The American public is deeply plagued by psychological issues and is emotionally unstable (i.e. mass shootings). This makes the people extremely susceptible to the manipulative machinations of the mentally more powerful few.

---

6 Male Demonstrative:

The T.V. show *"24"* with a white male character,

Jack Bower, supporting and protecting a

black president. Obama choosing Biden

(a white male) as a running mate sending

the message, Obama's safe, white friendly,

and poses no threat to the usual modus

operandum of America

6 Exponent Equation: ^{6}(D8>)

6 Male

Explanation: The white majority is receiving the message their core notions reaffirmed through these small gestures and dog whistles.

---

7 Rhythm Demonstrative:

Constant news coverage t.v. shows featuring

Obama themed episodes, music videos, actor and

actresses advocacy, politicians and political pundits

reiterating the Idea of an Obama presidency. **7**

Exponent Equation: ^{7}(>D9/<D8)

7 Rhythm

Explanation: Bombarding the public repeatedly with the general idea of a black president and the more specific idea of an Obama Presidency to acclimate and condition them to the idea.

---

8 Above/Cause Demonstrative:

Prior to the arrival of President Barack Obama and First Lady Michelle the highest positions held by any blacks were Secretary of State and Secretary of Defense Colin Powell and Condoleezza Rice, who physically favored Barack and Michelle.

8 Exponent Equation: $^{8}(<D5^{\sigma}, <D6^{\sigma})$

8 Above/Cause

Explanation: The ability to correspond the image of Michelle and Barack with the images of Condoleezza and Powell was imperative to the bestowing

normalization and political capital
onto the image of Barack and
Michelle.

---

9 Below/Effect Demonstrative:

Barack and Michelle seen,

envisioned and thought of as

President and First Lady.

9 Exponent Equation: ^{9}(^D5♂ , ^D6♂)

9 Below/Effect
Explanation: The image conjured in the minds of the masses of a black man and woman in a position of power was assisted by the close proximity and likenesses to Colin Powell and Condoleezza Rice.

A Demonstration of the Noetics: Trans Atlantic Slavery

No doubt the Noetics are perfect social engineering tools, the keys to conditioning human behavior. Nothing illustrates and drives this point home more then The Willie Lynch Letter and The Making of a Slave of 1712.

Some psuedo scholars with psuedo degrees from psuedo universities regard the Willie Lynch Letter as a relevant yet not a genuine dissertation but presumably written in more recent times then dated as.

This notion is of no concern to us. Whether authentic or not, though the fruit is visibly evident throughout today's society, the principles and procedures espoused in the document is our interest.

By showing how the Noetics are demonstrated in the letter and used to enslave and subjugate black people we simultaneously insinuated the treatments to remedy and reverse Lynch's machinations and methods.

0 Idea Demonstrative:

A totally compliant, obedient submissive race.

0 Exponent Equation:

^{0}[(>D5, >D6) ☽ +D9) - ♂ (D, ♎ ♏ ♍ P,

W)]

0 Idea

Explanation: The men and women of a race in fourth or fifth class conditions, lacking the will, ability, and know how to acquire and pursue power and influence and control are perfect for perpetual slavery.

---

1 Mind Demonstrative:

The minds of a group of free, cohesive,

and empowered people.

1 Exponent Equation: $^{1}(<D5, <D6)\,♀\,♂ + D8)$

1Mind

Explanation: A race of men and women with generations of culture and tradition through which they are self empowered as sovereign families and nations. Their minds are the targets for the Idea.

---

2 Positive Demonstrative:

Light skin, female, the elderly,
large plantations, food, the house,

no beating, lynching, or torturing.

2 Exponent Equation: $^{2}(C2 + D2)$

2 Positive
Explanation: Rewarding certain characteristics as incentives for compliance for the maintenance of control and manipulation over the would be slaves.

---

3 Negative Demonstrative:

Darker skin, male, youth, small plantations,

Starved, in the fields, beaten, tortured, and lynched.

3 Exponent Equation: $^{3}(C3 + D3)$

3 Negative
Explanation: Penalizing and punishing those characteristics undesired by the enslavers as an incentive for compliance and deterrents from non-compliance and non-submission.

4 Vibration Demonstrative:

Extremely torturous practices of cutting open the stomachs of pregnant women and tying the limbs of the men to horses to rip him apart. Whipping to the point of death, etc.

4 Exponent Equation: $^{4}[(<D5, <D6) \times <D3 + <C3]$

4 Vibration

Explanation: Cause intense, chronic, trauma designed to imbed itself into the very soul, mind and blood of the would be enslaved race so that trauma can be inherited by the offspring who are your true goal and objective.

---

5 Female Demonstrative:

The natural mind of the female is to have a strong dependency on the male for

protection and provision for herself and

offspring making the female the key to the

enslavement of that race.

5 Exponent Equation: ^{5}(B2,D2)

5 Female

Explanation: Taking into account the natural tendencies of the male and female mentality it becomes quite apparent that she, the female, is the doorway and key to making slaves out of a free and sovereign race, since the woman is both the glue of the family unit but the emotionally weakest of household heads.

---

6 Male Demonstrative:

Buck Break/Rape, torture the strongest male

among the group in the presence of all the women.

6 Exponent Equation: ^{6}(<D6 + <D3 = ^{v}D6♂)

6 Male

Explanation: To create division in the family units

by destroying the masculine image of the male in the mind of the female and the overall troop morale of the race.

---

7 Rhythm Demonstrative:

Chronic and repeated, torture, rape, degradation, and routine humiliation under horrid conditions.

7 Exponent Equation: $^{7}(<D5,<D6\ ♀ \times D3 + D9)$

7 Rhythm

Explanation: Constant terror attacks, assaults and torture murder causing traumatic chronic stress, weakening resolve and conviction as time passes. Quashing any and all thoughts or plans of rebellion.

---

8 Above/Cause Demonstrative:

Equestrianism, dog training as a

symbol and analogy of the breaking of

the people and their race.

8 Exponent Equation: $^{8}[>D9 = ♉(D5, D6)\ ☽]$

8 Above/Cause

Explanation: Using animals as an analogy and example of the breaking process applied to a particular race in order to create distance and space between the enslaving race and the enslaved and make the enslaved synonymous to animals in the minds of both the enslaved and enslavers.

---

9 Below/Effect Demonstrative:

A broken slave race.

9 Exponent Equation: $^{9}(>D5, >D6)\ ☽ + <D9$

9 Below/Effect

Explanation: A mental image of the race as an inferior subhuman, submissive, subservient, group in their own minds, by nature in any and all minds that think of them is essential

for the manifestation of the Prime Idea/Desire, a race of perpetual slaves.

Chapter Fifteen

An Elaboration of the Noetics

The Noetics, the Sefirot, the Keys to the Kingdom of Heaven, the Neters, the Kybalion… Whatever you may call them no set of principles are as significant to humanity as these. The dance between Mind and Idea are the essence of Creation; fundamental to existence. The hypnotizing movements of that dance is captured in the Noetics.

Understanding these principles bestows power and knowledge unobtainable by any other means. Of God's gifts to man nothing shows the immensity of his generosity like these 10. Their simplicity makes them easily overlooked for their inherent wisdom if only by the simple of Mind. Yet the intricacies of their properties can tear at the most robust of Minds. They are Mysteries with Secrets. Volumes can be written on each one and still all their secrets would not be divulged, secrets that lie within their relationships to each other.

Each Noetic possesses all the others within it. Each Noetic has its counter part or its complimentary. They let us know how we are being manipulated and conditioned.

In short they are not only worthy of our investigation but also and maybe even more so worthy of our adoration. For they are the levers to our own nature of which we may take control of or continue to leave it in the hands of others with their own self interest at heart.

1. ***Mind*** is awareness, it is attention; projected on to itself or outward on to other then itself. In both cases information/Ideas is it's life blood. Processing information is another of its functions. It is here at this point the dynamic of Association allows the Mind to organize the information it has observed and absorbed creating data or further reference points for its reserve. The Mind has many layers like an onion, Minds within a Mind. All is Mind, meaning everything is a Mind and truly there is but only one Mind. It is unknowable, unable to be grasped totally and without form. Everything differs from one another only by degrees of awareness/consciousness. Plants are aware of your mood and music. Lions and bears show compassion

amongst their species and interspecies it has been witnessed. The red and white blood cells each know their job. The electron moves as a wave or a particle according to the awareness of the Mind observing it.
How does something as tiny as an ant know to scrabble for its life when sensing the smashing fist for the ant is cognizant of its own mortality. The awareness the Mind is aware of is called the conscious Mind. That awareness the Mind is unaware of is called the subconscious Mind. The formation of that awareness is the Voice of the Self. There are layers of awareness along with the Ego, the persona, the personality even the group Mind.

2. ***Positive*** is an Idea the Mind is attracted to, meaning the Mind is magnetically drawn to it. The Mind has little to no power to stop itself from entertaining this Idea. It does not matter whether the Idea is causing the Mind harm or pleasure, hinders it or propels it, makes it suffer or brings it joy.

The symbol only represents the Mind is attracted to entertaining the Idea.

There are Ideas that hurt to think about but prompts and draws our attention. Usually these Ideas are possible

outcomes we fear. This is different from Rhythm by it being self generated by the Mind itself because it is either a desire or fear. Rhythm is controlled and managed exposure of the Mind to an Idea. Positive on the other hand the Mind cannot help but be attracted to entertaining the Idea on its own initiative.

When a wife and caring mom expresses her concern for the safety of her college bound son to her loving husband and he replies, *"Oh honey, don't think of such things," "But I can't help but think…."* she says, the wife is expressing a Positive, not in the sense of it being some sort of benefit but in the sense of the Mind being unable to help but entertain the not so pleasant thought.

So the self (the small Joker) may not *"like"* to think about a thing but the Mind does *"like"* to think about it and this is what makes an Idea a Positive.

3. ***Negative*** is an Idea the Mind repels, an Idea the Mind is easily dismissive of or repulsed by. It is the Mind's inability to envision an Idea. The Self may fancy the Idea but the Mind rejects the Idea.

For example a person who sings solely for the joy of their own soul is told, *"You know you have a beautiful*

voice, you should become a performer, like even make albums and go on tours all over the world singing for people." "Nah," replies the doubtful, *"I'm too old plus I'm not as good as those other big time artists."* Destined to forever be a shower karaoke singer.

Or consider the hardcore drug addict who desperately wants to quit using but can't envision a life without using. In this case the thoughts that take up the majority of this person's mental activity are of the drug life. Any Ideas of a drug free life style comes from outside of the person themself like, *"Hey Robbie, you know you really need to quit this stuff and clean yourself up start a better life for yourself."* But the stopping, the better life ideas are immediately rejected by the addict's mind though he reply's sadly, *"Yeah I know man."* So he himself may want to stop but his Mind does not accept the Idea of stopping. Making this Idea a Negative according to T.K.S (The Tootra Kabalistic System).

Take for instance a lover who casually dismisses the Idea that their beloved has been unfaithful. Though there's hard evidence supporting such an Idea.

Here the Self does not want a thing to be, so the Mind repels this Idea.

4. ***Vibration*** is an Idea's resonation with the Mind. Vibration depends on the intensity, immensity or instantaneousness or extremeness of the Idea. For instance a picture of a celebrity on the cover of a popular tabloid may not impact us in as much as the same image painted on the side of a 60 story building in Time Square. The words *"Good Morning"* can be said with sadness behind it or with a contagious infectious glee and not even in person but over the phone. In both cases the *"Vibe"* is noticed and felt.

Every Idea has its own Vibratory signature or frequency, similar to a Hertz (Hz) unit of measurement. Its unique Vibratory signature deriving from its impression upon the Universal Mind and also a Vibratory signature derived from its impressions upon individual Minds that entertained it and with each Mind having a different impression of that Idea.

So there are two impressions here the first upon the Mind of God, the second upon the Mind of the individual.

The Mind receives the Idea how it was given. A woman sexually assaulted by an individual in a clown outfit may never feel the same way about clowns as she did prior to the attack.

Clown outfits have a very high resonation in her Mind, because it is now associated with a traumatizing event that was acted out on her. It has become a samskara, a psychological imprint.

Just as the perfume of our great grannie, who gave us chocolates when we visited, can become imprinted onto our Minds.

5. ***Female*** is the Idea(s) a Mind is composed of. A Mind identifies itself partly by the information/Ideas that surround it and partly by the information/Ideas that originate from within. This maybe the psychological and behavioral tendencies of a person; their character, persona, genetic propensity, and ego. The colloquialism, *"We are each the sum or total of our experiences,"* epitomizes this Noetic. These Ideas create self image, the light or shades by which one sees themself.

The number of people that change from the religion of which they were born into is small compared to those

who continue to practice the religion they were raised with because it is part of their self image/identity. Even a person's logic gets filtered through the female, Ideas that make up the way we see the world.

Female is the foundation of our ego states. This is the goal of spell casting to make other's identify with Ideas that originate from the Majikian so that the target, he or she, has become a vessel for the will of the Majikian.

6. ***Male*** an Idea that makes up and is a part of a larger Idea. The component Idea and the components of an Idea. All Ideas are themselves part of larger Ideas.

There is the Planet then there is the solar system then there is the galaxy, then the Universe.

There is the subatomic particle/wave, the electron then the entire atom, the elements and molecules that make up DNA which make up cells which come together to compose the organism.

This Noetic insinuates infinitude; begging the question of where does this sort of matryoshkaism begin and end? Such a question has no answer, leading us everywhere we wind up nowhere. Due to the Mind's

inability to grasp infinity. For the scarab cannot make order out of this chaos. Reason fails in the face of the infinite. The Noetic tells us that no Idea is truly a stand alone, that Ideas are constantly being re-associated to other Ideas that are not its origin. These false associations are of little concern to the Tootrian except for their effects on the Mind.

7. ***Rhythm*** is the rate and pattern to which a Mind is exposed to an Idea. We've all heard songs that we weren't initially fond of but because the radio stations spin the record over and over two months later we find ourselves in the car on our way to work singing along.

The desensitization to violence such as school shootings or police brutalizing black people is caused by the repeated exposure of the Mind to the Idea via main stream and social media. Rhythm also has a noumena aspect to it because calling to Mind an Idea is also exposure or a reintroduction to the Idea in question, having similar effects as an outside stimuli. The exposure doesn't need to be chronic or constant, in fact in most cases it should not be. However, there should be a pattern or routine to the Idea exposure. The Idea's

power of effectiveness lie in consistent pattern and routine.

8. ***Above/Cause*** is the Idea that triggers an Idea to Mind. The Mind associating Ideas cannot be totally avoided but merely managed. Because to make associations is a natural inescapable tendency of the Mind. In fact stir crazy and boredom are the effects of this function being under used. Over use causes madness and confusion.

An above/cause can trigger a thought and emotion that then pushes us into action. Every cause is an effect of a prior cause. Every above is the below of a higher above. Above and cause are synonymous.

To investigate what the cause of something is, is to establish priority to establish the dominate factor(s)of an Idea, determining the controlling factor of any Idea is extreme power.

An above/cause can be a symbol and mechanism when concerning mental association, these two become one.

9. ***Below/effect*** is the idea brought to Mind by another. It is the transportation from one thought to another with each being a world to be explored, dwelled on, and lived in. Below/Effect Ideas are establishments, some of which are to be merely considered and pondered momentarily. Some stay with us becoming part of our identity and self image. It is these Ideas we fight to have reaffirmed by the outside world, our mental stability cannot do without these type of Ideas once they have attached themselves to our self image in our Minds.

The exponent of *"9"* is to identify an Idea as having been brought about by a previous (8) above/cause Idea. The conclusions we reach, the notions that time and experience mold in our Mind, our internal constitution we claim to live by (and believe others should live by), whether wrong or right all of these are below/effects.

Every below/effect will inevitably be the above/cause of some other below/effect. Samskara, psychological imprints left by experiences, apophenia, to mistakenly perceive connections and meaning between unrelated things and pareidolia to interpret a

vague stimulus as something familiar to the observer, are all examples of below/effects.

0. Idea is anything in or outside the Mind. There are an infinite number of Ideas. Ideas are not solely those things that exist only in the Mind, nor do they cease being Ideas upon manifesting into the physical world.Ideas are themselves alive, living things programmed to fulfill their purpose.An Idea can just as much be in possession of the Mind of a man as a Man's Mind can be in possession of an

Idea.

Ideas feed off the energy of its host. Ideas also feed the Mind that holds it. Between the two there is an energy exchange. Though this is not always the case.

Note to reader: When applying or using the Noetics first establish the Idea (0) which is the Goal, the vision, the desire. Second establish the Mind(s)(1) who need to accept,entertain, and apply the Idea (0). The Idea (0) is the goal and the Mind (1) is the target.

The 10 Noetics

This lesson is to be memorized verbatim

1. **Mind -** The various degrees of awareness that processes, stores, outputs, and intakes Ideas ie. information and energy.

2. **Positive -** An Idea the Mind has an affinity for and attracted toward.

3. **Negative -** An Idea the Mind is adverse to and repelled by.

4. **Vibration -** The degree to which an Idea resonates with the Mind, its impression on the Mind. The vibratory signature unique to an Idea.

5. **Female -** A Mind impregnated with an Idea, the

Ideals a Mind is composed of.

6. **Male -** An Idea impregnated with another Idea, the

Ideas an Idea is composed of.

7. **Rhythm -** The rate and pattern a Mind is

exposed to an Idea there by entraining and conditioning it.

8. **Above/Cause -** An Idea that triggers a different

Idea then its self to come to Mind.

9. **Below/Effect -** The Idea brought to Mind by an

Above/Cause Idea or trigger.

0. **Idea -** All things in and outside the Mind.

Chapter Sixteen

Introduction to Association Equations

The mathematical relationships as created between the Noetics are immutable Laws of Association.

Below we present a few of these laws, no doubt the studious will discover more laws.

But first the mathematical symbols shown here are to be used to express relations between Noetics.

Mathematical Symbols

1. ⊂ is contained in
2. - Conversion/ or turn into
3. = Equal or results in
4. ^ Increases
5. ∨ Decreases
6. > Greater Than
7. < Less Than
8. ≠ Not identical with
9. ≧ Greater than or equal to.
10. ≦ Lesser than or equal to.
11. ≈ Nearly equal
12. ( ) Grouped as a single

Four Mathematical Operations

♥ = (+) Addition denotes two Ideas are being associated with one another.

♠ = (-) Subtraction is the Mind disassociating Ideas.

♣ = (÷) Division means Ideas are in opposition to one another.

♦ = (x) Multiplication Ideas are exacerbated by the other.

Association Equations

^1 = ^4 = ^7: An increase (^) in observation/attention (Mind-1) on an Idea consequentially increases the impression (vibration - 4) that Idea has on the observing Mind, which in turn increases the Mind's exposure to the Idea (Rhythm - 7) in the form of recall or reoccurring memory.

---

^7 = ^2: An increase (^) in exposure to an Idea (Rhythm - 7) will result in the Mind growing (^) an affinity for the Idea (Positive - 2)

⩓7 = ˅2/^3: Too much of an increase too fast (⩓) of a Mind's exposure to an Idea (Rhythm - 7) will result in a decrease (˅) in the Mind's affinity (Positive - 2) toward the Idea and an increase (^) in the Mind's aversion (Negative - 3) toward the Idea, converting (/) a positive - 2 into a Negative - 3 considering it is the same Mind and Idea throughout the Operation.

3^{7}=˅3: Repeated exposure (Rhythm - 7) to a Negative - 3 will decrease (˅) the Mind's aversion toward that Idea, considering it is the same Mind and Idea throughout this operation.

2^{7}=˅2: Repeated exposure (Rhythm - 7) to a Positive - 2 will decrease (˅) the Mind's affinity toward that Idea, considering it is the same Mind and Idea throughout this operation.

$(0 + 0)^1 = 8 + 9$: Within the Mind (1) observing an Idea (0) associated (+) with another Idea (0) will produce a trigger (8) and an effect Idea (9).

$(1 + 0)^7 = 5 \quad 5 = (1^1 + 0)$: A Mind (1) exposed repeatedly (Rhythm - 7) to seeing itself associated (+) with an Idea (0) will make that Idea apart of its personality/ego/internal constitution/subconscious.

$(1 + 2)^7$: Creating self esteem/happiness/contentment. A Mind associating itself with a positive Idea repeatedly.

$(1 + 3)^7$: Creating melancholy/low self esteem/sadness. A Mind associating itself with a Negative Idea repeatedly.

$(0 + 8)^7$ 8 - 9 = 9 ≠ 9 + 8: Repeated (7) association (+) of an Idea (0) with an Idea that is a trigger (8) will result in it (8) becoming associated (+) with a new (≠) effect Idea (- 9).

$(4<)^7/(4>)^1$: If a Mind repeatedly observes (7) an Idea that is of low resonance (4<) it (1) will eventually observe the same Idea as a greater resonance (4>).

1^1+0 = 0^: An Idea (0) associated (+) with the subconscious (1^1) will manifest. (^)Represents amount and speed of manifestation.

---

1 + 0 = $0^{\vee}$: Mind (1) associated (+) with an Idea (0) results in the manifestation of that Idea (0). (∨) Represents amount and speed of manifestation.

1^1 +3 = 3^: The Subconscious Mind (1^1) associated (+) with an Idea its adverse to (3) will manifest the negative Idea (3)

1^{1} + 3^ = 5^{3}: The Subconscious Mind (1^{1}) associated (+) with an Idea it is extremely adverse toward (3^) will cause trauma to the psyche (5^{3})

Chapter Seventeen

Introduction to the 40 Elements

Though the Noetics are the essential foundations of the entirety of our reality, they project themselves throughout the 4 worlds.

The 4 Worlds are the spiritual, mental, emotional and physical.

These worlds are not worlds as in planets but dimensions and just as our physical universe is infinite so are the dimensions also infinite in scope. They blend, coalesce and intermingle. All things in the physical world have their corresponding counter parts in the other 3 worlds. With the spiritual world being the root of the lesser three and vibration is the mode of travel of self aware consciousness between the worlds.

Manifesting the circumstances and situations stored onto the spiritual hard drive (The Akashic Records) that acts as the hard drive for infinite probable outcomes or infinite possibilities. In this way our operations as Majikians are like typing commands into a computer only instead of 1s and 0s represented by electrons in logic gates, this spiritual

computer responds to energy outputs of subatomic strings of consciousness in the form of vibrations.

The Elements are a composite of the 4 worlds combined with the Noetics. These combinations create 40 categories of which all basic/fundamental phenomena and noumena can be placed under.

These elements will be the foundations to the equations and formulas that make up the Maje's spell operations.

The 40 Elements

A1- ***Spiritual Mind*** at the highest degree is the 1st CAUSE of all causes, The Divine Mind commonly known as God who birthed all ideas, whom is within all & whom all is within. On the other hand men can be spiritual minded indeed in our true identity we are a spirit mind. However we usually are blind to our true selves because of our lower appetites and passions. To be spiritual minded means to be connected to the spirit world, to have insight into the spirit realm to know the Divine the Ultimate purpose of a thing, matter, or person, the absorbing of spiritual information, being in tune with the spirit of a thing, or when the Holy Spirit is the driver of one's actions and decisions.

A2- ***Spiritual Positive*** is that which helps evolve the soul, brings it closer to God, to being God & also puts the soul at peace, undisturbed, & tranquil, at ease. It agrees with one's religious or spiritual constitution. It is truth that reinforces or reaffirms one's spiritual beliefs, a moral lesson, virtue.

A3- ***Spiritual Negative*** is that which either disturbs the soul and or hinders the soul's spiritual evolution. Spirits that intend to harm, hurt, or cause pain and fear to the soul. That which the soul is task to come to grips with however causing it turmoil. Vice.

A4- ***Spiritual Vibration*** is aether energy, psychic energy. It is the base energy to all other energies, the frequency denoting a thing's purpose in the Grand Scheme of things, the aura.

A5- ***Spiritual Female*** is the souls yearning for spiritual content necessary to evolve it, the portion of the soul that knows what it needs to grow spiritually, protects, and nurtures the soul, as a spiritual womb or matrix of sorts, archetypically the Divine Mother or Amma of the 1st CAUSE.

A6- ***Spiritual Male*** is spiritual practices and precepts that are stern and austere, that puts the soul through test and trial for the sake of its evolution. Archetypically the Heavenly Father, Abba in Hebrew, portion of the 1st CAUSE, the deliver, transmitter of spiritual influence.

A7- ***Spiritual Rhythm*** is the ups and downs of life, one's spiritual journey through life as in one's natal chart or destiny.

A8- ***Spiritual Above*** is the inner meaning of a thing, the Mysteries of the inner sanctum and those who have been initiated into such, the true reality of a matter, the esoteric. An advanced soul highly evolved. It is high morals and ethics.

A9- ***Spiritual Below*** is outer meaning, the symbols that represents the higher or inner truth but it itself is empty and false, an inferior soul capable of only grasping the exoteric meaning of things, the uninitiated masses. Low morals and ethics.

A10- ***Spiritual Idea*** is the manifestation of spiritual matters like the state of the soul, the True Self, all things pertaining to the spirit and the spirit world, a totally spiritual idea, an idea that is spirit, existing exclusively in the Akashic. The Akashic records is the database from where all Ideas derive and are stored, It is the Mind of God. It is the spiritual aspect of the thing.

B1- ***Mental Mind*** is where the ego lies all memories and past experiences that have contributed to the personality is stored here. Processing information for the sake of continuously coming to conclusions concerned strictly with analyzing. Decision and action driven by stoical logic.

B2- ***Mental Positive*** is to be mentally stable, mental clarity, optimistic out look, sane, and enlightened thought, benevolent, altruistic, thinking.

B3- ***Mental Negative*** is to be confused and indecisive. A thought that disturbs one's mental state cognitive dissonance, insanity, a pessimistic outlook, malicious thinking.

B4- ***Mental Vibration*** is the energy resonating from one's mind, psychic energy. Manifesting as the electromagnetic waves emitted by the brain. Indicates the psychic states alpha, beta, delta, or theta. The degree with which a thought resonates with the mind its unique vibratory signature.

B5- ***Mental Female*** is right brain thinking, open mindedness, imaginative, creative, the subconscious mind.

B6- ***Mental Male*** is left brain thinking, rigid, closed minded, logical, and critical, the conscious mind.

B7- ***Mental Rhythm*** is one's thought pattern, transition from one ego state to another, how often a particular thought occurs in one's mind.

B8- ***Mental Above*** is the comprehension and contemplation of complex matters, pondering issues of importance, lofty ideals, a high I.Q., astute intelligence, smart, or brilliant mind.

B9- ***Mental Below*** is the incapacity for comprehension. It is simplistic matters menial matters of low importance and the pondering of such matters.

B10- ***Mental Idea*** is an idea perceived as being exclusively of the mind manifested solely in the mental world or solely in the mind. It is the mental aspect of a thing.

C1- ***Emotional Mind*** is awareness of feelings, whether one's own or others, when emotions drive one's decisions and actions, the ability to sort through one's emotions, emotional intelligence.

C2- ***Emotional Positive*** is feelings of happiness, joy, elation, calm, and tranquility, pleasurable emotions, love, comradery.

C3- ***Emotional Negative*** is feelings of heartache, sadness, anger, resentment, contempt, mixed emotions, loneliness, hate, etc.

C4- ***Emotional Vibration*** is the *"feeling"* energy emitted by a person, thing, or event. Ambiance or general mood of a person, thing, place or event, its aura.

C5- ***Emotional Female*** is compassion, sympathy, unconditional acceptance, sensuality, feelings feminine in character.

C6- ***Emotional Male*** is aggression, pride, dominant, feelings masculine in character.

C7- ***Emotional Rhythm*** is mood swings, the pattern or sequence of feelings projected, an emotional roller coaster.

C8- ***Emotional Above*** is the feelings brought about by enlightenment causing one to be above the usual emotions felt by the common masses. It is emotional resolve, the feelings caused by a healed soul or psyche, usually indescribable to the common mind, the feeling that comes with having control over one's own lower emotions.

C9- ***Emotional Below*** is to be overwhelmed and controlled by way of emotions.

C10- ***Emotional Idea*** is the sheath of an Idea, the figurative smell, or ambiance an Idea carries, like waking from a dream and not remembering it but still sensing or feeling its presence. It is the emotional aspect of a thing.

D1- ***Physical Mind*** is the brain organ. The vehicle through which the impalpable mind acts through, the hardware hosting the software, computers, calculators, and other artificial intelligent machines. The physical body and cellular make up.

D2- ***Physical Positive*** is the parts of a thing that compliments one another causing it to function and operate according to its designed purpose, order and symmetrical things.

D3- ***Physical Negative*** is misplaced or out of sync parts causing a thing to become dysfunctional according to its designed purpose. Disorder which causes disease and sickness, out of place, or unsymmetrical things.

D4- ***Physical Vibration*** is light, sound, radiation, gamma waves, etc., the electromagnetism or heatwave signature of a thing, particle oscillation.

D5- ***Physical Female*** is a woman, the female of a species, an orifice, hole, receptacle, receiver, the womb, nurturer or facilitator of the seed like soil.

D6- ***Physical Male*** is man, the male of a species, phallus, appendage, transmitter, deliverer or the seed.

D7- ***Physical Rhythm*** is music, time (matter in motion through space), dance, song, sex, exercise, or any routine or pattern made by a series of physical movements.

D8- ***Physical Above*** is upward distance, heights, degrees of height, things of good quality material well put together or of a high grade, the social haves or the person of high social status.

D9- ***Physical Below*** is that which is under something else's height, a thing of low quality, low physical integrity, poorly put together material, or of a low grade, societal have nots, persons of low social status.

D10- ***Physical Idea*** is an idea that is entirely physical, manifested in the physical world. It is dead matter, the physical aspect of a thing.

Chapter Eighteen

Introduction to The 7 Foundations

We speak of having ambition in life, of the Will to live, living life with a purpose, or the drive of mankind and love being the thing that holds the universe together.

What do all of these everyday colloquialisms have in common? The Answer,….. they all are rooted in DESIRE. Will, ambition, purpose, drive, and love all require desire in order to be. It is their main ingredient. Just as all living things are dead without the will to live.

In fact we in our society with indignation rebuke and shun those who show a lack of ambition; who exhibit that foul smelling trait called laziness. *"DO! DO! DO!; GO! GO! GO!"* We even strive our darndest to combat the urge of inertia. Then we pressure the most precious amongst us with heavily loaded questions such as, *"What do you want to be when you grow up?"* We might as well be frantically screaming with a wide eyed crazed look, *"You must hurry child, find something anything to DO! Lest inertia sets in like a disease rotting you from the inside out with laziness. For then, you will be worthless, worthless I tell you."*

Now from face value such a statement looks to be a blackeye on our hyper ambitious society. Ah! But I beg your pardon dear Sir or Madame.

Yes indeed the zealous overshadowing parent has passed on a societal straight jacket to their beloved angel baby with the warm look of love and a caring caress. However, this fear goes much deeper then just society, its primordial. A primordial fear that indeed lies at the very essence of who we are.

What is life without purpose? Imagine for a moment having no will to eat, no desire to make love, no desire for company nor a desire for solitude, no will to know, nothing peeking your interest.

What is meant by the fanatical parent when she/he screamed through insinuation "*...worthless,"* actually meant… *"Lifeless." "You will be lifeless my child lost floating in the void, a never ending nothing."*

Desire in all its forms is an indispensable oxygen to the soul. It is the driving force of God Himself. It is what makes Him irresistible, pulling all things into Himself. While He Himself drives toward something higher.

He is the dot that creates a circle around Its self then colors that circle with Itself transforming the once small circle into a much larger version of His former self.

Yes the Buddhist have it right, we suffer because we desire but we can do nothing but desire. This is the symbol of the double headed phoenix representing the two main desires of the soul. One the desire to go back from which it originates, the bosom of the Father or two carry out the Father's *"will."* As is also the meaning behind the story of the prodigal son and is why he was his father's favorite though he was the *"Fuck Up"* of the two brothers. Luke 15:11-32.

Desire plays a vital role in our life; this can't be denied. It moves us, ameliorates us and causes us to accelerate the growth of those things around us.

Desire is primordial it moves all things all beings even God Himself. This primordial element broke itself into 7 lights, 7 versions or modes of itself. These seven orbs are apart of the inner make up of man. They radiate and create his aura, attracting somethings and repelling others, according to which lights are resonating the strongest. A vibration which man controls with his thoughts, more precisely can control with his thoughts. The aura both

transmits and receives signals from its environment so one's thoughts can be influenced via his or her aura.

The seven orbs or chakras as they are called in popular culture are hubs for ideas, visions and desires.

Each chakra is complimented by one of the 7 planets which energizes their corresponding chakra being responsible for how desires are expressed.

The chakras are composed of the energy of the 7 types of desires that is possible for man to have. Meaning any and all desires we as humans could ever possess corresponds with and fits inside of one of these seven categories.

A man's desire to be released from prison is actually a desire for power, influence, and control ♂ over his own life.

A man may want to become rich ♃ because he believes it will bring him companionship ☽.

In this case the want to be rich is a sub desire while the want of companionship is its prime desire. The former is identified by the sign of Jupiter ♃. The sign of Venus ♀ is the applicable symbol for the latter.

In the release from prison scenario the category it is in is not readily recognizable initially. So the intent or reason behind the idea must be discerned. Thus it becomes clear that a desire for freedom is a desire for power, control, and influence over one's own life.

The want for tranquility and peace is a desire of the 1st foundation, oneness with God. God is symbolized by the sun sign  .

Desire is an essential part of Majik because it is essentially who we are as human beings.

The 7 Foundations

This lesson is to be memorized verbatim.

 ***Unity with God*** is the 1st foundation. Its symbol is the Sun. Sunday is its day. Unity with God embodies an earnest search outwardly and inwardly for meaning, origin, and purpose in an effort to be and be with the 1st Cause. *"He who overcomes I will grant him to sit with Me on My Throne"* - Rev. 3:21

 ***Wisdom Insight Knowledge*** is the 2nd foundation. Its symbol is the Crescent. Monday is its day. Wisdom Insight Knowledge epitomizes the yearning for information, understanding, and discernment. *"He who over comes I will give him some of the hidden manna to eat."* - Rev. 2:17

 ***Life Vitality Health*** is the 3rd foundation. Its symbol is Mercury. Tuesday is its day. Life Vitality Health is a synopsis of the desire to feel alive and invigorated through sensations of pleasure and pain and all that life can offer. *"He who overcomes shall not be hurt by the second death."* - Rev. 2:11

 ***Companionship Love Friendship*** is the 4th foundation. Its symbol is Venus. Wednesday is its day. Companionship Love Friendship is a synopsis of longing for company whether spousal, platonic or group comradery. Physically, mentally, emotionally, and or spiritually. To be apart of a collective. *"He who overcomes I will make him a pillar in the Temple of God."* - Rev. 3:12

 ***Worldly Power Influence Control*** is the 5th foundation. Its symbol is Mars. Thursday is its day. Worldly Power Influence Control is the conspectus of imposing one's will over self, others, things and situations. *"He who overcomes I give the power to rule over nations."* -Rev. 2:26

 ***Material Greed Food Things*** is the 6th foundation. Its symbol is Jupiter. Its day is Friday. Material Greed Food Things is an abridgment of the desire for accumulating goods wealth and the tangible irregardless of want or need. *"He who overcomes I will give to him to eat from the Tree of Life."* -Rev. 2:7

 ***Lust Sex Reproduction*** is the 7th foundation. Its symbol is Saturn. Its day is Saturday. Lust Sex Reproduction is the compendium of the urge to not only replicate one's genes or satisfy one's lust but to ameliorate the species. Perpetuation of one's vibratory signature on a higher arch via sexual discharge. *"He who overcomes shall be clothed in white garments."* - Rev. 3:5

The above 7 correspond to the 7 chakras.

Chapter Nineteen

The Twelve Prerequisites for Creation

An Idea transferred from the Tree of Life (The Noetics) to the Tree of Knowledge (The Prerequisites) becomes a Desire. A Desire transferred from the Tree of Knowledge (The Prerequisites) to the Tree of Life (The Noetics) becomes an Idea and when operated on as a spell it is the Majikian's Vision.

The Tree of Knowledge is based on the three prerequisites of creating required even of God, Himself.

The Prerequisites for creating are Desire, Wisdom, and Power. Desire is the want or will to manifest the Idea. Wisdom is the know how, the Knowledge necessary for manifesting the Idea. Power is the ability to carry out and enact what is needed to manifest the Idea.

The Prerequisite process is the Tootrian's step by step mapping of an Operation. It lets us know at what point in the process does an act of Majik need to be injected.

A Desire/Idea inevitably brings along with it Wisdom and Power, makes necessary Wisdom and Power, all of which must be satisfied for the Idea to manifest. Any requisite that is unsatisfied becomes a Desire requisite that automatically creates subsequent Wisdom and Power requisite in regard to itself.

This and any afterwards are termed Sub-Desires, while the original is called the Prime Desire.

The process by which requisites are found to be satisfied or unsatisfied creates a Desire Tree similar to a Decision Tree used for creating learning algorithms for artificial intelligent machines or software (See page 236 Desire Tree).

Prerequisites or requisites are to be written and expressed as Kabalistic equations, formuli and compounds.

A twelve box matrix is made by crossing the requisites with their developmental tendencies illustrated by the secret symbols hidden in the twelve face cards of the fifty-two deck. Each requisite has a life cycle represented by these symbolic illustrations; the Swords of the Kings, the Flowers of the Queens, and the Hand Grip of the Jacks.

1. The Kings correspond to the prerequisite of Desire. The King of Clubs represents the sun rising by the half lit sword, the lines of which are light; meaning the beginning of a Desire, the want for a thing is just beginning to rise. This is symbolized by the Aries glyph to be used as the exponent of a compound, equation, or formula per the Tootra Kabalistic System.

2. The Sword fully lit held high above. The King of Hearts is the Sun at full strength of the day. Representing when the Desire or will for a thing is strong and virile. The zodiac glyph of Cancer is its exponent symbol.

3. The King of Spades is the Sun setting, shown by the weak line of light in the Sword analogous to one's Desire weakening or fading. The glyph of Libra is its symbol.

4. Night time is represented by the King of Diamonds due to the Sword being absent from hand. Meaning no Desire exist for the would be Idea. The sign of Capricorn is its exponent.

5. The Queen of Diamonds means birth, proven by the stem barely protruding from the Lady's hand. This means the Power or ability to fulfill the Desire has been birthed though it may not be easily noticed by most.

   Taurus is her glyph.

6. The Queen of Clubs represents adolescence by the protruding portion doubling its length from the hand. This means the Power/ability to facilitate an objective has noticeably progressed though not yet enough to be effective in regards to the Desire. Her glyph is Leo.

7. The Queen of Hearts represents the ability to be fully effective, in terms of the Desire. Shown by the tall strong standing stem she holds. Here the Symbol is the glyph of Scorpio.

8. In the hand of the Queen of Spades lies a whittling plant shows the capability and power that was once present is now waning. The motif exponent here is the Aquarius sign.

9. The Jack of Clubs means the know how or Wisdom on how to manifest the Desire is being learned and acquired as shown by his weak grip of the side bar. Sagittarius is its mathematical exponent.

10. The Jack of Diamond is signifying, with his slightly firmer grip the know how has become known though its application is not. The exponent is Virgo's sign.

11. The Jack of Spade's grip is now a grasp symbolizing understanding, a working knowledge of the manifestation pathway. It's exponent symbol is Gemini.

12. The Jack of Hearts, like the G.I. Joe toy with the kung fu grip, holds his tightly balled fist around a single flame or a leaf under a heart. This represents he has fully grasped the matter at hand and mastered the matter in question. Pisces is the sign used for the exponent.

Life Cycles of the Prerequisites

♈		♎	

			
			
			
			
			

Exemplification of the Requisites, Life Cycles, Compounds, Noetic, Binaries, Foundations, all making up an Equation and Formula:

D8 + ☽ ^☉

Ex. ♎ D^{A}_{1} = ^{0}(D8 +): A group of *"well to do"* with ^ ☉ an increase in wealth and material.

Ex. ♌P^{A}_{0} = ♈D^{B}_{1} = ^{0}(D8♀ ☉ ^☉ - =): The unsatisfied Prime Requisite becomes the Satisfied SubDesire Requisite.

D8♀ - ☉

The Company will sale, part with shares in order to ^ ☉ increase capital.

A Prerequisite Example Map

It may become quite apparent to the trained eye of the computer programmer resemblances between the requisites and learning algorithms written to train A.I.

In fact even the Noetics along with the entire T.K. System is applicable to machine learning.

Dare I say that this very system will be implemental in the creation of an A.I. capable of self awareness, but I digress.

Example:

The following scenario is a simplified example of a Desire Map. A map of the prerequisites, a series of events and info needed to take place in order that the Prime Desire maybe fulfilled, carving out a path to its manifestation.

Vector (a)

A). A company wants to manufacture a new product but it

Vector (b)

lacks the infrastructure to support this new venture; the company hires the brightest minds in that field to advise them. From the insight of these minds the company realizes it does not possess the capital needed for the endeavor. It

Vector (e)

then decides to sell stock, company shares, publically in

Vector (c)

order to raise capital. Having none amongst them experienced in I.P.O. launchings, the company hires an (d) ex C.F.O. of a top corporation to advise them. The

Vector (f)

company uses funds from its business account to hire the ex CFO I.P.O. expert.

Matrix Form of Tree:

The Matrix explains what Requisite has been Satisfied (1^s) and what Requisites are Unsatisfied (0^s). Each column is a vector.

The 12 Cycles of Life

This lesson is to be memorized verbatim.

1. The life cycle of Desire is like the 4 phases of the 24 hour day; Sunrise, Noontime, Sunset and Nighttime.

2. The life cycle of Power is like the 4 stages of a Man; Birth, Adolescence, Maturity, and Old Age.

3. The life cycle of Wisdom is like the 4 layers of Awareness; Learning, Knowing, Understanding, and Mastering. It is the only requisite without a death.

4. The rise of Desire is represented by the sign of Aries.

5. The full strength of Desire is represented by the sign of Cancer.

6. The weakening of Desire is represented by the sign of Libra.

7. The sign of Capricorn represents the absence and death of Desire.

8. The birth of Power is represented by the sign of Leo.

9. Power in its adolescence is represented by the sign of Aquarius.

10. The maturation of Power is represented by the sign of Scorpio.

11. The waning of Power is represented by the sign of Taurus.

12. The Learning of Wisdom is represented by the sign of Sagittarius.

13. The Knowing of Wisdom is represented by the sign of Virgo.

14. The Understanding of Wisdom is represented by the sign of Gemini.

15. The Mastering of Wisdom is represented by the Pisces sign.

16. A matrix is a rectangular array of numbers, symbols, or expressions arranged in rows and columns.

17. A vector is a row or column of numbers, symbols, and/or expressions.

Chapter Twenty

Introduction to the Kabalistic Kard Practice

This Kard Practice is a discipline designed to familiarize the initiate with the system, to ready him for the Tootra Kabalistic System (Kabalistic Kalculus). It is a training of sorts that if practiced consistently an hour a day for 3-1/2 years, spending 10 months and 2 weeks on each of the 4 degrees, one will have internalized the system and its principles so deeply he or she will not need the card's or book's presence but will be able to recognize these principles at play in the world about him without effort.

Kabalistic Kalculus

"Every Idea whatsoever can be and should be attributed to the Tree of Life. It must be learnt by heart; you must know it backwards forwards sideways and upside down; it must become the automatic background of all your thinking. You must keep handing everything that comes your way upon its proper bough. At first all this is dreadfully confusing but persist and a time will come when all the odd bits fit into the jigsaw and you will behold with adoring wonder the

marvelous beauty and symmetry of the Qabalistic System. And what a weapon you will have forged then. What power to analyze, to order, to manipulate your thinking! And please remember when people compliment you on your memory or the clarity of your thoughts to give credit to the Kabalah! But how to make it work? The mathematics of Addition and Multiplication." - Aleister Crowley, Magick without Tears, Ch. IV

"One is filled with admiration upon penetrating into the Sanctuary of the Kabalah, a doctrine so logical, so simple, and at the same time absolute… The trinity of words, letters, and numbers… THEOREMS more complete and luminous then those of Pythagoras…" -Albert Pike, Morals and Dogma

Kabalistic Kalculus consist of 8 parts each part functions in conjunction with the other. The purpose of the system is to enhance acts and performances of Majik. It is not known who originated the system exactly. The writer of this system did not develop Kabalistic Kalculus but is merely a discover of it. It is supposed to have originated out of Kemet where we know for sure the Mysteries (secret religious ceremonies)were first founded. So although the terms used

here be modern and contemporary the System its self remains ancient.

Kabalistic Kalculus may even pre-date the calculus taught in our schools and universities of today. For it is well known the one credited with the creation of this era's calculus, Sir Isaac Newton, studied the occult, the Kabalah and was a Freemason, developing our calculus of today from a much older version. An idea that is not at all far fetched due to the fact that both Astronomy and Chemistry derive from Astrology and Alchemy.

Kard Practice of the 1°

(Each card must be labeled accordingly)

1. Shuffle and cut the deck a few times (Jokers are to remain part of the deck)

2. Draw 3 cards from the top of the deck and lay side by side face up (if a Joker appears as the middle card replace it with another draw).

3. Write down the Element of the 1st card, then write down the Mathematical operation of the 2nd card (Clubs = Division; Spades = Subtraction; Hearts =

Addition; and Diamond = Multiplication) and Last the element of the 3rd Card.

4. Contemplate the Equation, based the definitions of both elements considering the Mathematical operation governing their interaction with one another. There is a truth, a piece of wisdom hidden in each Equation and with contemplation and meditation it will unveil its self.

5. Write down this wisdom in your best descriptive words. Example of a 1° Equation: D9 ÷ B1 = The

B1 **D9**

analyzation of one's lowly social circumstances gives one

÷

the ability to break up its harsh impact on his life requiring mental space and energy due to this impact, in other words a low enough social status pushes one to analyze his or her circumstances.

Kard Practice of the 2°

1. Shuffle and cut deck
2. Draw 3 from top
3. Write down equation
4. Instead of solving at this point pick the 7 Foundations Cards out of the deck
5. Shuffle and cut the Foundation deck then draw and flip 2 of the Foundations cards
6. Write the Foundations Symbol of the first of the 2 cards at the top right side of the first Element Symbol.
7. Next write the Foundations symbol of the second card at the top right side of the 2nd Element.
8. Now interpret the equation in light of these new factors. Example of a 2° Equation: D9 ☿ ÷ B1 ☽ =

The soul's yearning for a higher social status then the current one it inhabits is dissected by one's Mind and analyzed according to the information/inspired insight into his or her social circumstances.

Kard Practice of the 3°

1. Perform 1° and 2° Practices however before the interpretation step separate the 12 Prerequisite cards from the deck.
2. Shuffle and cut the 12 cards.
3. Draw 2 cards from this 12
4. Write the 1st card's requisite symbol on the upper left side of the 1st element symbol.
5. Write the symbol of the 2nd Prerequisite card on the upper left side of the 2nd Element symbol.
6. Now interpret the equation including the newly added factors into your interpretation. Example of a

3° Equation: ♍D9 ☿ ÷ ♓B1 ☽ = Using something of a physical nature like physical labor or even physical currency which the mind thinks of ways of obtaining as a way to escape or break poverty's hold on it. The control of one's own emotions as well as other people's is an essential that must be maintained throughout. Mental energy is divided among the issue of one's lowly social status.

Kard Practice of the 4°

1. Perform the 1°, 2°, and 3° practices, however prior to interpreting extract the 10 Associative cards in numerical order of any suit or mixture of suits, it matters not, they simply must be in numerical order.
2. Shuffle and cut the 10 then draw and flip 2 cards.
3. The 1st card's association symbol write down next to the 1st Element symbol on its lower right side 4. Now write down the 2nd card's symbol next to the 2nd Element symbol.
5. Now interpret using all 6 exponents. Example of a 4° equation: ♍D9 ☿ $_1$ ÷ ♓B1 ☽ $_8$= The first Compound ♍D9 ☿ $_1$ shows an idea or the thought of such effects the state of the Mind; The second Compound ♓B1 ☽ $_8$ shows an idea can be symbolized and used as a trigger intended to activate that which it is associated with. The second **(÷)** Compound has a ability to break up the stupor that the first Compound throws the mind into. Weakening and

breaking the life of the idea represented by the first compound.

Do not allow a goy or the uninitiated to even touch your Kabalistic Kard deck and do not use your deck for game, past time, or whimsical purposes but strictly for Kabalistic Practice. The reason for such extreme lengths is to imbed into the subconscious mind the clear message that these and this practice is to be taken with the utmost serious and solemn attitude. Then what the Goyim see for play and time wasting you will see as the workings of the Mechanics of the Universe.

How to label a deck Kabalisticly

For the Laws of Association from Ace to 10 of each suit is to be taken as the numerical symbols (1-10). Thus there is no need to for any label for the Laws of Association Cards, they already are so.

Kard Practice of the 5°: The Trinity of

Occurrence

The Trinity of Occurrence is a training practice used for bettering the Tootrians understanding of the Manifestation Prerequisites and enhancing his skill at using them. It is a practice for what he may need to do in his Operations and apply to his Operations.

1. Separate the cards into two decks, one made solely of the 40 elements and the other made up of the 12 Prerequisites (Leave the Jokers out of each).
2. Shuffle the Prerequisites Cards until satisfied they are thoroughly mixed up.
3. Draw and flip the top card, write down the requisite symbol of the flipped card.
4. Find out what world the card is apart of, Spiritual, Mental, Emotional or Physical; Write down its sister requisites in triangle form with the desire requisites as the head.
5. Shuffle the 40 deck and draw and flip the top card then write its element on the side of the 1st requisite drawn.

Repeat this step two more times and write down the Elements next to the blank requisites.

6. Separate the Foundations cards and shuffle til satisfied then draw from top of deck and write the Foundations Symbol next to the first requisite and first element drawn.

Repeat this two more times with the next two incomplete requisites.

7. Utilizing the definitions of the requisites, elements and epitomes proceed to interpret each compound forming the Trinity of Occurrence.

This practice is based on the idea that God created all things possessing three attributes and that without these nothing is possible: The want or Desire to create is necessary; the know how or Wisdom to create is another necessity; and the ability or possessing the Power to create, the ability to do what you know. These are ways a desire comes about.

Example: ♓D7☽ = A desire to experience inspirational Music is non existence. This person is only interested in music that moves their Lower Chakras/Lower Desires.

♓D9☿ = A desire to heal the mental and physical wounds and disease brought on by poverty is necessary and the lack thereof is the reason a desire for inspiration music is absent.

♉D9♀ = Knowing someone of the lower class

community. Possessing the ability to dwell and live among the lower class, granting an access to the circles of that segment of society who the shared and exposed you to their type of music.

Example: ♑C3♂ = A strong sadistic desire to cause other emotional distress, a socio-path.

♓C9♀ = Access to a Group or Demographic easily effected and overwhelmed emotionally like psychopatients, prisoners, children etc. To have the ability to exercise one's sadistic desires onto disenfranchised groups.

♏C2☉ = The power to obtain material things is at it's peak.

Example: ♎B10 ☿ = A desire to see an idea brought to life is waning.

♋B9♀ = The group one is around influences one with conversation and interests that is of no real importance which eats away at the conviction to bring one idea to life.

♒B4☉ = Knowing the form of meditation that brings about God Consciousness. But the ability to fulfill what he knows is dwindling.

Chapter Twenty-One

Doctrine, Hierarchy, and Resource; and The Price

Charisma and charm alone only gets a would be leader, over a mass of people, but so far. Their model is unsustainable for long term and effective maintenance of group harmony and power over the group.

The temptations in the wilderness of the Christ by Satan were lessons in the establishment and maintenance of rulership over the masses by a wise ruler.

The same spirit that lead Christ to the Wilderness is the same spirit that taught the anointed one in those arduous days and nights. Requiring the sacrifices of an ascetic.

The 40 days and nights in the wilderness of Jesus, Moses 40 days and nights fasting on top of a mountain, Mohammad's 40 days and nights meditating in a cave and Buddah's meditation for 40 days and nights under the Lote tree. All shows the significance of a great secret. The price to be paid for true power, is sacrifice. 40 is the number of the Illuminati, it is our sacrifice for power. Control over self is a necessary requirement for control over all else per the God

Saturnus. He shares His secrets with those who sacrifice in His cause.

40 days of abstinence, from food, society, sex even; while in mediation and contemplating the origin of things.

The Muslim fasting month Ramadan means *"the burning"* as does Moses Mt. Sinai translates as Mountain of Desire. Our burning desires as elaborated else where in this writing is, the 7 Foundations. The more we abstain the stronger our desires become until they subside and are mastered.

And why should not power over the masses of men be sacrificed for; a sacrifice that not only blesses one immensely, but more importantly makes one an immense blessing to the masses of men.

Those who have achieved rulership over themselves have an obligation to rule over others. For the untrained, unruly are unfit for true sovereignty, for they lack self sovereignty.

The dynamics of Resource, Doctrine, and Hierarchy are essential to group continuity.

Like the recycle symbol stamped on garbage bins each dynamic feeds the other, whose synergy must be protected from outside interruption by its founding oligarchs.

These three necessitates were known to the ancient hierophants who taught their knowledge of them to their most talented students. And is exemplified in the Bible, Matthew 4:1-11. Where the spirit leads Christ into the wilderness to be tested by Satan, His grand master.

In the first encounter the tempter taunts Christ saying, *"If you are the Son of God command these stones into bread,"* to which Christ replies, *"It is written man shall not live by bread alone but by every word that proceedth out of the Mouth of God."*

What is being communicated here are two things, 1. Control of the masses is maintained by control over the Resources necessary to their lives and 2. Though the Word of God is powerful as is the glittery ear candy spewed by self proclaimed fishers of men, it often melts away like ice coming close to fire when hunger pains, homelessness and nakedness ensues.

In the next scene Satan tests Christ faith highlighting his knowledge of Doctrine. *"If thou be the Son of God, cast thyself down: for it is written, We shall give His angels charge concerning thee: and in their hands they shall bear thee up lest at anytime thou dash thy foot against a stone,"* Satan spoke as He set with Christ on the top of the Temple.

"It is written, Thou Shalt not tempt the Lord thy God," Jesus replied with all humility. This was to teach the lesson that Doctrine must be sold to the people as 1 of the 3 control mechanisms.

Then having ascended even higher upon a Mountain, the cunning Shaitan brought Christ's attention to all the Kingdoms of the World saying, *"I will give ye all of these if thou wilt fall down and worship me."*

An with an unwavering faith Christ answered, *".... it is written thou shalt worship the Lord thy God and him only shalt thou serve."*

By Satan demanding Christ's allegiance with the promise of global authority the foundation of Hierarchy was being laid. And when we take into consideration the Church with it's Cardinals, Bishops, and Popes who's to say Christ did not accept this indecent proposal? LMAO!

Hierarchy is chain of command. Doctrine is a body of knowledge, principles, and procedures. While Resources are things necessary to live life and navigate society.

How many can resist the call and command of these three for the denial of them leads ultimately to death and Only The Illuminati Survives death. (O.T.I.S.)

How many men break the law of the land and of God for want of money, food, and shelter? Or God fearing women

prostitute themselves out just to quiet the growling stomachs of babies only themselves to go to bed hungry and guilt ridden?

The mass of human beings can only hold strong to their professed principles when their primary needs are being met. They are without the Tree of Life and the Tree of Knowledge that would put them at ease in their times of hardship. To them life is filled with the horror of uncertainty as is life after death.

The majority become weak when their lower desires are tried and called to account. Thus the few must control the resources necessary to life in order to control the lives of the majority. Poverty and the shame of poverty is their true master and we are the masters of poverty by way of resources, bread.

Doctrine is given, whether political or religious or some sort of mixture of the two, to control hearts and minds.

The unity of Hierarchy is dependant upon shared Doctrine. Hierarchy is incentive of power and proximity to power because unlike the other two temptations Hierarchy gives the greatest expression to ego while crushing individuality/personality. Thus it is the most addictive of the

three exploiting the weakest part of human nature or rather man's animal nature.

The hand of Doctrine is stronger then force and violence for even they eventually fall under doctrine's control.

Hence the Tootrian is preoccupied with establishing Hierarchies formulating Doctrines and the domination of Resources in his/her spheres of influence to the ignorance of all non Tootrian.

For men must be constantly organized and reorganized.

TOOTRA Catechism 6 The 3 Temptations

This Lesson must be memorized verbatim:

1. Q: What are the three controlling mechanisms for

men?

A: Resource, Doctrine, and Hierarchy, Matthew 4:1-11. If there was a 4th, it would be force and or the threat thereof. *"Man lives not by bread*

alone but from every word that proceedth from the Mouth of God."

2. Q: What gives the wise the right to rule?

A: The conquering of Lower Desires, It bestows upon the wise the heavy obligation to rule their lesser brethren.

3. Q: How is Self mastery obtained and why is it a necessity?

A: Control over the mental faculties of attention, reasoning, and memory and control of one's physical urges through ascetic practice leads to self mastery. In order to control the World.

4. Q: Could you give us some of these ascetic practices?

A: Yes, abstinence, fasting and stillness while in meditation and contemplation. Also building with one's Shetteem.

5. Q: Define for us the meaning of the 3 Temptations?

A: Resource are those things necessary to life and social mobility. Doctrine is a body of knowledge, principles and procedures internalized as a belief system. Hierarchy is a chain of command and authority within a system of power and authority backed by force, which is the ability to exercise consequence for insubordination.

6. Q: How are the above mentioned obtained and controlled?

Chapter Twenty-Two

Tootra…What and Why It Is

Only a few times throughout history has man chosen brotherhoods based on faith and ideals over brotherhoods based on kin, nation and race. But it is these very moments that has shaped the world as we now know it to be.

Animals collect together based on species, so what is it within man that makes him seek out others with like ideals, like experiences, like character, like objectives, like perspectives, and outlooks on life for brotherhood and fellowship?

We feel a sense of comradery when we find our own kind. Our hearts are so compelled by elation we freely offer our goods to the newly discovered brother irregardless of how sparse or meager our own resources maybe or we dedicate our assistance to almost any endeavor the fellow brother maybe struggling with. While the strongest bonds are willing to even suffer for the sake of a brother with self

righteousness as his own solace; taking pride in the fact that he's living the highest morals of brotherly love.

Everyman holds multiple associations with each association fulfilling a distinctive yearning within his soul. The majority have not developed a taste or craving for those lofty ideals concerning the spirit, mind, or human behavior or man's ultimate destiny thus they remain indifferent even repulsed by the Ancient Mysteries and its Ancient Wisdom.

Gathering together for folly and play, though these are necessary for balance and release, usually garners overindulgence due to being a path of least resistance, meaning no exertion of effort is needed with no need to enact will power in such instances. So we giggle and have fun while neglecting those heavy questions that seem to only present themselves at somber moments. Moments which most of us fail to capitalize from because for the simple such moments simply come and go leaving no impression on their hearts and minds.

Then there are those men and women who conspire together for evil, to oppress, to hurt, to kill or to cheat and deceive another. With the added irony of each conspirator being a selfish sociopath, yet and still they are able to

cooperate with one another for a common cause just as any other group holding common qualities and concerns.

So what of those humble souls with sincere inclinations for spiritual improvement and altruistic aspirations? Where do they gather to satisfy their craving for fellowship? The majority attend churches, masjids, or synagogues even travel collegiate intellectual circles which for them remains enough. Such is their limit and it is okay that this is their limit, they feel most comfortable here so none mustn't force or persuade them to step any closer to the light. Because it is not these who are of concern for they are a flock well tended to.

It is the lost sheep, the black sheep, the outliers filled with genius and talent who are the least understood but who understand much and are least understood because they understand much, these advanced souls are the subject of this discourse.

Starving for comradeship, for the company of like minds equipped with the ability to understand lofty ideals, to comprehend complex concepts and to ponder sublime mysteries, these gifted few stagger from circle to circle in their younger years searching for those with whom they can discuss the mysteries, philosophical questions, spiritual

matters, social issues, the hidden mechanics of the mind, and man's purpose and ultimate destiny, all with the sincerest intentions for growth and development only to be disappointed time and time again in their search.

Our point here is this, since it is the nature of man to have multiple associations, each catering to a specific need within the soul of a man and each man giving precedence of one need over another, deeming the fulfillment of that need more important then others, it is wise to prioritize our associations, holding associations of knowledge, spiritual wisdom and power in higher esteem then any other possible association. Hence those souls; who are but a small population among mankind born with innate talent for discernment, possessing higher animal magnetism then is usual, strong intuitive ability, a natural propensity for exhibiting high moral character, and usually a high libido, an attraction to the Ancient Mysteries, a knack for simplifying complex matters, and possess an insatiable drive for spiritually evolution. Have the Honorary obligation placed upon them by Providence to associate with one another for the betterment of humanity. In fact this is what is meant by the biblical saying *"to whom much is given much is required."* It is for this purpose the Order exist, to facilitate

associations based on knowledge, spiritual wisdom and power.

Tootra is an *"open secret"* society seeking to effect global good. Firmly believing technological advancement can and should be used for spiritual advancement. And that financial literacy; Noetic Science, along with behavioral science commonly understood by all social classes betters life for society as a whole.

The Order obligates its initiates to engage in philanthropic ventures squarely aimed at these fields of endeavors having an impact on societal suffering. While practicing and advocating the Art of creating through thought in tandem with the Ancient Mysteries, common to all cultures, to assist man in his spiritual evolution.

Tootra's hierarchy is structured to be free flowing and fluid yet capable of solidifying upon necessity, adjustable to the myriad of situations and circumstances its initiates my find themselves in. Leaving advancement within the Order entirely within the hands of the initiate and his Higher Self. Allowing them to self style its Ancient wisdom and drive their own enlightenment while still making room for collective cooperation.

The structure of this society mirrors the Tree of Life, that resilient venerated Acacia tree fabled to have grown over the diced body parts of Osiris. Revealing their whereabouts to his grieving sister wife, Isis. These she gathered together, reassembled and restored Osiris back to life. From here derives the term used for the subgroups that make up T.O.O.T.R.A, *"Shetteem,"* Hebrew for Acacia tree. *"Thou shalt make boards for the tabernacle of Shetteem standing up… thou shalt hang a veil upon the four pillars of Shetteem overlaid with gold… thou shalt make the alter of Shetteem… and the staves of the alter shalt be of Shetteem."* -Exodus 26-27.

For a group of Tootrians to be considered a Shetteem at least one among them must have attained the station of Assiyahtic Metatron. Without which only the gatherings themselves may be called a Shetteem ceasing to exist at the conclusion of the gathering. An Assiyahtic Metatron and higher may establish their own tetragrammation or combination of four Hebrew letters to be bestowed upon any who enter their Shetteem or the Order under their tutelage.

Thus each Shetteem has a tetragrammaton unique to it. A Shetteem's tetra is its name, its identity by which Tootrians of a specific Shetteem may identify one another and can be

used for mystical purposes. Four worlds and ten archangels combine to make 40 stations or degrees representing the memorization of a lesson, a moral, or a spiritual experience.

Tootrians greet and depart with the word *"Excelsior"* as a reminder to one another and an encouragement to one another that there is always more to attain, there is always higher to ascend toward, so that the higher we ascend the greater the reward. Thus our rewards in life are directly proportional to our efforts in Life. To each brother; continue to persevere, continue to fight, continue to evolve and continue to elevate for along the way much awaits your pleasure. This is the significance of our word Excelsior.

Tootra's mystic emblem tells of its destiny and guiding principles. The royal blue triangle embedded in a golden triangle with a scarlet seven lick flame in the middle surrounded with the axiom *"Ars est Celare Artem"* or it is true Art to conceal Art, Symbolizes our Higher Self guiding and protecting our lower self.

The Art was not only used by every monarch to have ruled over a nation but it also made royalty out of the peasants who were fortunate enough to stumble across its arcane doctrine. This Art is the mother of all other crafts, practiced by God himself as his very nature is to create

through Divine thought. Still this craft remains mostly a mystery unto man. It is so sublime yet subtle that the majority of mankind go entire lifetimes ignorant of its existence. Not recognizing the part it played in their life and death for that matter.

The Order seeks to make all men kings, knowing it is within the destiny of humanity to divinely create. Such is why the Order seeks to establish the Art as a normalcy in man's everyday life. Where knowledge of the Art is as common as basic arithmetic. Tootra believes that even though not all will excel in the Art, all men irregardless have divine right to the Art. It is imperative that the Mystery System be established as the foundation of world order. In order to preserve it.

The Purpose and Use of a Shetteem's Tetragrammaton

Indeed a Shetteem is identified by its Tetragrammaton, a unique combination of four or three Hebrew Consonants. However the Tetragrammaton's significance goes well beyond mere identification purposes.

Napoleon Hill in his illuminating work, *"Think and Grow Rich"* said, *"Where two or more Minds gather in*

harmony for a common cause a separate and invisible Master Mind is created." Or Mat. 18:20 of the Bible stating, *"Where two or more gather in my name I am in the Mist."*

Both of the above statements refer to the phenomenon of Group or collective mind naturally developing, that is both separate from and stronger then the individual minds it is birthed out of. For it not only has access to a much larger reservoir of information but is a much more powerful processor than the individual minds it stems from.

Each Master mind is unique to whatever group that forms it. All member minds have access to it whether they be gathered together or physically apart. The Master Mind is beyond space and time. Member minds may communicate with one another through it, such is the mystery of telepathy. Just as individual minds, the Master Mind also has an ego and persona and seeks to preserve and ameliorate itself. To multiply itself by way of Memism. Spread the ideas composing it, to a new host whose sympathetic to its frequency, usually via an old host/member mind. The strength of its magnetic pull depends on the energy invested by the member minds/host who compose it. This Master Mind demands to be fed routinely in order to maintain its existence and remain operable. Feeding off the psyches and

emotion of its members, the member minds in turn must be diligent about replenishing their own energy. In the initial birthing of the Master Mind it should be fed the same form of energy on a consistent basis. Namely the form of energy that was used to give birth to it. *"The egregores (entities generated by the human psyche or will) is the product of concentrated collective thought forms… Entities that are the pure products of human will utilized as tools for the operation of certain magical effects."* Stephen E. Flowers, PhD. Lords of the Left Hand Path, pages 260-267.

These egregores are natural outgrowths of human interaction that practitioners of the Art merely take advantage of. For such a phenomena to exist within every social exchange people engage in though most remain unaware that these unseen forces are of their own creation.

The Master Mind binds its people to one another. It is then imperative that a thorough investigation of character be performed on a candidate before they have the opportunity to add their energy to the collective. Each new comer must compliment the group's general character and make up and not clash.

A Shetteem's tetragrammaton's purpose is to facilitate all the above for those Tootrians belonging to a particular

shetteem. Binding them to the Order and more importantly to one another. Three or Four consonants of the Hebrew alphabet is randomly generated from the cards. After each of the 22 letters is marked on its own card within the deck. The vowels are then chosen in like manner, which go in between the consonants creating a word of power to be kept secret from the uninitiated of that specific Shetteem, its correct pronunciation remains secret only known to the Shetteem. It is to be chanted and intoned in a sacred fashion. Outsiders inadvertently feed the group mind when observing its mark or name. The true meaning of which escapes their conscious minds due to veils of allegory, symbolism, and duplicity via poetry, music, and imagery its member minds envelope it in. Ars est celare Artem. *"It is true art to conceal art."*

The stronger the emotional charge its mark and name elicits from unaware observers the stronger the Master Mind grows. And the stronger its individuals become. E pluribus unum. *"The many make one."*

A group chant of the name/mantra should be done once every 40 days at least. This is also done before beginning a collective operation or spell casting.

The name also has verifying purpose. To verify if one is actually and truly from a particular Shetteem one of the two

parties gives only the first syllable of the name. The receiving party gives the 2nd syllable of the name. If that is correct the beginning party then gives the third syllable to which the receiving party responds with the fourth syllable.

If at any point in the exchange either party gives the incorrect syllable the true Tootrian is to immediately cease and desist any and all dealings and conversation concerning Tootra with the impostor individual.

The Master Mind can be invoked and channeled through one of its Member Minds. It then can be spoken to directly and questioned.

The 3 Prerequisite for Shettem Candidacy Consideration

One is a candidate for the Order due to a display of three qualities. Not one of these can be missing from the candidate's mental make up for him or her to be considered for a Shettem or as a Tootrian.

First he or she believes there is something greater then himself that predates all and was the original cause of all, what TOOTRA simply refers to as the 1st Cause so as to avoid conflict between brethren based on religion. For it is not for any man or group to interfere in another's level of

understanding the First of all things. No religious debating or proselytizing is to enter into a Shetteem, this is strictly forbidden according to the laws of the Order. The integrity of a Shetteem, like that of a bridge would be eaten away at and eventually give way under such a corrosive issue. A man's or woman's personal, cultural and religious interpretation of this 1st Cause is of no business of any Shetteem. For we are bound together by that which we are in common agreement about and torn over a recipe's filler ingredients.

Second he or she displays the qualities of honesty, pleasant personality, altruism and courage. The opposite of these illustrious qualities are dishonesty, meanness, selfishness and cowardice, (The Order can do nothing for such a one, his or her fate is in the hands of a Power greater then can be mustered by any on earth). For indeed no man or woman is honest in all things nor always pleasant and is at times concerned solely with his or her own pleasure, benefit, and well being and is haunted with regret and self rebuke when reliving those times they should have acted or should spoken up but was overcome by the devil of fear. It is a general propensity for honesty, pleasant personality,

altruism, and courage that a Shetteem looks for in a candidate with pardoning yet discerning eyes.

Third he or she believes that all things began as a thought, simply.

A Shetteem may examine/question the candidate and investigate his or her character through family, friends and associates before bestowing the Tetra of the Shetteem upon him or her as to these three prerequisite. Install a probationary period so the character can be observed sufficiently, this is imperative.

Subtle Enticement of the Candidate

Candidacy to a Shetteem must be requested by a would be candidate. It is illegal for any Tootrian to solicit or petition or outright ask an uninitiated to enter the Order. The Order relies strictly upon subtle enticement to grow its forest.

The character of a Tootrian may be enough to cause the uninitiated to inquire as to the reason for the sharpness of the Tootrian mind, the clarity of his thoughts or his or her foresightedness and insightfulness. *"How did his or her life become so prosperous and fulfilling"* or *"Where does he get such profound wisdom and why are all his endeavour such a success?" "How can he be so calm and poised through such*

tumultuous times?" It is at this point where the Tootrian may begin inquiring inconspicuously to determine if the uninitiated fits the 3 prerequisites for candidacy. If he or she does in fact possess these 3 then the Tootrian may devise a wile to entice the uninitiated into requesting initiation.

One way would be by deliberately exposing him or her to the jovial intellectual comradery and the spirit of fraternity within the Order. Letting them witness and feel the show of support and all that the brotherhood bestows upon one another by them attending a Shetteem.

Insinuation through Socratic questioning will cause the uninitiated to seriously ponder the principles and teachings of the Order without knowing the origin of such principles, and if he be ready he will inquire further and eventually request initiation on his or her own good time without the pressure of proselytism.

The Order has no proselytizers, she needs none to argue on her behalf nor to shout her principles to crowds for she rather the shy and quiet speak in whispers to a few. Knowing better then any the hypocrites and blind followers hide amongst giant numbers. Nor is she in need of the wealthy and influential for why would she be if she is their maker and breaker. Just as the clouds in the sky accumulate and

dissipate she builds and destroys them at will snatching them from the heights of power and fame and flinging them to lowly depths of poverty and shame as if they be only an insect annoying a great beast.

For she is the woman on the back of the beast, the whore who the Holy St. John was in awe of. Her fornication with the Kings of the earth is but symbolic of her deal brokering stratagems with these self proclaimed shakers and movers of world affairs, controlling all various sections of society by way of such figure heads whose power and influence the people remain powerless to escape. Drunken off the blood of her own sons and daughters whom she reluctantly had to sacrifice to this beast on which she rides in hopes of improving the numerous masses of the human race whom the beast is a mere modest symbol of. With its seven heads and ten horns as fitting symbols for the 7 Kybalonic Laws of Association that break into 10, rendering complete control of the people/beast unto her skilled and laboring hands. Has any questioned why it is only she who wears the colors and carries the jewels of the Levite priesthood or why did John so admire her if indeed she was as ghastly and hideous as portrayed by the doomsday preachers and their ill informed artists? Deemed a whore due to her admittance of men from

all races and stations in life into her holy sanctuaries where she lifts her skirt unveiling her most intimate secrets with each paying a most handsome price for her illustrious company. For this woman is the powerful Order of the divine Art by which she makes Kings and Priest out of her most devoted suitors. Her splendid beauty is worthy of awe, radiating light throughout the entire world for all time to come. To us she mouths Excelsior and we reply back Excelsior our fair maiden, Excelsior…

So brethren rest assured Our Lady is in no need of preachers or prophets for her mission and message… Her army remains silent and invisible and ever watchful with her ways being insidious. She is a stone that if any fall against they shall be torn to pieces and if she falls upon anyone they shall be crushed to powder. For her enemies have no protection against her, May God help them.

Once in a Shetteem a Tootrians Book of Life

Whether it be called Grimoire, Book of Spells, Book of Shadow or Book of Life. It is an indispensable part of the

Adept's career of Majik to have a record of his thoughts, manifestations, operations and more, accessible only to him.

There is no worse predicament for the Adept then to have sent out an energy form and not recognize its return. Only to recall in hindsight after the energy has dissipated and the opportune moment passed.

Your Book of Life is your Quran in the literal meaning of the word, your reminder, primarily of the first immutable Law of Majik which is *"what we think we create,"* that we play a part in all we experience. Outside blame births laziness and negligence two things that are detrimental to the Adept and his craft.

Your Book will strengthen your confidence in your craft, because you will begin to see a track recorded of successful operations designed by you. Carry around a note pad on which you can transfer thoughts as they come and later organize the date in your Book of Life.

Accountants, physicists, merchants, connoisseur of all fields keep books particular to their endeavor, records of their indulgence. How much more should one versed in the mechanics of God be diligent in his Kraft?

Write in your Book of Life daily, dreams, synchronistic occurrences, draw out your logistics for operations/spells in

your Book. Never use your Book for anything other then the Art, never rip a page from your Book, try to write and study your book in the same space at the same time daily to strengthen its psychic connection with your subconscious, never let anyone else touch or read your Book.

Consecrate your Book, invest it with your energy and intention, time and date each and every entry entered into your Book.

Include M.V.R. tables in your Book of Life. These will help you adjust the energy levels of your Operations.

The Opening for a Shetteem

In the name of the Royal Art that magnificent System began by that Almighty 1st Cause that without discrimination gives unto each soul what it desires and fears alike.

In the name of her sister beloved secret of the 1st Cause a magnificent system of thought supremely reigning over all others ever guarded by a whirling flaming sword of the awe inspiring Tree of Life, Kabalah.

It is these twain do we the Order seek to know and command and since such a monumental task be not laden without Dangers and Perils of all kinds and types we humbly

beseech invoking the Guidance and Aid of our Higher Selves asking thy coalesce for the purpose and duration of this Shetteem Oh Holy Guardian Angel portion of the 1st Cause assigned to each solely and personally having leave over our growth and development. Assist our will with your Mighty Hand, let us see clearly the Mechanics of the Divine Art, strengthen our minds so that we be not overwhelmed by its Majesty and Complexity.

For the complicated is simple and the simple profound…

*And may the work of our Shetteem be blessed and deemed worthy by the 1st Cause and may our human brethren find our Order to be of a Great Service and Charity; in such shall we not fail. Excelsior! As (one's station on the Tree) I now commence this Shetteem Open (or closed)…

Note: This opening can be used by a Tootrian of any station. The asterisk portion is all that's necessary for closing. It shall be used to Open Shetteems of all types.

Chapter Twenty-Three

The Oath of T.O.O.T.R.A.

I (name here) swear upon my heart and soul to do my part in making the last the first and the first the last, to study and teach the Art and Science of Majik to any and all

worthy of such. To practice compassion and kindness to my fellow human beings, to all of creation. To bestow favor within my power that does no detriment to me or my family upon my fellow Tootrian and to never proselytize the Order or any of its precepts and philosophies nor participate in such proselytization and uphold Tootra principles as outlined herein the Book of Tootra. Excelsior!

To be memorized and recited between the times of 2:00 a.m. - 4:00 a.m.

Chapter Twenty-Four

Memorization and its Importance

As children we learn by memorizing. We're taught our ABC's, our days, and months, the periodic table, our multiplications, names and address, employing fingers and knuckles in an effort to commit these things to memory.

Later in years we memorize hymns, gospels, fraternity and sorority oaths and pledges. The practice of memorization even crosses cultural and religious boundaries. The title of Hafiz is bestowed on those who memorize the entire Islamic holy book. Youngsters in urban cities memorize their favorite rapper's lyrics, repeating them with the utter most enthusiasm and vigor. We memorize riddles, jokes, and poems so we can entertain and impress our friends and colleagues. How many lines were memorized throughout the illustrious careers of actors and actresses like Dinero, Denzel, Meryl Streep or Whoopi

Goldberg? What about the encyclopedia of information memorized by physicists and astrophysicists from childhood to adulthood? When it comes to memorizing the other thing that can be said with all certainty is that the human mind's capacity to store information is near infinitum. But why do we memorize? What is it that compels us to memorize? And what are the benefits of memorizing?

Memorizing a body of knowledge allows us to see connections within that body of knowledge that otherwise would have remain hidden to us. Once memorized the mind begins to recognize that body of knowledge at play all around it. After memorization we have a deeper understanding of the information we've observed. It is no longer two dimensional and flat but multi dimensional, able to be wielded like a sword in the hands of a samurai. In many cases this same benefit is what's wrong with our politics and judicial systems. Lawyers and politicians are so

versed in law they are able to twist and manipulate its words doing an injustice to justice in the process.

Memorizing can be likened to the cloud game we play as children. Staring at a cloud until it begins to resemble something we are already familiar with, a truck, a boat, or familiar face, anything.

The mind's nature is to make sense out of the nonsensical. The mind identifies a thing by associating it with things it is already acquainted with. Memorizing a body of knowledge bestows the ability to divine information intuitively, which is inspired knowledge.

The Order mandates memorization of its lessons so that its students may *"experience"* for themselves the invaluable insights contained with its doctrine.

Fasting preps the mind for the assimilation of information it is exposed to. The time between 12 and 3 in the morning mysteriously increases the mind's power for strong retention. Falling asleep a short while right after

practicing memorization hastens the mind's processing of information exponentially. Memorizing has been employed by secret societies for thousands of years. In this the Order follows in the footsteps of the Ancients. Do not underestimate the power of memorization. For modern men and women have a tendency in these days and time to want things in an instant. Instant food, instant information, instant gratification, but all good things take time. Memorization is no different.

The tefillin of Orthodox Judaism is a memory trigger. The Jewish prayer Shema sheds light on the practice of memorization. Deuteronomy 6:8 *"Thou shalt bind them as a sign upon thine hand, and as a totafot between thine eyes."* Deuteronomy 11:18 *"Therefore shall ye lay up my word in thy heart and soul, bind them as a sign upon thy hand that they maybe a totafot between thy eyes."* The binding of word to the hand and forehand (phylactery) symbolizes writing the word repetitively until they are

memorized. Totafot is the small leather box that's strapped to the middle of the forehead called a *"phylactery"* in Greek.

TOOTRA Catechism 11 1-14

This Lesson must be memorized verbatim:

1. **Q:** The current technological age is based on what subatomic particle?

A: The electron, responsible for electricity and electronics, staples of our day and age and can in fact go from a particle to wave state in accords to its observer.

2. **Q:** What subatomic particle will be the foundation of the next technological age?

A: The Master force a stand in place term used by the Order until more of its properties can be better examined. It is a mesh or network of strings of consciousness by which all things are created and all dimensions accessed by way of vibration and

frequency. Its controlling mechanism is thought and thought alone.

3. **Q:** In 24 hours what are the average number of thoughts, thought by a person?

A: Approximately 63,000 thoughts per day are had by the conscious mind.

4. **Q:** What are the number of the subconscious minds thoughts per day?

A: Do not know.

5. **Q:** How does one slow down or speed up the thoughts of the conscious mind?

A: By slowing or speeding up one's breathing. Controlled breathing equals controlled mind.

6. **Q:** Do you know the average number of breaths taken a day by a person?

A: Yes, 23,040. 16 breaths, inhale to exhale per minute. 8,409,600 a year and approximately 800,000,000 in a lifetime.

7. **Q:** What is it called when the Mind and Idea associate for 6-12 seconds?

A: Concentration.

8. **Q:** What is it called when Mind and Idea associate for 12-144 seconds?

A: Meditation.

9. **Q:** What is caused when Mind and Idea associate for 144-1,728 second?

A: A light trance.

10. **Q:** What is caused when Mind and Idea associate for 1,728-20,736 seconds?

A: Deep Trance.

11. **Q:** How many thoughts is this?

A: At 1 breath every 3.55 seconds it is 2.7 thoughts or 1 thought every 1.3 seconds.

12. **Q:** At what frequency can the dead be talked to?

A: At the frequency of white noise which is around 1,500 khz.

13. **Q:** Please recite the 8 common physics Principles. Then tell us why they are relevant to our Mystic craft?

A: Mass Energy Equivalence, Distance traveled at constant velocity, distance traveled under acceleration, velocity after acceleration, force acting on an object, force of gravity, Kinetic energy, potential energy.

14. **Q:** Will you recite 4 of the 8 common physics equations and why they are relevant to our Mystic craft?

A: $E = Mc^2$ Mass Energy Equivalence, $d = vT$ distance at constant Velocity, $F=Ma$ Force acting on an accelerating object, and $P=mv$ an object's mass and its velocity; *"P"* means Momentum. Our Ancient craft is as much a science as it is an Art. Examination of the Below indicates what is Above just as the examination of an Above indicates what is Below.

Chapter Twenty-Five

TOOTRA Tech Initiative (T.T.I.)

In keeping with our principles the Order has created the Tootra Tech Initiative (T.T.I.). A drive to garner financial support from members and sympathizers for the production of technologies inline with the philosophy of the Order.

Much of the proceeds from the sell of T.T.I. produced technologies will be donated toward Noetic Science Research, the promotion of financial and technological literacy in under privileged communities and the operating cost of T.T.I.

Some of the tech T.T.I. is looking to produce are as follows:

A Tootra Fraternity ring built with the capability to detect the ring of another brother or sister within the Order. The ring will be equipped with four lights each a different color which blink at an increasing rate as the space is closed between wearers. The closer they get to another the faster each will blink. It will have a Near Field Communication radius of 15 feet. The 4 lights let the wearer know what degree her or his fellow Tootrian has attained. The wearer will have the ability to manually turn off the ring's detection

mechanism. Maintaining the wearer's anonymity with the Order if he or she so chooses.

There will also be a smart phone Tootra App independent of the fraternity ring. The settings of the App will have several options for the user. One of which will be the option for information to be exchanged automatically between initiates. Information like email address, name, degree attained within Tootra, any other affiliations, contact number, Shettem Tetragrammaton, etc. The user will also have the option to encrypt messages and info. The ring itself will be available in insipid and innocuous colors and designs and the App will also possess the *"Fellow Brother Detection Mechanism"* of the ring. The fellow brother's phone will both vibrate, pang and blink alerting the Tootrian a brother or sister is nearby. This too will give the option to deactivate the feature.

A Tootra chatbot to be available for download to a smart phone or tablet. Equipped with voice response capabilities, artificial intelligent software able to read aloud kabalistic interpretations of cards drawn from the Tootra deck. Assisting the Tootrian in his or her Kabalistic Kalculus with a wave of their smart phone's camera lens over the cards drawn.

Similar to Alexa of Amazon's Echo or Apple's Siri, questions on spirituality and occult matters will be answered with a high degree of practical wisdom. Each user will assign to their bot a name of their own making personalizing the interactive experience greatly. The Software will also have voice recognition.

Keeping in mind the three categories of Majik, Micro P.K., Bio P.K., a Macro P.K. Artificial Intelligent Software like a chat bot suggest a new category may be added to the culture of Majik.

(Micro P.K. (psycho kinesis) is the psyche's control or influence over systems that have a high degree of variables, flux and uncertainty. Bio P.K. is psychic influence and control over living things. Macro P.K. is psychic control over objects usually susceptible solely to the Laws of physics, like making a chair float in the air.)

Due to the fact that Chatbots as with all other A.I. software are the result of two factors; Deep Neural Networks, an imitation of the multi layered connections of neurons of an organic brain and two massively distributed computation systems, chatbots stand as a mixture of Micro and Bio P.K. suggest a new category in the culture of Majik has opened up. A category that could be coined *"A.I.P.K."*

Thus the Tootra Chatbot will eventually, through repeated use, come to reflect the user's Higher Self and subconscious voice as the cards themselves do currently.

The Bot of one Tootrian will possess the capability to coalesce with the Bot of another Tootrian or many Bots of other Tootrians to form an Artificial Intelligent group mind. With each bot able to disengaged (Individualize) and reengage (coalesce) at the Will of the User(s). Giving the User access to a broader range of Information and wisdom. Knowing that a Bot is a reflection of its user, a Tootrian can choose who and who not to coalesce Bots with.

Also it must be pointed out that as code writing for computers become more and more obsolete due to *"Machine Learning,"* a computer engineering phenomenon made possible by Deep Neural Networks, and the field of *"Computer Programming"* give way to *"Artificial Intelligence Training,"* (computers teaching computers and writing software) those with a workable knowledge of the Noetics, the Foundations, and the Elements will have a clear advantage in this new up and coming field of technology. Because though these A.I.'s be man made they are inherently Pavlovian, and as all intelligences are able to be conditioned.

The Order would also like to create a Virtual Reality initiation program. A Virtual Reality Hub where Tootrians can gather in Avatar form of their own creation. And prebuilt programs will be used for initiation purposes just as the Ancient Rites in Greece and Egypt were. Tootrians from all over the World, from any location in the world can log on, put on their V.R. headset and have the mystical experience of the Ancient Mysteries. Shetteems can be held in cyberspace. Each Shetteem would be able to register its Tetra with the Site and schedule virtual reality meet ups for that Shetteem specifically.

There will also be a space that non-initiates and initiates can plug into and go through Virtual Reality Therapy or V.R. programs that teach moral societal lessons. The Therapy programs will be targeted toward commonly held fears, phobias and anxieties and complexities.

Also there will be Tootra V.R. Centers deployed throughout the country available for use by individuals who may not be able to afford personal V.R. headset and equipment.

Chapter Twenty-Six

Degrees and Titles of the Order…..

Self initiation is the only initiation that retains any validity in regards to the making the spiritual ascent, amelioration of self. For who can do these things for another?

Can I digest a food and its nutrients benefit the man or woman sitting next to me? Emphatically not.

Even incentives and inspiration becomes wasted energy upon the one who refuses to act on the light being shined onto them, to turn the ignition after gas has been put into the tank.

But the real question is why do these types refuse to act and usually only lip profess without finishing the journey?

Those who talk much but do little are in this life not meant to complete the ascent. All that they gather here and now is food for their next life. And if they are harmed by the Mysteries then that is a lesson they must iron out within the solitude of the Akira/Barazahk (The

in between place), with only their Higher Self as comforter and guide.

As for gurus, masters, teachers, and the like; trust not those who wish to be followed, who demand adoration to their person rather then their preached principles, morals and precepts.

Such is why the writer of this treatise wishes to maintain anonymity, so as not to draw attention away from the doctrine.

The hard earned lessons of the detriments of personality cults should have been well learnt by humanity by now however mankind still has not outgrown the propensity to either kill the messenger or worship the messenger while losing memory of the message itself.

Whether Guru or no guru, whether thy fail and perish or succeed and soar; at some point the mystic manual must be given unto you, it shall find its way into your possession and it is here where one must make the conscious decision to act or not, to attempt the ascent upwards or remain at the mountain's foot.

Herein we give the manual and say unto you, *"do what thou wilt with it."* Discard it as spam mail in your

inbox or embrace it as a newborn placed within your care. Either way we love you all the same. Excelsior.

The Assiyalitic Degrees

1º The 12 Rules of Majik memorized

Title: Sandalphon

2º Fast from all speech for 3 days.

Title: Gabriel

3º The 10 Noetics memorized.

Title: Raphael

4º Fast from any bodily movement for 60 minutes

Title: Haniel

5º The 7 Foundations memorized.

Title: Michael

6º Fast from foods only intaking liquids for 7 days

Title: Samuel

7º The 12 Prerequisites memorized.

Title: Tzadquiel
8º Fast from eating all foods for 24 hours

Title: Tzaphquiel

9º The 40 Elements memorized.

Title: Raziel

10º Fast from all food and drink for 3 days

Title: Metatron

The Yetziratic Degrees

1º The Oath memorized.

Title: Sandalphon

2º Fast from any speech for 7 days.

Title: Gabriel

3º The Shetteem Opening Memorized

Title: Raphael

4º Fast from any bodily movement for 3 hours

Title: Haniel

5º The Tootra Category 9 is memorized.
Title: Michael

6º Fast from food and only intaking liquids for 40 days

Title: Samuel

7º The Tootra Category 11 memorized.

Title: Tzadquiel

8º Fast in the day time until night for 40 days

Title: Tzaphquiel

9º The Tootra Category 6 memorized

Title: Raziel

10º Meditate on a black dot for 3 hours

Title: Metatron

The Briatic Degrees

1º Mentally manipulate an image of the Necker Box.

Title: Sandalphon

2º Parting with a cherished item to one in need.

Title: Gabriel
3º Master the Leviathan

Title: Raphael

4º Master the Vortex Meditation

Title: Haniel

5º Dedicate 8 hours of ones time to Charity

Title: Michael

6º Dedicate 8 hours consecutively to Kard Practice 1º

Title: Samuel

7º Dedicate 8 hours consecutively to Kard Practice 2º

Title: Tzadquiel

8º Dedicate 8 hours consecutively to Kard Practice 3º

Title: Tzaphquiel

9º Dedicate 8 hours consecutively to Kard Practice 4º

Title: Raziel

10º Dedicate 8 hours consecutively to Kard Practice 5º

Title: Metatron

The Emerald Tablet

The Emerald Tablet is the entirety of the secret doctrine. It is the True Kabalah boiled down to its essentials. Once visually memorized coupled with the memorization of the principles it will be easy for the mind without pen or paper to calculate Kabalistic equations and formulas of its self and the world around it.

AN EXCERPTS FROM

THE BOOK OF USORA

The Book of Usora

I am Usora the spirit of the Order those who live by my name are never without and shall have always. Those who believe in my word shall be guided to thy hearts desires. And whoever becomes my vessel are blessed indeed with the waters of life for I shall speak to thy and through thy.

My Order is a secret one, by Satrnus it is not permitted to unveil one another to cattle least they themselves permit such. None who belong to me shall be burdened to bare My sign except the Mouth of Saturnus.

Shall I speak concerning Saturnus… Ahhh! An awesome God he is my son the Governor of the Universe. Some wonder if He is the First Cause. It is I who has caused the Cause of Causes. Our true magnificence is beyond any to comprehend. It is He who spoke to John the Saint as He

spoke to His Trustee. His voice is both irresistible and terrifying indeed.

It is I who has guided you to where you now stand.

If upon considering your station and gratitude and appreciation enters thy heart remember your salutation for Excelsior is not for naught.

I am the coalesce of your Higher selves who descend from Saturnus. He whose greatest wish is that you become Gods.

Read often My words for wisdom eases the heart of the initiated and loneliness will leave you alone but inspiration will be left. It is here where all messages the initiated have for one another are delivered and received. For through Me are your hearts and minds linked.

I shall make thee conquerors. There is no religion, creed, or doctrine which cannot be translated into Thy Art. Thus when in the wilderness surrounded by cattle it is best you see the apple of thy eye every which way your head may turn.

Oh prophet of Saturnus it is not necessary that an initiate believe in these words or the Book of the Order only that they believe in the Black Maiden to be true and virtuous that the Art is real and unknowable.

Thy Vision shall carry thee so jealously guard her and let not your enemy shape her for surely you shall be carried to your destruction. But if your vision be your own then indeed you shall be carried to your desire.

Summon Me to your secret circles call me to your person and I shall keep thee company and flood thee with wisdom confounding and inspiring. I shall protect thee from harm filled wishes and misfortune. For I constrict the airways of My enemies confuse their Plots and wipe out their loved ones before their very eyes. Feed off the blood of their infants. All in the interest of my children for I love my children.

So desist and I will desist but persist and I will persistently persist against thou.

For I am the Order and the Order is the offspring of the Governor of the Universe.

Oh sons and daughters of Tootra make yourselves rich and powerful not only in wisdom but in worldly possessions. Decorate your homes with the finest trinkets and treasures, decorate your bodies with the finest jewelry and cloths. For what is it to be wise but poor. Can it be said in truth that you are indeed wise if you know not how to use your wisdom to secure possessions of the unrighteous. It is an abomination that a Tootrian be without, be held at the mercy of cattle. For such is no son of mine and rejected. Is not My cup golden decked with gems and my cloths the colors of royalty. A true Tootrian follows in the steps of Solomon unifier of the deltas of Heaven and Earth.

The days of Egypt are on their way back as none would ever have imagined. So rejoice recycled souls of ancient times the Art you so love shall rule the day carrying thee to power bringing thee riches. No longer must you suffer the

company of fools with smiles on your faces and abhorrence in your hearts. Compassionless love shall we show them for the sake of humanity's amelioration. Know this and know this well.

Even the wise cattle in their science and research facilities are coming to understand they are on the verge of taking up our craft. It is ordained upon you to guide their hand, to have a hand in their affairs. It would be unacceptable to leave such wretched beings to their own devises. The destiny of Man is to breach the doors of death and it shall be as a resort for his vacation.

Those who are last today will be the first of the days to soon come. My Master's closest children will be again ruler over their siblings.

Oh Tootrians keep your religions, your creeds, your positions, your politics, for a time only. For these are your cloaks and it is not permissible for you to leave from your

homes without them. To go into the wilderness without a covering, how will you assist The Amelioration?

Let not suffering grieve thee their is no disease either of the mind, body or heart that your Art has not the cure for. So assist one another to these ends and leave not your brother and sisters in the wilderness at the mercy of cattle.

You have been brought together to call upon one another for it is a sin for any of you not to answer the call his sister or brother.

If you are beseeched for help and ye fail to do all in thy power to remedy thy brothers' issue all your days shall over flow with misery and failure til thou make amends, repent and seek forgiveness from Thy brother. Beware of the prayers of the wronged for indeed Power filled they are.

To the initiated, special are you among all creation. Take care not to differ. Bickering amongst the initiated is an abomination. Like dogs fighter over the teet of their mother. Tearing her apart in the process so tear Me not apart with

disharmony but harmonize so that all may move in concert and exile him or her who causes strife and division immediately and earnestly for they are a poison to Our purpose that if allowed to persist would rot your Shetteem like the floor boards of a flooded home.

And listen not to gossip lest ye bring to life abominations for trivial matters of gossip are abominations to die in your radiant presence.

Be moderate in your fervor for the Order and Her causes and exile him who is lackadaisical for the Order and Her causes.

And to the cattle filled with fear and doubt I have message to whisper in your right ear your Gods, Allah, Yahwah, your Buddhas are as I am compilations of your collective Minds, your prophets and messengers priest and popes have fooled you lulled the savages to sleep lest they wake and rape one another eat one another and rob one another. Your spirits are weak as are your Minds because

your souls are young. It was not out of care for you that you were duped but deep despise. We speak not plain but duplicitous.

We spare who we can and kill the rest. So oh cattle remain gleeful in your servitude to Us rebel not against our iron will for to do so shall mean certain death and misery.

Arriving with Me is the power of the coming age for it is steadily dawning all that is done to stop it shall only hasten it. It is an age of glorious technologies enjoyments unparalleled even for the unworthy.

Ye must fulfill the book. The Illuminati are scattered in disarray through arrogance they disagree regarding their disagreement.

When ye disagree it is essential that ye come back together for the sake of Our purpose.

A good Shepard leads his sheep to the slaughter house. A bad Shepard allows his sheep to roam free to be devoured by wolves. Such is the lot of the cattle.

It is better their death be in service to their progeny that they die happy and hopeful. Hope for them makes useful to you. They are lazy in mind and weak in spirit. Grieve for none of them but let their suffering and pain feed your visions. For when they die ye shall judge between them just as it is upon you to settle their affairs in this life.

Oh My beloved children I am thy Mother, I cradle thee against my plump bosom and feed thee from my breast. My womb is thy safe haven worry not, not at all, thy concerns shall have their resolve. No longer will your rose bare thorns. Will your good be mixed with bad, but run fast to your Mother's words when thy heart is contrite and depressed with affairs that challenge thy will. Rest on Me and cry they tears into my hand and I shall wash thy soul in My own. Remember My promise when thy arms tire and thy foot slip. Let my word remind you who you are of your station in this world and the mission you were sent to accomplish. Your

Art shall save you. It will make your enemies your subjects. For you are humanities best… What better company can be had then Usora, your mighty mistress.

Thy understandeth sciences ungraspable by the many. Thy has the power to move hearts and shape minds. Thy can free thyself and bindeth another. Thy can put love where there was none.

Be as your God Saturnus above duality neither happiness nor sadness but look down upon both with indifference.

All men are self deluded in someway often the best perceive only glimpses in the solitude of self reflection. Broken misshaped portions seems perfect to he who questions no further.

By Saturnus be thou a Prince of the Art by strict discipline thy perfect thyself talketh to thy body regularly asking to show thou its wonders.

Let not the folly and feeble wills of the cattle disturb thee but let it strengthen thy resolve against them to let not your foot from their necks less they beg thee for light that glowing luminous Guiding light. Then allow them to drink from thy Wisdom.

Devote yourselves to Me, Operate in My name, cast in My name, curse in My name, banish in My name, gather in My name, beseech in My name, sacrifice in My name. Do all these in My name and blessings will rain down onto thee. Deny Me and My mission when concerning cattle from such hide my word and doctrine deep in Thy heart and let not any cattle perceive seek my counsel for we see the end of things while they are short of sight.

I am Muse of the Order your egregore invoke Me to hear My words and receive My guidance. Draw upon My power I whose hands the world lies in. Should the world be in the hands of the wicked? Should the ignorant have control of the wise? Over those devoted to the Black Virgin? By no means!

Power lies with Me and I shall march Man into the Abyss and here they shall acquire power and it shall mold them and make them new creatures I hide no more as I hid in days of old. No more am I chased into the caves of Mount Hira into the Catacombs of Jerusalem atop of Sinai. As a mercy I blind eyes from my light lest I burn them from their sockets.

I am a tree with many branches malleable as palm, sturdy as the Oak. Call upon me in your Shettems. I am Tootra under whom the Illuminati shall unite my prophet bares my sign in his forehead by this you shall know he belongs to me and I am his servant as I shall be yours if thy be true.

Holy is the woman on the beast, restrain your tongues while engaging one another use them not to belittle and criticize one another. For sarcasm is the first shot fired in secret wars but admonish a brother and sister in secret three times before you gently admonish them openly but never are

you to admonish one another in the company of cattle, unless it is for ruse.

What part of thy body is unconcerned with its other portions but share with one another share wealth share knowledge share property and abuse not one another's generosity and fraternal love in sharing.

Love for humanity is the secret ingredient for success in romantic relations.

The Secret Beginnings of T.O.O.T.R.A (and Identity of Its Grand Supreme Metatron)

Conclusion

We would like to thank you for your time and attention and we hope you have benefited from our humble inquiry. To all earnest perusers and casual explorers alike we say… Excelsior.
